In dieser dynamischen Welt lohnt sich, etwas für berufliche Weiterentwicklung zu tun. Angesichts des Fachkräftemangels in vielen Branchen haben Sie mit einer Oracle 1Z0-771 (Oracle APEX Cloud Developer Professional) Zertifizierung mehr Kontrolle über Ihren eigenen Werdegang und damit bessere Aufstiegschancen.

Oracle 1Z0-771 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Thema 2	Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Thema 3	Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Thema 4	Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Thema 5	Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Thema 6	Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.

Thema 7	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Thema 8	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Thema 9	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Thema 10	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Thema 11	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Thema 12	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Thema 13	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Thema 14	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.

Kostenlos 1Z0-771 Dumps Torrent & 1Z0-771 exams4sure pdf & Oracle 1Z0-771 pdf vce

Die Konkurrenz in der IT-Branche wird immer heftiger. Wie können Sie sich beweisen, dass Sie wichtig und unerlässlich ist? Die Zertifizierung der Oracle 1Z0-771 zu erwerben macht es überzeugend. Was wir für Sie tun können ist, dass Ihnen helfen, die Oracle 1Z0-771 Prüfung mit höhere Effizienz und weniger Mühen zu bestehen. Mit langjährigen Entwicklung besitzt jetzt ITZert große Menge von Ressourcen und Erfahrungen. Immer verbesserte Software gibt Ihnen bessere Vorbereitungsphase der Oracle 1Z0-771 Prüfung.

Oracle APEX Cloud Developer Professional 1Z0-771 Prüfungsfragen mit Lösungen (Q21-Q26):

21. Frage

Which two approaches can be used to create custom stored procedures in SQL Workshop?

- A. Using Object Browser
- B. Using SQL Scripts
- C. Using Quick SQL
- D. Using Data Workshop

Antwort: A,B

Begründung:

In SQL Workshop, custom stored procedures can be created using:

SQL Scripts: Allows developers to write and execute PL/SQL code directly to define stored procedures.

Object Browser: Provides a GUI to create and edit database objects, including stored procedures, by defining their specifications and bodies.

Quick SQL is for generating table DDL, not stored procedures, and Data Workshop is for loading/unloading data, not creating procedures.

22. Frage

You must create a single master detail page where users can select a row in the master region and see the corresponding details in the detail region. Users must also interact with the master or the detail without leaving the page. Which type of master detail implementation should you use?

- A. Side by Side
- B. Drill Down
- C. Stacked

Antwort: A

Begründung:

Master-detail pages in APEX link a master dataset (e.g., list of orders) to its details (e.g., order items). The requirements demand: C . Side by Side: This layout places the master region (e.g., an Interactive Report) and detail region (e.g., a Form or Grid) horizontally on the same page. Selecting a master row updates the detail region via AJAX, allowing interaction with both regions without navigation. It's ideal for workflows needing simultaneous visibility (e.g., editing details while browsing masters).

A . Drill Down: Master links to a separate detail page, requiring navigation, which violates the "without leaving the page" condition.

B . Stacked: Master and detail are vertically stacked, but interaction is less fluid than side-by-side due to scrolling, though still on one page. Side-by-side is preferred for its clarity and accessibility.

Pitfall: Ensure the detail region's "Server-side Condition" uses the master's selected key (e.g., P1_ID).

23. Frage

Which API can be used to send Push Notifications immediately in Oracle APEX?

- A. APEX_PWA.PURGE_QUEUE
- B. APEX_PWA.PUSH_QUEUE
- C. APEX_PWA.HAS_PUSH_SUBSCRIPTION

Antwort: B

Begründung:

The APEX_PWA package manages Push Notifications:

B . APEX_PWA.PUSH_QUEUE: This procedure forces immediate processing of the Push Notification queue, sending queued messages (added via APEX_PWA.SEND) to subscribed devices without waiting for the default scheduler (e.g., every 5 minutes).

