

1Z0-771 PrüfungGuide, Oracle 1Z0-771 Zertifikat - Oracle APEX Cloud Developer Professional

PrüfungFrage setzt sich aus den riesigen IT-Eliteteams zusammen. Sie alle haben hohe Autorität im IT-Bereich. Sie nutzen professionelle Kenntnisse und Erfahrungen aus, um den an den Oracle 1Z0-771 Zertifizierungsprüfungen beteiligten Kandidaten die Prüfungsunterlagen zu bieten. Die Genauigkeit von Oracle 1Z0-771 Fragen Und Antworten aus PrüfungFrage ist sehr hoch. Wir versprechen, dass Sie die Prüfung beim ersten Versuch 100% bestehen können. Außerdem stehen wir Ihnen einen einjährigen Update-Service zur Verfügung.

Viele der PrüfungFrage 1Z0-771 Oracle APEX Cloud Developer Professional Prüfungsvorbereitung Antworten sind in Vielfache-Wahl-Fragen (MCQs) FormatQualität geprüften Oracle APEX Cloud Developer Professional Produkte viele Male vor der VeröffentlichungKostenlose Demo der Prüfung PrüfungFrage 1Z0-771 an PrüfungFrage. Um Ihre Zertifizierungsprüfungen reibungslos erfolgreich zu meistern brauchen Sie nur unsere Prüfungsfragen und Antworten zu Oracle 1Z0-771 (Oracle APEX Cloud Developer Professional) auswendigzulernen.

Oracle 1Z0-771 Quiz - 1Z0-771 Studienanleitung & 1Z0-771 Trainingsmaterialien

Um Sie beim Kauf der Oracle 1Z0-771 Prüfungssoftware beruhigt zu lassen, wenden wir die gesicherteste Zahlungsmittel an. Paypal ist das größte internationale Zahlungssystem. Und wir bewahren sorgfältig Ihre persönliche Informationen. Wenn Sie Fragen über die Oracle 1Z0-771 Prüfungsunterlagen oder Interesse an anderen Prüfungssoftwares haben, könnten Sie direkt mit uns online kontaktieren oder uns E-Mail schicken. Wir tun unser Bestes, um Ihnen bei der Oracle 1Z0-771 Prüfung zu helfen.

Oracle 1Z0-771 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Thema 2	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Thema 3	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.

Thema 4	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Thema 5	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Thema 6	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Thema 7	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Thema 8	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Thema 9	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Thema 10	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Thema 11	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Thema 12	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Thema 13	• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.

Oracle APEX Cloud Developer Professional 1Z0-771 Prüfungsfragen mit Lösungen (Q23-Q28):

23. Frage

Which Process type do you use to run multiple processes in the background in APEX?

- **A. Execution Chain**
- B. Execute Server-side Code
- C. Execute JavaScript Code
- D. Execute Code

Antwort: A

Begründung:

To run multiple processes in the background:

D. Execution Chain: This process type allows chaining multiple processes (e.g., PL/SQL, REST calls) to execute sequentially or

conditionally in the background, managed via the Process Chain framework. It's ideal for complex, asynchronous tasks (e.g., batch updates).

A . Execute Code: Not a process type in APEX; likely a misnomer.

B . Execute Server-side Code: Runs a single PL/SQL block synchronously, not multiple background tasks.

C . Execute JavaScript Code: Client-side, not suited for background server processes.

Use case: Chain processes like data validation, logging, and email sending without blocking the UI.

24. Frage

Which two statements are true about Oracle APEX?

- A. Application definition is not stored in the database.
- **B. You can build interactive reporting apps based on data from disparate systems.**
- C. Running an APEX app needs client software.
- **D. APEX eliminates middle tier application logic.**

Antwort: B,D

Begründung:

Key truths about Oracle APEX:

APEX eliminates middle tier application logic: APEX runs entirely within the Oracle Database, using PL/SQL and SQL for logic, bypassing traditional middle-tier servers (e.g., Java EE). This simplifies architecture and boosts performance.

You can build interactive reporting apps based on data from disparate systems: Via REST Data Sources, database links, or ORDS, APEX integrates data from external systems, enabling unified reporting (e.g., combining on-premises and cloud data).

Needs client software: False; APEX is web-based, requiring only a browser.

Application definition not stored in database: False; definitions are stored as metadata in the database (e.g., APEX_APPLICATIONS).

This reflects APEX's database-centric, low-code philosophy.

25. Frage

You have an Interactive Grid component and you are enabling the Save Report functionality. As what can end users save the report type?

- **A. As Private and Public only**
- B. As Private and Primary only
- C. As Primary

Antwort: A

Begründung:

In an Interactive Grid, the "Save Report" functionality allows end users to save customizations (e.g., filters, column order). The available options are:

Private: Saved for the individual user only, visible only to them.

Public: Saved and shared with all users of the application, if permitted by the developer.

Primary: This is a developer-defined default report, not an end-user save option. End users cannot overwrite the Primary report; they can only save as Private or Public (if enabled via the "Allow Public Reports" attribute).

This flexibility empowers users to personalize grids while allowing shared configurations, enhancing collaboration and usability.

26. Frage

What do you achieve by performing the "Refresh Working Copy" task?

- **A. Get the latest updates from the Main application.**
- B. Update the changes from one Working Copy to another.
- C. Merge the Working Copy changes with the Main application.

Antwort: A

Begründung:

Working Copies in APEX allow safe experimentation:

C . Get the latest updates from the Main application: "Refresh Working Copy" (in App Builder > Working Copies) pulls changes from the Main application into the Working Copy, ensuring it reflects the latest state (e.g., new pages, fixes) without overwriting Working Copy changes.

A . Merge with Main: Merging is a separate "Merge Working Copy" task.

B . Update between Working Copies: Not supported; refreshing is Main-to-Working only.

Practical note: Use this to sync collaborative development efforts.

27. Frage

Which statement is true about Theme Styles?

- A. Theme Styles control the layout of a webpage.
- **B. When the Is Public attribute is enabled, end users can choose the Theme Style from the runtime environment.**
- C. The "Is Current" attribute of a Theme Style depends on the "Read Only" attribute.

Antwort: B

Begründung:

Theme Styles define visual themes in APEX:

A . When the Is Public attribute is enabled: Setting "Is Public" to "Yes" in Shared Components > Theme Styles allows runtime selection (e.g., via a dropdown in the app UI), letting users switch between styles (e.g., "Vita" to "Vita - Dark").

B . Control layout: False; layout is managed by templates and regions; Theme Styles handle colors, fonts, etc.

C . "Is Current" depends on "Read Only": False; "Is Current" marks the default style, independent of "Read Only" (which locks editing).

Technical Insight: Public styles require multiple defined styles and a UI component (e.g., Dynamic Action) to expose the switcher.

Use Case: Offering light/dark mode options to users.

Pitfall: Without a switcher, "Is Public" has no visible effect.

28. Frage

.....

PrüfungFrage ist eine Website, die kurze aber effiziente Ausbildung zur Oracle 1Z0-771 Zertifizierungsprüfung bietet. Die Oracle 1Z0-771 Zertifizierungsprüfung kann Ihr Leben verändern. Die IT-Fachleute mit Oracle 1Z0-771 Zertifikat haben höheres Gehalt, bessere Beförderungsmöglichkeiten und bessere Berufsaussichten in der IT-Branche.
