

1Z1-182 Simulated Test, Valid 1Z1-182 Test Guide

P.S. Free 2025 Oracle 1Z1-182 dumps are available on Google Drive shared by DumpTorrent: <https://drive.google.com/open?id=1jGJ49ZOJydWgpAfwZvrUVSVRIL-Pg28g>

We can provide you with efficient online services during the whole day, no matter what kind of problems or consultants about our 1Z1-182 quiz torrent; we will spare no effort to help you overcome them sooner or later. First of all, we have professional staff with dedication to check and update our 1Z1-182 exam torrent materials on a daily basis, so that you can get the latest information from our 1Z1-182 Exam Torrent at any time. Besides our after-sales service engineers will be always online to give remote guidance and assistance for you if necessary. If you make a payment for our 1Z1-182 test prep, you will get our study materials in 5-10 minutes and enjoy the pleasure of your materials.

Oracle 1Z1-182 Exam Syllabus Topics:

Topic	Details
Topic 1	• Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.

Topic 2	• Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.
Topic 3	• Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively.
Topic 4	• Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.
Topic 5	• Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Topic 6	• Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
Topic 7	• Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.

Valid 1Z1-182 Test Guide, Test 1Z1-182 Guide

We now live in a world which needs the talents who can combine the practical abilities and knowledge to apply their knowledge into the practical working conditions. To prove that you are that kind of talents you must boost some authorized and useful certificate and the test 1Z1-182 certificate is one kind of these certificate. Passing the test 1Z1-182 Certification can prove you are that kind of talents and help you find a good job with high pay and if you buy our 1Z1-182 guide torrent you will pass the 1Z1-182 exam successfully. And our pass rate of 1Z1-182 exam prep is high as 99% to 100%.

Oracle Database 23ai Administration Associate Sample Questions (Q72-Q77):

NEW QUESTION # 72

Which two statements describe why Database Auditing is a security requirement?

- **A. To monitor proper usage of the system and data by privileged users.**
- B. To alert DBAs about system issues.
- **C. To monitor suspicious activity.**
- D. To protect against data theft by a non-authorized user.
- E. To protect against data corruption.

Answer: A,C

Explanation:

- A .True. Auditing tracks suspicious actions.
- B .False. That's monitoring, not auditing.
- C .False. Auditing detects, doesn't prevent.
- D .False. Corruption is a reliability issue.
- E .True. Ensures privileged user compliance.

NEW QUESTION # 73

As the DBA, you execute this command: GRANT CREATE VIEW TO usr1 WITH ADMIN OPTION; USR1 then executes: GRANT CREATE VIEW TO usr2 WITH ADMIN OPTION; USR2 then executes: GRANT CREATE VIEW TO usr3; Which statement is true?

- A. The DBA can revoke only ADMIN OPTION from USR1.
- B. When the DBA revokes the CREATE VIEW privilege from USR2, it is revoked from USR3.
- C. USR1 can revoke the CREATE VIEW privilege from USR3.
- D. When the DBA revokes the CREATE VIEW privilege from USR1, it is neither revoked from USR2 nor USR3.
- E. When the DBA revokes the CREATE VIEW privilege from USR1, it is revoked from USR2 but not USR3.

Answer: B,D

Explanation:

- A .False. Revoking from USR1 doesn't cascade due to WITH ADMIN OPTION.
- B .True. Revoking from USR2 cascades to USR3 because USR2 granted it.
- C .False. DBA can revoke the full privilege, not just ADMIN OPTION.
- D .False. USR1 can't revoke from USR3 directly; only the grantor (USR2) can.
- E .True. WITH ADMIN OPTION breaks the revoke chain from USR1 onward.

NEW QUESTION # 74

You have connected to a PDB to perform the administration operations of changing and verifying a system parameter that is PDB_MODIFIABLE. What is the appropriate mode to open the PDB to achieve this?

- A. READ ONLY
- B. READ WRITE
- C. RESTRICTED READ ONLY
- D. RESTRICTED WRITE ONLY

Answer: B

Explanation:

To change a PDB_MODIFIABLE parameter, the PDB must be in READ WRITE mode, allowing ALTER SYSTEM commands to modify parameters stored in the PDB's SPFILE or memory. READONLY modes prevent modifications, and no RESTRICTED WRITE ONLY mode exists.

NEW QUESTION # 75

Which three Oracle database space management features will work with both Dictionary and Locally managed tablespaces?

- A. Oracle Managed Files (OMF).
- B. Online table segment shrink.
- C. Capacity planning growth reports based on historical data in the Automatic Workload Repository (AWR).
- D. Online index segment shrink.
- E. Automatic data file extension (AUTOEXTEND).

Answer: A,C,E

Explanation:

Dictionary-managed tablespaces (DMTs) use the data dictionary for extent management, while locally managed tablespaces (LMTs) use bitmaps. Let's evaluate compatibility:

A . Capacity planning growth reports based on historical data in the Automatic Workload Repository (AWR).

True. AWR tracks space usage (e.g., DBA_HIST_TBSPC_SPACE_USAGE) regardless of tablespace type, enabling growth reports for both DMTs and LMTs.

Mechanics:MMON collects metrics like segment growth, stored in SYSAUX, accessible via EM or scripts.

Practical Use:Helps predict when to add data files, universal across management types.

B . Online table segment shrink.

False. ALTER TABLE ... SHRINK SPACE requires LMTs with Automatic Segment Space Management (ASSM), unavailable in DMTs, which lack bitmap-based free space tracking.

Why Incorrect:DMTs use freelists, incompatible with shrink operations.

C . Online index segment shrink.

False. Like tables, ALTER INDEX ... SHRINK SPACE requires LMTs with ASSM, not supported in DMTs.

Why Incorrect:Same limitation as B; DMTs can't compact online.

D . Oracle Managed Files (OMF).

True. OMF automates file naming and placement (via DB_CREATE_FILE_DEST) for both DMTs and LMTs, agnostic to extent management.

Mechanics:Example: CREATE TABLESPACE ts1; creates an OMF file in either type.

Edge Case:DMTs are rare in 23ai, but OMF still applies.

E . Automatic data file extension (AUTOEXTEND).

True. AUTOEXTEND ON allows data files to grow as needed, supported in both DMTs and LMTs since early versions.

Mechanics:ALTER DATABASE DATAFILE ... AUTOEXTEND ON NEXT 100M; works universally.

NEW QUESTION # 76

Which two statements are true about the tools used to configure Oracle Net Services?

- A. Oracle Net Manager can be used to centrally configure listeners on any database server target.
- **B. Enterprise Manager Cloud Control can be used to centrally configure net service names for any database server target.**
- **C. Oracle Net Manager can be used to locally configure naming methods on a database server.**
- D. The lsnrctl utility requires a listener.ora file to exist before it is started.
- E. The Oracle Net Configuration Assistant is only used when running the Oracle installer.

Answer: B,C

Explanation:

A .False. lsnrctl can start a default listener without listener.ora.

B .True. EMCC provides centralized Net Services configuration.

C .False. NetCA can run standalone, not just during installation.

D .True. Net Manager configures local naming (e.g., TNSNAMES.ORA).

E .False. Net Manager is local, not centralized like EMCC.

NEW QUESTION # 77

.....

Our company is professional brand. There are a lot of experts and professors in the field in our company. All the experts in our company are devoting all of their time to design the best 1Z1-182 1Z1-182 study materials for all people. In order to ensure quality of the products, a lot of experts keep themselves working day and night. We believe that our study materials will have the ability to help all people pass their 1Z1-182 Exam and get the related exam in the near future.
