1Z0-771 Test King - 1Z0-771 Reliable Test Practice

We all have the right to pursue happiness. Also, we have the chance to generate a golden bowl for ourselves. Now, our 1Z0-771 practice materials can help you achieve your goals. As we all know, the pace of life is quickly in the modern society. So we must squeeze time to learn and become better. With the 1Z0-771 Certification, your life will be changed thoroughly for you may find better jobs and gain higher incomes to lead a better life style. And our 1Z0-771 exam questions will be your best assistant.

If you come to our website to choose our 1Z0-771 real exam, you will enjoy humanized service. Firstly, we have chat windows to wipe out your doubts about our 1Z0-771 exam materials. You can ask any question about our study materials. All of our online workers are going through special training. They are familiar with all details of our 1Z0-771 Practice Guide. If you have any question, you can ask them for help and our services are happy to give you guide on the 1Z0-771 learning quiz.

Here is the Effortless Method to Pass the Oracle 1Z0-771 Exam

ITPassLeader is a reliable platform to provide candidates with effective 1Z0-771 study braindumps that have been praised by all users. For find a better job, so many candidate study hard to prepare the 1Z0-771 exam. It is not an easy thing for most people to pass the 1Z0-771 exam, therefore, our website can provide you with efficient and convenience learning platform, so that you can obtain the 1Z0-771 certificate as possible in the shortest time. Just study with our 1Z0-771 exam questions for 20 to 30 hours, and then you will be able to pass the 1Z0-771 exam with confidence.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 2	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 3	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 4	• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.

Topic 5	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 6	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 7	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 8	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 9	• Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Topic 10	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 11	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 12	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 13	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 14	• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 15	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.

Oracle APEX Cloud Developer Professional Sample Questions (Q24-Q29):

NEW QUESTION # 24

An application includes a form on the EMPLOYEES table. You must limit the P1_MANAGER page item so users can select a single employee name and ID from the corresponding manager ID in the same table. Which item type can be used to display P1_MANAGER?

- A. Switch
- B. Checkbox
- C. Popup LOV

Answer: C

Explanation:
The requirement is to allow users to pick a single employee (name and ID) from a list tied to the MANAGER_ID column in the EMPLOYEES table, implying a dynamic, searchable selection:
A . Popup LOV: This item type displays a popup window with a searchable list of values, sourced from a SQL query (e.g., SELECT ename, empno FROM employees WHERE empno IN (SELECT DISTINCT manager_id FROM employees)). It returns a single value (e.g., EMPNO) while displaying the name, perfectly meeting the need for a single selection from a related dataset.
B . Switch: A toggle (Yes/No), unsuitable for selecting from a list of employees.
C . Checkbox: Allows multiple selections, conflicting with the "single employee" requirement.
Practical note: Popup LOVs enhance usability with filtering and pagination, ideal for large employee lists, and support returning the ID while showing the name.

NEW QUESTION # 25
Which API can be used to send Push Notifications immediately in Oracle APEX?

- A. APEX_PWA.PURGE_QUEUE
- B. APEX_PWA.HAS_PUSH_SUBSCRIPTION
- C. APEX_PWA.PUSH_QUEUE

Answer: C

Explanation:
The APEX_PWA package manages Push Notifications:
B . APEX_PWA.PUSH_QUEUE: This procedure forces immediate processing of the Push Notification queue, sending queued messages (added via APEX_PWA.SEND) to subscribed devices without waiting for the default scheduler (e.g., every 5 minutes).
Example: APEX_PWA.PUSH_QUEUE; ensures a "Meeting now!" alert goes out instantly.
A . APEX_PWA.HAS_PUSH_SUBSCRIPTION: Checks if a user has an active subscription (returns BOOLEAN), not for sending.
C . APEX_PWA.PURGE_QUEUE: Clears the queue, discarding unsent messages, not sending them.
Technical Insight: PUSH_QUEUE triggers a job to contact the push service (e.g., Firebase), using VAPID keys from the PWA configuration.
Use Case: Urgent alerts (e.g., system outage) need immediate delivery, bypassing delays.
Pitfall: Overuse can strain the server; use judiciously for time-sensitive messages.

NEW QUESTION # 26
You created a custom theme for an application. Examine these requirements: (Assuming requirements mandate syncing changes). Which solution guarantees that any changes to the master theme are reflected in the copied theme?

- A. Verifying the theme subscription.
- B. Subscribing the copied theme to the master theme and refreshing the theme.
- C. Copying the changes made in the master theme to the copied theme.
- D. Refreshing the templates.

Answer: B

Explanation:
Theme subscription links a copied theme to its master:
A . Subscribing and refreshing: Subscribing the copied theme (in Shared Components > Themes) to the master ensures it inherits updates. "Refresh Theme" (via Theme Roller or Utilities) syncs changes (e.g., CSS, templates) from the master, guaranteeing consistency.
B . Refreshing templates: Only updates individual templates, not the entire theme.
C . Copying changes: Manual, error-prone, and not guaranteed.
D . Verifying subscription: Confirms the link but doesn't sync changes.
Use case: Ideal for maintaining branded consistency across apps.

NEW QUESTION # 27

Which two SQL format options does the APEX Assistant provide when using the "Create Data Model using AI" feature?

- A. Oracle PL/SQL
- B. Quick SQL
- C. Oracle SQL
- D. MySQL

Answer: B,C

Explanation:
The "Create Data Model using AI" feature in APEX Assistant leverages AI to generate data models based on natural language input.
The supported SQL format options are:
Quick SQL: A shorthand syntax for defining database objects, which APEX can convert into full DDL.
Oracle SQL: Standard SQL syntax compatible with Oracle Database for creating tables and other objects.
MySQL is not supported as it's specific to a different database system, and Oracle PL/SQL is a procedural language, not a format for defining data models in this context.

NEW QUESTION # 28
Which three data types are supported by Oracle APEX Workflow parameters and item types?

- A. Image
- B. NUMBER
- C. CLOB
- D. VARCHAR

Answer: B,C,D

Explanation:
Workflow parameters and page items in APEX support:
B . NUMBER: For numeric values (e.g., 123.45), used in calculations or IDs.
C . CLOB: For large text (e.g., descriptions), stored as character large objects.
D . VARCHAR: For variable-length strings (e.g., EMPLOYEE_NAME), capped at 4000 characters in most cases.
A . Image: Not a supported data type for parameters or items; images are handled as BLOBs or file uploads, not directly as a Workflow parameter type.
These types align with Oracle Database, ensuring robust data handling in workflows.

NEW QUESTION # 29
......

Nowadays the competition in the society is fiercer and if you don't have a specialty you can't occupy an advantageous position in the competition and may be weeded out. Passing the test 1Z0-771 certification can help you be competent in some area and gain the competition advantages in the labor market. If you buy our 1Z0-771 Study Materials you will pass the 1Z0-771 test smoothly. Our product boosts many advantages and it is your best choice to prepare for the test. Our 1Z0-771 learning prep is compiled by our first-rate expert team and linked closely with the real exam.
