The Oracle Business Intelligence Foundation Suite 11g Essentials 1z0-591 Certification enables you to move ahead in your career later.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q33-Q38):

NEW QUESTION # 33

A customer would like to create a change and a % Change for Revenue at the same time. How would they accomplish this?

- A. Using the Calculation Wizard
- B. Defining them in the physical data model
- C. Defining them in the Presentation Layer
- D. Using the Expression Builder

Answer: A

Explanation:

After creating your base metrics, try using the Calculation Wizard to automate the process of creating time-series metrics or comparison metrics such as: Change, Percent Change, Index, and Percent. The Wizard may save you many hours of time and frustration, especially if you have to create more than a handful of these metrics. In addition, the Wizard allows you to include customized logic to handle nulls in the base metrics. You may refer to the Oracle documentation for further detail.

NEW QUESTION # 34

Which task can be performed after the Administrator link has been reached through logging into OBIEE?

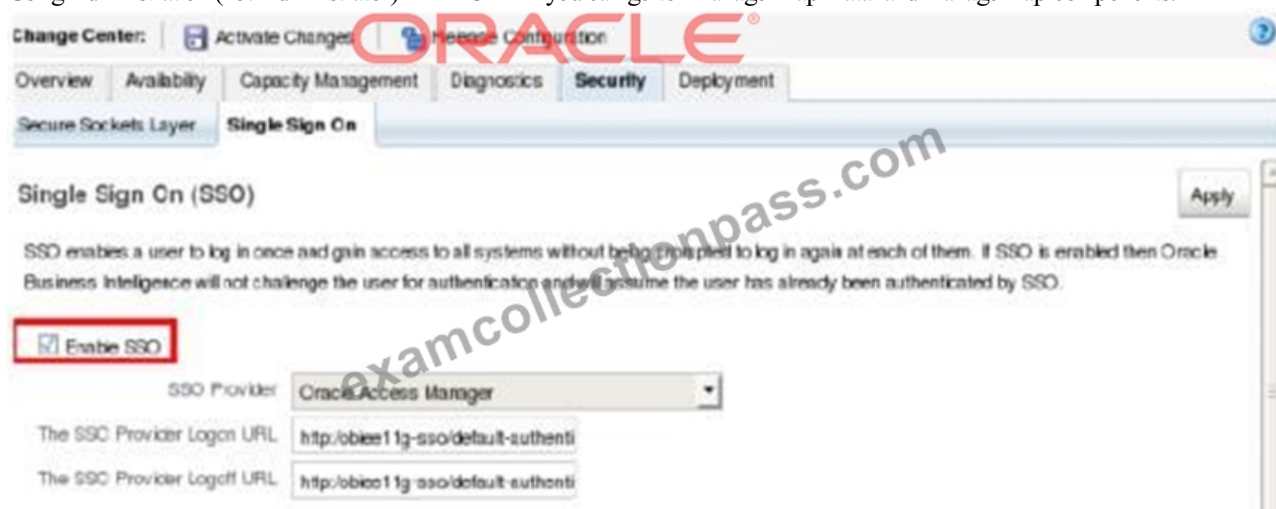

- A. Start or Stop BI Managed Servers
- B. SSO enablement
- C. Manage access to Subject Areas
- D. Associate map layers to columns

Answer: D

Explanation:

It is asking for Which task (NOT Which Tasks).

Using Administration (not Administrator) link in OBIEE you can go to 'Manage Map Data' and manage map components.

NEW QUESTION # 35

Which option is used to enter the rank function when creating a new rank measure?

