

# 1Z0-931-25 Training Courses, 1Z0-931-25 Reliable Test Dumps

If you want to buy Oracle 1Z0-931-25 exam information, DumpsKing will provide the best service and the best quality products. Our exam questions have been authorized by the manufacturers and third-party. And has a large number of IT industry professionals and technology experts, based on customer demand, according to the the outline developed a range of products to meet customer needs. Oracle 1Z0-931-25 Exam Certification with the highest standards of professional and technical information, as the knowledge of experts and scholars to study and research purposes. All of the products we provide have a part of the free trial before you buy to ensure that you fit with this set of data.

## Oracle 1Z0-931-25 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"><li>Autonomous Database Tools: This section of the exam measures the skills of Data Analysts and covers the tools available within Autonomous Databases for advanced data processing and analytics. It includes Oracle Machine Learning, APEX, and SQL Developer Web for database development, as well as data transformation, business model creation, data insights, and data analysis, allowing analysts to extract valuable insights from large datasets.</li></ul>   |
| Topic 2 | <ul style="list-style-type: none"><li>Managing and Maintaining Autonomous Database: This section of the exam measures the skills of Database Administrators and focuses on the ongoing management and maintenance of Autonomous Database instances. It includes using REST APIs and OCI CLI for automation, configuring access control lists and private endpoints, monitoring performance, setting up notifications, utilizing features like auto-indexing and data safe, handling connectivity through wallets and service handles, and configuring disaster recovery using Data Guard to ensure business continuity.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>Migrating to Autonomous Database: This section of the exam measures the skills of Cloud Migration Specialists and covers strategies for migrating existing databases to Autonomous Database. It includes understanding migration considerations, and available options, and using Oracle Data Pump to transfer data seamlessly while minimizing downtime, ensuring smooth transitions to Oracle Cloud infrastructure.</li></ul>   |

|         |   |
|---------|---|
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Data Lake Analytics with Autonomous Database:</b> This section of the exam measures the skills of Big Data Engineers and explores how Autonomous Database can be used for analytics in data lake environments. It includes data ingestion, query optimization, and leveraging cloud-native analytics services, ensuring engineers can efficiently process and analyze large volumes of structured and unstructured data.</li> </ul>   |
| Topic 5 | <ul style="list-style-type: none"> <li>• <b>Developing on Autonomous Database:</b> This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.</li> </ul> |

## 1Z0-931-25 Reliable Test Dumps | Reliable 1Z0-931-25 Test Answers

Are you an IT staff? Are you enroll in the most popular IT certification exams? If you tell me "yes", then I will tell you a good news that you're in luck. DumpsKing's Oracle 1Z0-931-25 Exam Training materials can help you 100% pass the exam. This is a real news. If you want to scale new heights in the IT industry, select DumpsKing please. Our training materials can help you pass the IT exams. And the materials we have are very cheap. Do not believe it, see it and then you will know.

## Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q49-Q54):

### NEW QUESTION # 49

Which two actions can be performed when an Autonomous Database is stopped? (Choose two.)

- A. Update Network Access
- B. Change administrator password
- C. Start
- D. Update License type

**Answer: C,D**

Explanation:

When an Autonomous Database is stopped, limited actions are available:

Correct Answer (B): Start is possible to bring the database back online via the OCI Console or API.

Correct Answer (C): Update License type (e.g., from License Included to Bring Your Own License) can be performed while stopped, as it's a configuration change not requiring database activity.

Incorrect Options:

A: Changing the admin password requires the database to be running for security validation.

D: Updating network access (e.g., ACLs) requires an active instance to apply changes.

These options reflect the stopped state's constraints.

### NEW QUESTION # 50

How do you change the tablespace quota for user MTHEO on an Autonomous Database on Shared Infrastructure?

- A. Execute **ALTER USER MTHEO QUOTA UNLIMITED ON TABLESPACE DATA;**
- B. Execute ALTER DATABASE FOR USER MTHEO TABLESPACE DATA QUOTA = 10G;
- C. Execute DBMS\_CLOUD\_ADMIN.GRANT\_TABLESPACE\_QUOTA(username => 'MTHEO', tablespace\_quota => 'UNLIMITED');
- D. Execute ALTER TABLESPACE DATA SET QUOTA = 10G;

**Answer: A**

Explanation:

Full Detailed In-Depth Explanation:

In Autonomous Database on Shared Infrastructure, tablespace quotas are managed using standard SQL commands, as administrative packages like DBMS\_CLOUD\_ADMIN are restricted in this environment. The correct method is: ALTER USER MTHEO QUOTA UNLIMITED ON TABLESPACE DATA: This command directly modifies the user's quota on the DATA tablespace, which is the default tablespace in Autonomous Database. "UNLIMITED" removes any storage restrictions.