Example: APEX_PWA.PUSH_QUEUE; ensures a "Meeting now!" alert goes out instantly.

A . APEX_PWA.HAS_PUSH_SUBSCRIPTION: Checks if a user has an active subscription (returns BOOLEAN), not for sending.

C . APEX_PWA.PURGE_QUEUE: Clears the queue, discarding unsent messages, not sending them.

Technical Insight: PUSH_QUEUE triggers a job to contact the push service (e.g., Firebase), using VAPID keys from the PWA configuration.

Use Case: Urgent alerts (e.g., system outage) need immediate delivery, bypassing delays.

Pitfall: Overuse can strain the server; use judiciously for time-sensitive messages.

24. Frage

There is a validation of type Item is Numeric on the P1_SALARY item. When the page is submitted, this error message is displayed both as a notification and inline with the item. What will cause the validation error to appear only in the Notification area?

- A. Removing P1_SALARY from the validation Associated Item.
- B. Setting Value Required to Yes on P1_SALARY.

- C. Setting Display Location to Inline in Notification

Antwort: C

Begründung:

Validation errors in APEX default to both inline (next to the item) and notification (top of page):

C . Setting Display Location to Inline in Notification: In the validation's properties, changing "Display Location" to "Inline in Notification" ensures the error appears only in the notification area, suppressing inline display. This centralizes feedback for a cleaner UI.

A . Removing Associated Item: Breaks the validation's link to P1_SALARY, stopping it entirely.

B . Value Required: Adds a separate check, unrelated to display location.

Pitfall: Test with non-numeric input (e.g., "abc") to confirm behavior.

25. Frage

Which is a valid method of logging messages to the execution log in APEX applications?

- A. `apex_error.add_error('SAL for ' || :ENAME || ' increased by 19.');`
- B. `apex_automation.log_info('SAL for ' || :ENAME || ' increased by 19.');`
- C. `apex_debug.info('SAL for :ENAME || ' increased by 19.');`

Antwort: B

Begründung:

Logging in APEX tracks runtime activity:

A . `apex_automation.log_info`: Correctly logs an informational message to the execution log for automation tasks (e.g., workflows). The syntax `|| :ENAME ||` concatenates the item value (e.g., "JOHN") into "SAL for JOHN increased by 19." It's stored in `APEX_AUTOMATION_LOG`, viewable in Monitoring.

B . `apex_debug.info`: Logs to debug output, but the syntax is flawed (`:ENAME ||` isn't concatenated properly; should be `'SAL for ' || :ENAME || ...`). It's valid only when debugging is enabled (e.g., `APEX_DEBUG.ENABLE`).

C . `apex_error.add_error`: Adds an error to the error stack for user display, not a log message.

Technical Insight: `log_info` is non-intrusive, unlike `apex_debug`, which requires debug mode, or `apex_error`, which signals failure.

Use Case: Logging salary updates in a scheduled job without debug overhead.

Pitfall: Ensure `:ENAME` is in scope (e.g., page item).

26. Frage

.....

Unsere Schulungsunterlagen können Ihre Kenntnisse vor der Oracle 1Z0-771 Prüfung testen und auch Ihr Verhalten in einer bestimmten Zeit bewerten. Wir geben Ihnen Anleitung zu Ihrer Note und Schwachpunkt, so dass Sie Ihre Schwäche nachholen können. Die Lernhilfe zur Oracle 1Z0-771 Zertifizierungsprüfung von ITZert stellen Ihnen unterschiedliche logische Themen vor. So können Sie nicht nur lernen, sondern auch andere Techniken und Subjekte kennen lernen. Wir versprechen, dass unsere Oracle 1Z0-771 Schulungsunterlagen von der Praxis bewährt werden. ITZert hat genügende Vorbereitung für Ihre Prüfung getroffen. Unsere Fragen sind umfassend und der Preis ist rational.