- A. Web Catalog
- B. Expression Builder
- C. Connection Pool
- D. Initialization Block

Answer: B

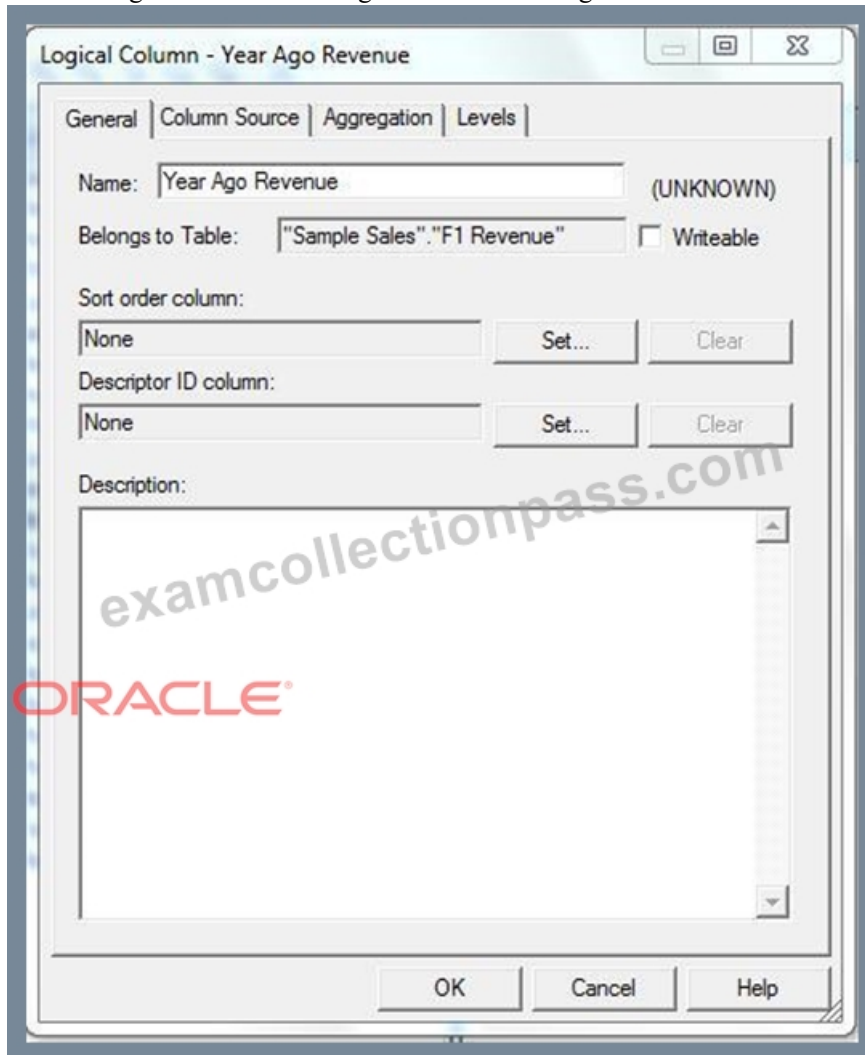

Explanation:

Example (see step 4 and 5 below): Getting Top-N Sales Reps for Year and Year-1

1. Under the "Business Model and Mapping" Layer, right click the "F1 Revenue" and select "New Object" ->

"Logical Column.."

2. In the "Logical Column" Window give for Name: Year Ago Revenue as seen below:

3. Goto the "Column Source" Tab and select "Derived from existing columns using an expression" radio button then click on the "Edit Expression" icon.

4. Enter the following expression in the "Expression Builder" Window by selecting "Functions" in the "Category:" list, "Time Series Functions" in the "Functions:" list then "Ago" "Time Series Functions:" section.

5. Select the "<<Measure>>" in the "Ago()" function, then select "Logical Tables" in the "Category:" list, "F1 Revenue" in the "Logical Tables:" list, then double click the "Revenue" in the "Columns:" list.

Etc.

NEW QUESTION # 36

Which are the three types of tables available to physical tables in the physical layer?

