Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q17-Q22):

NEW QUESTION # 17

One of the initial phases in OBIEE implementation is the Discovery phase where the project team focuses on a few activities. Which option is not one of them?

- A. Data Quality Assessment
- **B. Technical Requirements Definition**
- C. Business Requirements Definition
- D. Dashboard Testing

Answer: B

NEW QUESTION # 18

What are the two ways to use the administration tool?

- **A. Administrator can use repository and session variables in a repository to streamline administrative tasks and dynamically modify metadata content to adjust to a changing data environment.**
- **B. It can be used for versioning of the rpd.**
- C. The administration tool uses a set of wizards that support the design of calculations, expressions, dimensions, and so on.
- D. It can be used to manage user password.

Answer: A,B

Explanation:

Note: The Administration tool is used to manage OBIEE server and have some capabilities to automate some repetitive tasks and principally his embedded tools.

Oracle Business Intelligence Administration Tool is available only for Windows operating systems.

The Administration Tool is a Windows application that allows the BI Server administrator to create and edit repositories.

Repositories can be edited with the administration tool in either online or offline mode.

The Administration Tool also includes a session manager and a cache manager which are available in online mode. The Cache Manager displays what queries have been cached and how frequently they have been accessed. You can also select and delete items

NEW QUESTION # 19

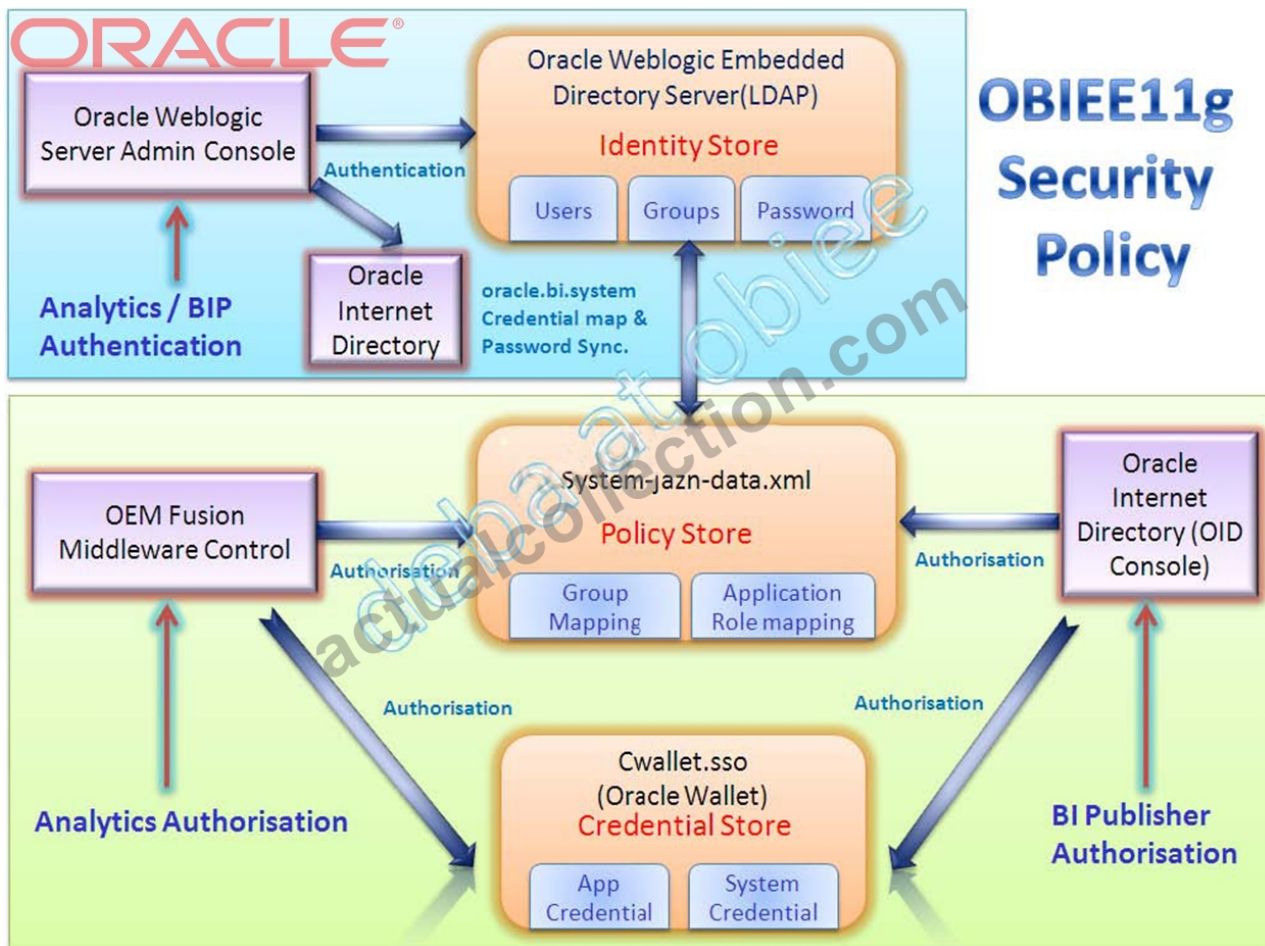

OBIEE default security model stores security Information such as user names and password combinations for accessing an external system such as Active Directory. It is stored in the_____.

- A. Credential Store
- B. Policy Store
- **C. Identity Store**
- D. Person Store

Answer: C

Explanation:

Identity Store: It is directory server to perform the authentication. It contains user name , password and groups membership information .When a user name and password combination is entered at log in, the authentication provider searches the identity store to verify the credentials provided. See figure below.

NEW QUESTION # 20

What must be done before you can run the Oracle Business Intelligence 11g Installer?

- A. Create required Oracle Business Intelligence schemas in a database
- B. Ensure system meets installation requirements for Fusing Middleware, Oracle Business Intelligence, AND Repository Creation Utility
- C. Select installation components - OBIEE, BIP, RTD
- D. Obtain BI installation media
- E. Install the WLS Admin Server

Answer: A

Explanation:

Before you can run Oracle Business Intelligence 11g Installer, you must first create required Oracle Business Intelligence schemas in an unhardened database. You use a tool called the Repository Creation Utility (RCU) to create these schemas with the appropriate permissions and data.

Reference: Installation Guide for Oracle Business Intelligence, Additional Oracle Business Intelligence 11g Installer Requirements

NEW QUESTION # 21

What is the first step when creating an Aggregate table in the OBI repository?

- A. Create a dedicated Connection Pool
- B. Specify the Fact table that you want to aggregate
- C. Test the Aggregate table by using Analysis
- D. Use Job Manager to run the Aggregate script

Answer: B

Explanation:

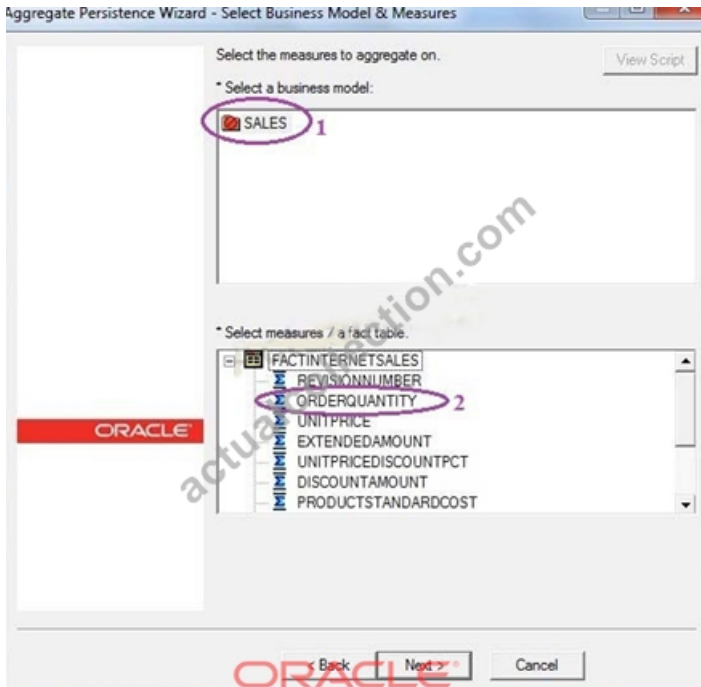

Steps for Creating Aggregate Tables in OBIEE

1. Create all Dimension Tables, Fact Tables & Hierarchies, which are required to be aggregated.
2. Go to Tools > Utilities (from Administration tool menu bar), a dialog box will pop up with all available utilities.
3. Select Aggregate Persistence Wizard, and then click Execute Button.
4. Now Select appropriate path where you need to generate Aggregate Table SQL.

Note : Click Generate DDL file for first time generation of Aggregate Table

Click Next, to move to next page (Select Business Model & Measure Page)

In Select Business Model & Measure Page, Select Appropriate Business Model & then select associated Fact / Measure.
