1z0-591 Test Objectives Pdf | 100% 1z0-591 Correct Answers

Our 1z0-591 Research materials design three different versions for all customers. These three different versions include PDF version, software version and online version, they can help customers solve any problems in use, meet all their needs. Although the three major versions of our 1z0-591 learning materials provide a demo of the same content for all customers, they will meet different unique requirements from a variety of users based on specific functionality. The most important feature of the online version of our

1z0-591 Learning Materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the 1z0-591 learning materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q69-Q74):

NEW QUESTION # 69

Which three techniques are applied to support Failover?

- A. WebLogic Clustering
- B. Universal Installer > Scale Out BI System option
- C. OBIEE Clustering
- D. Vertical Scaleout

Answer: A,B,C

Explanation:

Explanation/Reference:

A: OBIEE 11g is centred on WebLogic Server as the underlying application server architecture.

B: If you want to scale out this infrastructure, you would typically run the OBIEE 11g installer on a second server, and instead of choosing to do a new install, you'd choose to instead scale out the existing BI domain.

C: OBIEE Clustering - Approach of Oracle BI Server Load balancing/Failover

NEW QUESTION # 70

When creating a query. Subject areas can be combined via point and click as long as ____.

- A. two or more subject areas cannot be joined together without manually mapping the contents
- B. the subject areas both share the same model in the business model and mapping layer
- C. the subject areas are both from the same physical source, though they may be in separate business layers
- D. the subject areas share objects of the same name

Answer: B

Explanation:

Users in Oracle BI Answers can create queries that span multiple subject areas, as long as the subject areas correspond to the same business model.

NEW QUESTION # 71

If a customer is planning on building a data warehouse, how would you describe data warehousing to the customer?

- A. Data warehouses can only be based on multidimensional data modeling.
- B. Data warehouse projects are usually implemented within two weeks.
- C. Application based data warehouses can be bought off the shelf and used without any tweaking.
- **D. The data in the data warehouse describes events and statuses of business processes, products and services, goals and organizational units, and generally mirrors every aspect of the structure and behavior of the organization.**

Answer: D

Explanation:

Explanation/Reference:

A data warehouse is a database used for reporting and data analysis. It is a central repository of data which is created by integrating data from multiple disparate sources. Data warehouses store current as well as historical data and are commonly used for creating trending reports for senior management reporting such as annual and quarterly comparisons.

NEW QUESTION # 72

Identify the two true statements about alias tables.

- A. Alias tables are set up to create another physical copy of the data.
- **B. Alias tables are set up to include best practice naming conventions for physical table names.**
- C. Alias tables are set up to create a copy of the data with a filter applied to it.
- D. Alias tables are set up to avoid triangular or circular joins.

Answer: B

Explanation:

It is a best practice to create aliases for all tables. Aliases are created in the Physical Layer of the repository. Some of the benefits of using aliases are given below: (A) * An alias is used to avoid circular joins and to configure self joins.

*You can create a join relationship which is different than the actual foreign key relationship in the database. This helps in defining relationships to meet business model criteria.

*Aliases can function in numerous ways to define business model e.g. a table can act both as a dimension and a fact using aliases.

(B) * You can rename aliases to make physical and business model easier to understand.

NEW QUESTION # 73

Identify the three advantages of the BI Server metadata repository.

- **A. Three layers support the highest level of security**
- B. Ability to change physical sources without losing reports
- **C. Little changes in the physical layer to shift from development to production environment**
- **D. Mapping of federated data sources to one logical object**

Answer: A,C,D

Explanation:

Explanation

A: OBIEE Federated Repository

Instead of moving data in to a single database, OBIEE - BI Administration can access multiple databases and create a single federated repository. OBIEE BI Answer uses this federated repository and build the ad-hoc reports and dashboards.

D: Repository Metadata Consists of 3 Layers

* The Physical Layer (Schema)

* The Business Model and Mapping Layer

* The Presentation Layer

Note:

star schema

NEW QUESTION # 74

.....

If you have interests with our 1z0-591 practice materials, we prefer to tell that we have contacted with many former buyers of our 1z0-591 exam questions and they all talked about the importance of effective 1z0-591 practice material playing a crucial role in your preparation process. Our 1z0-591 practice materials keep exam candidates motivated and efficient with useful content based wholly on the real 1z0-591 guide materials. There are totally three versions of 1z0-591 practice materials which are the most suitable versions for you: pdf, software and app versions.