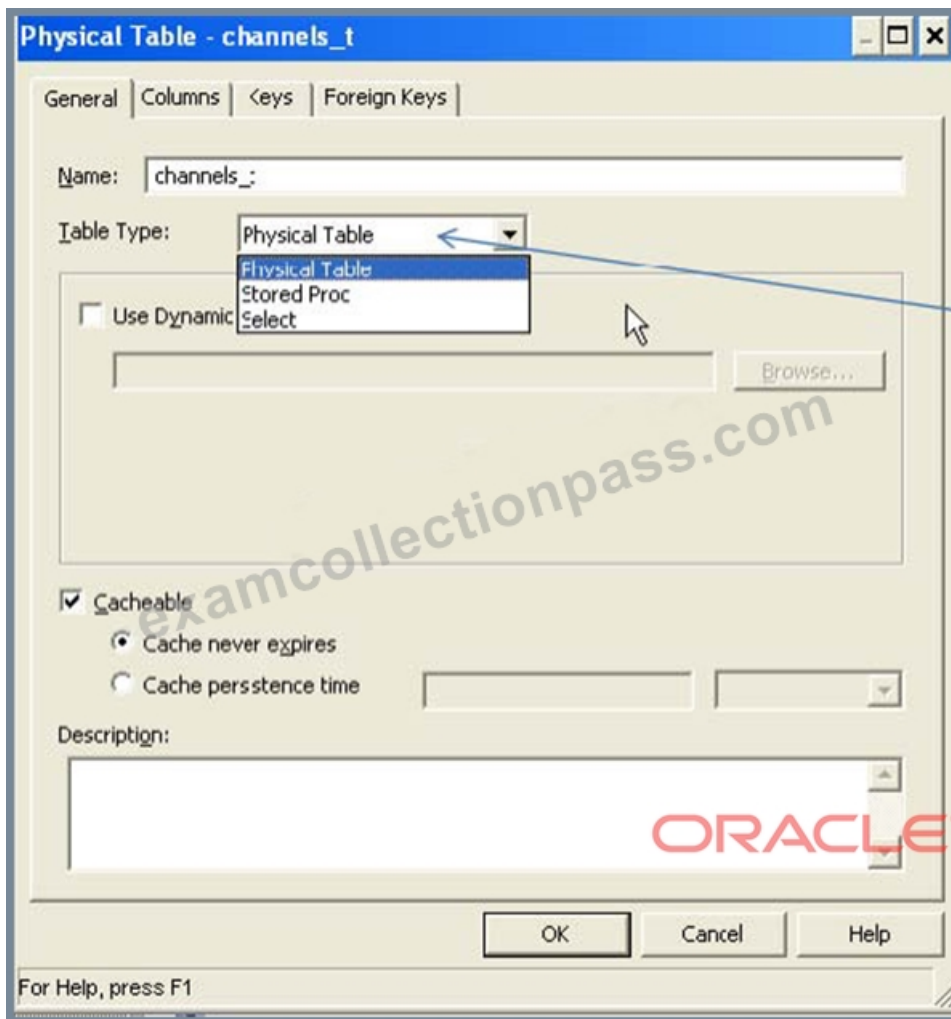

- A. Select
- B. Stored Proc
- C. View
- D. Table
- E. Physical Table

Answer: A,B,E

Explanation:

Pull the table and column definition into the physical layer Use the OBIEE "import metadata" wizard to pull the table and column definition into the physical layer. The wizard is used so that all of the column definitions do not need to be manually added into the physical layer.

Figure: Note: The physical layer is the layer of the Logical Business Model where you define the physical data model of your data source. It contains information about the physical data sources.

NEW QUESTION # 37

Under what circumstances would you model within the BI environment to include transactional data directly?

- A. When it is not possible to query against a transactional system
- B. When the customer is not prepared to spend budget on data-warehousing
- C. When the complexity of operational schema does not allow modeling in the BI repository
- D. When the customer needs near real-time data to support decision making in a fast changing environment

Answer: D

NEW QUESTION # 38

.....
