

# 1Z0-771: Exam Oracle APEX Cloud Developer Professional Simulator Fee - Free PDF Quiz 2025 Unparalleled 1Z0-771

What's more, part of that DumpsQuestion 1Z0-771 dumps now are free: <https://drive.google.com/open?id=1ovt-wMMsyi-ra0GTWHVACJv8JH7Ly0ZX>

Our company is widely acclaimed in the industry, and our 1Z0-771 study materials have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the 1Z0-771 study materials, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our 1Z0-771 Study Materials are devoted to research on which methods are used to enable users to pass the test faster.

## Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li></ul>

Topic 7	<ul style="list-style-type: none"> <li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li> </ul>

## Use Oracle 1Z0-771 Exam Questions [2025]-Forget About Failure

Professional guidance is indispensable for a candidate. As a leader in the field, our 1Z0-771 learning prep has owned more than ten years' development experience. Thousands of candidates have become excellent talents after obtaining the 1Z0-771 certificate. If you want to survive in the exam, our 1Z0-771 actual test guide is the best selection. Firstly, our study materials can aid you study, review and improvement of all the knowledge. In addition, you do not need to purchase other reference books. Our 1Z0-771 Exam Questions are able to solve all your problems of preparing the exam. Of course, our study materials are able to shorten your learning time. You will have more spare time to do other things. And we can ensure you to pass the 1Z0-771 exam.

## Oracle APEX Cloud Developer Professional Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Which three statements are true about Data Workshops in Oracle APEX?

- A. You can load or unload multiple tables at a time.
- B. You can load data into a new or existing table.
- C. You can load or unload a single table at a time.
- D. You can unload data from a new or existing table.

**Answer: B,C,D**

Explanation:

Data Workshop in SQL Workshop is a powerful tool for importing/exporting table data:

B . You can load or unload a single table at a time: The wizard focuses on one table per operation. For loading, you upload a file (e.g., CSV) and map it to a single table; for unloading, you select one table to export (e.g., EMP to CSV). This granularity ensures precision and simplicity.

C . You can unload data from a new or existing table: Unloading (exporting) works on any table in the schema, whether newly created (e.g., via Quick SQL) or pre-existing (e.g., DEPT). The "Unload" option generates a file (e.g., CSV, JSON) from the table's data.

D . You can load data into a new or existing table: Loading supports creating a new table from the uploaded file (e.g., CSV defines NEW\_EMP) or appending/overwriting an existing one (e.g., EMP). The wizard prompts for table creation or selection.

A . You can load or unload multiple tables at a time: False; Data Workshop processes one table per wizard run. Multiple tables require separate operations or custom SQL scripts.

Technical Insight: Loading uses APEX\_DATA\_LOADING internally, parsing files into rows, while unloading leverages APEX\_DATA\_EXPORT. For example, uploading emp.csv with "Create New Table" generates a table with inferred columns.

Use Case: Migrating EMP data from a legacy system (CSV) into APEX, then exporting it later for analysis.

Pitfall: Multi-table operations need SQL Scripts or external tools like SQL Developer.

### NEW QUESTION # 15

Which two tasks can be performed by using the Generate Text with AI Dynamic Action?

- A. Summarize or translate text
- B. Invoke a Workflow
- C. Draft an email
- D. Update the underlying database tables

**Answer: A,C**

Explanation:

The "Generate Text with AI" Dynamic Action uses Generative AI to:

Draft an email: Creates text content like emails based on prompts.

Summarize or translate text: Processes existing text to summarize or translate it.

It does not update database tables or invoke workflows, as it's focused on text generation.

### NEW QUESTION # 16

Which client credentials are used for authentication during the 'Check Syntax' process?

- A. APEX Workspace Admin credentials
- B. APEX Developer credentials
- C. Database schema credentials

**Answer: C**

Explanation:

The "Check Syntax" process in APEX, typically used in SQL Workshop or when validating code, authenticates using Database schema credentials. These are the credentials of the schema associated with the APEX workspace (e.g., username/password of the schema like "HR"). This ensures the process has access to parse and validate SQL or PL/SQL against the database objects in that schema.

APEX Workspace Admin credentials: These are for managing workspaces, not executing database-level syntax checks.

APEX Developer credentials: These authenticate developers into the APEX IDE, not the database runtime environment.

This design aligns with APEX's security model, where database operations are tied to the schema, ensuring accurate validation and error reporting (e.g., missing privileges or invalid objects).

### NEW QUESTION # 17

What happens when you regenerate credentials for Push Notifications in Oracle APEX?

- A. Push Notifications will be disabled for the application.
- **B. Existing Push Subscriptions for the application will be invalidated.**
- C. A new notification server must be created.

**Answer: B**

Explanation:

Regenerating Push Notification credentials updates the VAPID keys (public/private pair) in the PWA settings:

A . Existing Push Subscriptions invalidated: Subscriptions (in APEX\_APPL\_PUSH\_SUBSCRIPTIONS) are tied to the old keys. New keys break this link, requiring users to re-subscribe (e.g., via browser prompts), as the push service (e.g., Firebase) can't authenticate old subscriptions.

B . New notification server: False; the server configuration remains; only credentials change.

C . Disabled for the app: False; notifications remain enabled but won't work for old subscriptions until re-established.

Technical Insight: Regeneration updates APEX\_PWA\_VAPID\_PUBLIC\_KEY and APEX\_PWA\_VAPID\_PRIVATE\_KEY, triggering a subscription refresh cycle.

Use Case: Security breach requires key rotation.

Pitfall: Users must re-opt-in, potentially losing some subscribers.

### NEW QUESTION # 18

Which two approaches can be used to create custom stored procedures in SQL Workshop?

- **A. Using Object Browser**
- B. Using Quick SQL
- C. Using Data Workshop
- **D. Using SQL Scripts**

**Answer: A,D**

Explanation:

In SQL Workshop, custom stored procedures can be created using:

SQL Scripts: Allows developers to write and execute PL/SQL code directly to define stored procedures.

Object Browser: Provides a GUI to create and edit database objects, including stored procedures, by defining their specifications and bodies.

Quick SQL is for generating table DDL, not stored procedures, and Data Workshop is for loading/unloading data, not creating procedures.

### NEW QUESTION # 19

.....

I would like to bring to your kind attention that our latest Oracle 1Z0-771 study guide is produced. These exam materials are high passing rate. We are sure that 1Z0-771 study guide will be the best assist for your coming exam. We guarantee "No Pass Full Refund". If you feel depressed about your past failure and eager to look for Valid 1Z0-771 Study Guide, I advise you to reply to our exam materials as 100% passing without any doubt. Thousands of candidates' choice for our 1Z0-771 study guide will be your wise decision.
