## 100% Pass Oracle - 1Z0-771 - Oracle APEX Cloud Developer Professional – The Best Exam Book

Passing an exam requires diligent practice, and using the right study Oracle Certification Exams material is crucial for optimal performance. With this in mind, Exams-boost has introduced a range of innovative 1Z0-771 practice test formats to help candidates prepare for their 1Z0-771. The platform offers three distinct formats, including a desktop-based Oracle 1Z0-771 practice test software, a web-based practice test, and a convenient PDF format.

## Oracle APEX Cloud Developer Professional Sample Questions (Q13-Q18):

### NEW QUESTION # 13

You must create a single master detail page where users can select a row in the master region and see the corresponding details in the detail region. Users must also interact with the master or the detail without leaving the page. Which type of master detail implementation should you use?

- A. Drill Down
- B. Stacked
- C. Side by Side

**Answer: C**

Explanation:

Master-detail pages in APEX link a master dataset (e.g., list of orders) to its details (e.g., order items). The requirements demand:

C . Side by Side: This layout places the master region (e.g., an Interactive Report) and detail region (e.g., a Form or Grid)

horizontally on the same page. Selecting a master row updates the detail region via AJAX, allowing interaction with both regions without navigation. It's ideal for workflows needing simultaneous visibility (e.g., editing details while browsing masters).

A . Drill Down: Master links to a separate detail page, requiring navigation, which violates the "without leaving the page" condition.

B . Stacked: Master and detail are vertically stacked, but interaction is less fluid than side-by-side due to scrolling, though still on one page. Side-by-side is preferred for its clarity and accessibility.

Pitfall: Ensure the detail region's "Server-side Condition" uses the master's selected key (e.g., P1\_ID).

### NEW QUESTION # 14

What happens when you regenerate credentials for Push Notifications in Oracle APEX?

- A. Push Notifications will be disabled for the application.
- B. Existing Push Subscriptions for the application will be invalidated.
- C. A new notification server must be created.

**Answer: B**

Explanation:

Regenerating Push Notification credentials updates the VAPID keys (public/private pair) in the PWA settings:

A . Existing Push Subscriptions invalidated: Subscriptions (in APEX\_APPL\_PUSH\_SUBSCRIPTIONS) are tied to the old keys.

New keys break this link, requiring users to re-subscribe (e.g., via browser prompts), as the push service (e.g., Firebase) can't authenticate old subscriptions.

B . New notification server: False; the server configuration remains; only credentials change.

C . Disabled for the app: False; notifications remain enabled but won't work for old subscriptions until re-established.

Technical Insight: Regeneration updates APEX\_PWA\_VAPID\_PUBLIC\_KEY and APEX\_PWA\_VAPID\_PRIVATE\_KEY, triggering a subscription refresh cycle.

Use Case: Security breach requires key rotation.

Pitfall: Users must re-opt-in, potentially losing some subscribers.

### NEW QUESTION # 15

Which two tasks can be performed by using the Generate Text with AI Dynamic Action?

- A. Draft an email
- B. Summarize or translate text
- C. Invoke a Workflow
- D. Update the underlying database tables

**Answer: A,B**

Explanation:

The "Generate Text with AI" Dynamic Action uses Generative AI to:

Draft an email: Creates text content like emails based on prompts.

Summarize or translate text: Processes existing text to summarize or translate it.

It does not update database tables or invoke workflows, as it's focused on text generation.

### NEW QUESTION # 16

What do you achieve by performing the "Refresh Working Copy" task?

- A. Update the changes from one Working Copy to another.
- B. Merge the Working Copy changes with the Main application.
- C. Get the latest updates from the Main application.

**Answer: C**

Explanation:

Working Copies in APEX allow safe experimentation:

C . Get the latest updates from the Main application: "Refresh Working Copy" (in App Builder > Working Copies) pulls changes from the Main application into the Working Copy, ensuring it reflects the latest state (e.g., new pages, fixes) without overwriting Working Copy changes.

A . Merge with Main: Merging is a separate "Merge Working Copy" task.

B . Update between Working Copies: Not supported; refreshing is Main-to-Working only.

Practical note: Use this to sync collaborative development efforts.

### NEW QUESTION # 17

You have an Interactive Grid component and you are enabling the Save Report functionality. As what can end users save the report type?

- A. As Private and Primary only
- B. As Private and Public only
- C. As Primary

**Answer: B**

Explanation:

In an Interactive Grid, the "Save Report" functionality allows end users to save customizations (e.g., filters, column order). The available options are:

Private: Saved for the individual user only, visible only to them.

Public: Saved and shared with all users of the application, if permitted by the developer.

Primary: This is a developer-defined default report, not an end-user save option. End users cannot overwrite the Primary report; they can only save as Private or Public (if enabled via the "Allow Public Reports" attribute).

This flexibility empowers users to personalize grids while allowing shared configurations, enhancing collaboration and usability.

### NEW QUESTION # 18

.....

As we all know, sometimes the right choice can avoid the waste of time, getting twice the result with half the effort. Especially for 1Z0-771 study materials, only by finding the right ones can you reduce the pressure and help yourself to succeed. If you haven't found the right materials yet, please don't worry. Maybe our 1Z0-771 Study Materials can give you a leg up which is our company's flagship product designed for the 1Z0-771 exam.
