Almost every customer is satisfied with our 1Z0-770 Exam Guide. Come and have a try on our most popular 1Z0-770 training materials!

Oracle APEX Developer Professional Sample Questions (Q103-Q108):

NEW QUESTION # 103

Generally, clicking on the hamburger menu in the upper-left corner of an APEX application displays a list of pages. What is this navigation called?

- A. Lists
- **B. Navigation Menu**
- C. Breadcrumbs
- D. Navigation Bar List

Answer: B

Explanation:

Explanation

The navigation menu is the list of pages that displays when you click on the hamburger menu in the upper-left corner of an APEX application. The navigation menu is a shared component that can be created and edited in the Shared Components page3. Lists,

breadcrumbs, and navigation bar entries are other types of navigation components in APEX, but they are not the same as the navigation menu.

NEW QUESTION # 104

Choose the two statements that are TRUE about the Universal Theme in APEX.

- A. Easy customization
- B. Not designed to work on tablets
- C. Responsive UI
- D. The developers must have extensive knowledge about Javascript, CSS and HTML in order to use the Universal Theme.

Answer: A,C

Explanation:

Explanation

The Universal Theme is a responsive user interface design for Oracle APEX applications. It has the following features:

Responsive UI: The Universal Theme uses responsive design techniques to adapt to different screen sizes and orientations. It ensures that your applications look great and work well on any device, such as desktops, laptops, tablets, or smartphones.

Easy customization: The Universal Theme allows you to customize the appearance and behavior of your applications using various tools and options. You can use Theme Roller to change the colors, fonts, icons, and styles of your applications. You can also use Template Options to modify the layout and functionality of your components.

The other options are incorrect because:

Not designed to work on tablets: The Universal Theme is designed to work on tablets as well as other devices. It uses responsive design techniques to adapt to different screen sizes and orientations.

The developers must have extensive knowledge about Javascript, CSS and HTML in order to use the Universal Theme: The developers do not need to have extensive knowledge about Javascript, CSS and HTML in order to use the Universal Theme. They can use declarative tools such as Theme Roller and Template Options to customize their applications without coding.

NEW QUESTION # 105

Which statement is true about creating and using a report with form?

- A. The Create Application Wizard doesn't support the creation of an interactive report and form combination.
- B. Both the Create Application Wizard and Create Page Wizard support the creation of an interactive report or classic report and form combination.
- C. In the Create Application Wizard, you can select a data source (that is, Local Database, REST Enabled SQL Service, or REST Data Source).
- D. The Create Page Wizard doesn't support the creation of a classic report and form combination

Answer: B

Explanation:

Explanation

You can create a report with form in Oracle APEX by using either the Create Application Wizard or the Create Page Wizard. The report can be either an interactive report or a classic report, and the form can be either a single row form or a multi row form. The report with form combination enables you to view and edit data from a table or a query in a single page. You can also customize the report and form attributes, such as the columns, regions, buttons, validations, processes, and so on. Verified References: [Creating a Report Using the Create Page Wizard - Oracle], [Creating a Report with Form on Table - Oracle]

NEW QUESTION # 106

What are the two primary ways to move database objects and data from one environment to another, for a single application?

- A. SQL Workshop
- B. Oracle SQL Developer
- C. App Builder
- D. Page Designer

Answer: A,B

Explanation:

Explanation

Oracle SQL Developer and SQL Workshop are two primary ways to move database objects and data from one environment to another, for a single application. Oracle SQL Developer is a graphical tool that allows you to export and import data schemas using Data Pump or SQL scripts. SQL Workshop is a component of Oracle APEX that enables you to perform tasks such as exporting and importing data, running SQL commands, and generating DDL scripts. Both tools can help you migrate your database objects and data to a different instance or workspace. References: Using SQL Developer to Migrate Your Oracle Database and Using Data Workshop to Manage Data

NEW QUESTION # 107

What are the required fields while creating a Chart in APEX?

- A. Name
- B. Value Column
- C. Label Column
- D. All of them
- E. Data Source

Answer: D

Explanation:

Explanation

To create a chart in Oracle APEX, you need to provide some required fields that define the data source and appearance of the chart. You can use either the Create Page Wizard or Page Designer to create a chart. The required fields for creating a chart are: Data Source: This field specifies the SQL query that returns the data for the chart. The query must include at least one column for the label and one column for the value of each data point. You can also include additional columns for grouping, color, or tooltip information.

Value Column: This field specifies the column from the data source query that contains the numeric values for the chart. The values are used to plot the data points on the chart and determine the size of each data point or segment.

Name: This field specifies the name of the chart region. The name is used to identify the region in Page Designer and other components, such as dynamic actions or processes.

Label Column: This field specifies the column from the data source query that contains the labels for the chart. The labels are used to display the name of each data point or segment on the chart or in the legend.

NEW QUESTION # 108