Analysis of options:

A: Incorrect. DBMS\_CLOUD\_ADMIN is used in dedicated infrastructure for advanced administrative tasks, not shared infrastructure for quota changes.

B: Correct. This is the standard SQL syntax supported in shared infrastructure.

C: Incorrect. ALTER TABLESPACE modifies tablespace properties, not user quotas, and isn't applicable here.

D: Incorrect. ALTER DATABASE syntax is invalid for user quotas; it's for database-wide settings.

### NEW QUESTION # 51

How can an Autonomous Database resource be provisioned without logging into the Oracle Cloud Infrastructure Console?

- A. Connecting to the cloud infrastructure console using the SSH wallet
- B. Using the DBCA on the database server
- C. Using the cloud infrastructure command line interface or REST API calls
- D. It cannot be done

**Answer: C**

Explanation:

Provisioning an Autonomous Database without using the OCI Console is possible through programmatic methods. The correct answer is:

Using the cloud infrastructure command line interface or REST API calls (D): The Oracle Cloud Infrastructure Command Line Interface (OCI CLI) and REST APIs allow users to provision and manage Autonomous Database resources programmatically. This method is ideal for automation or when GUI access is not preferred. For example, the OCI CLI command `oci db autonomous-database create` can be used to provision a database by specifying parameters like compartment ID, database name, and workload type. Similarly, a REST API POST request to `/autonomousDatabases` achieves the same result.

The incorrect options are:

Using the DBCA on the database server (A): The Database Configuration Assistant (DBCA) is a tool for on-premises Oracle databases, not for cloud-based Autonomous Databases, which are fully managed by Oracle.

Connecting to the cloud infrastructure console using the SSH wallet (B): SSH wallets are for secure shell access to compute instances, not for provisioning databases or interacting with the OCI Console.

It cannot be done (C): This is false, as programmatic provisioning via CLI or API is explicitly supported.

This capability enhances automation and integration into DevOps workflows.

### NEW QUESTION # 52

Which three event types are supported for Autonomous Database?

- A. Terminate End
- B. Change Autoscaling Configuration Compartment
- C. Update IORM Begin
- D. Maintenance Begin
- E. Change Compartment Begin

**Answer: A,D,E**

Explanation:

Full Detailed In-Depth Explanation:

Supported events:

A: True. Marks the start of maintenance.

B: False. Not a recognized event type.

C: True. Indicates compartment change start.

D: False. IORM updates are internal, not event-tracked.

E: True. Signals termination completion.

### NEW QUESTION # 53

Which three statements are true about procedures in the DBMS\_CLOUD package?

- A. The DBMS\_CLOUD.CREATE\_CREDENTIAL procedure stores cloud object credentials in the Autonomous Data Warehouse.
- B. The DBMS\_CLOUD.DELETE\_FILE procedure removes the credential file from the Autonomous Data Warehouse.
- C. The DBMS\_CLOUD.CREATE\_EXTERNAL\_TABLE procedure creates an external table on files in the cloud. You can run queries on external data from the Autonomous Data Warehouse.
- D. The DBMS\_CLOUD.PUT\_OBJECT procedure copies a file from cloud object storage to the Autonomous Data Warehouse.
- E. The DBMS\_CLOUD.VALIDATE\_EXTERNAL\_TABLE validates the source file for an external table, generates log information, and stores the rows that do not match the format options specified for the external table in a bad file table in Autonomous Data Warehouse.

**Answer: A,C,E**

Explanation:

Full Detailed In-Depth Explanation:

The DBMS\_CLOUD package facilitates cloud integration:

A: True. CREATE\_EXTERNAL\_TABLE creates external tables for querying cloud data directly.

B: False. No DELETE\_FILE procedure exists; credential management uses DROP\_CREDENTIAL.

C: True. CREATE\_CREDENTIAL securely stores cloud storage credentials.

D: True. VALIDATE\_EXTERNAL\_TABLE checks file integrity and logs errors.

E: False. PUT\_OBJECT uploads files to cloud storage, not into the database.

### NEW QUESTION # 54

.....

DumpsKing makes your investment 100% secure when you purchase 1Z0-931-25 practice exams. We guarantee your success in the 1Z0-931-25 exam. Otherwise, our full refund policy will enable you to get your money back. The practice exams for Oracle Autonomous Database are prepared by the 1Z0-931-25 subject experts who are well aware of the 1Z0-931-25 exam syllabus requirements. Our Customer support team is 24/7 available that you can reach through email or Live Chat for any 1Z0-931-25 exam preparation product related question.
