

1Z1-771 Trainingsunterlagen, 1Z1-771 Pruefungssimulationen

Mit der Entwicklung der Gesellschaft ist IT-Industrie von vielen Leuten beliebt. Und es gibt immer Leute, die Oracle 1Z1-771 IT-Zertifizierungen besitzen wollen und Fortschritte in ihrer Karriere machen. In diesem Fall sollen Sie an ExamFragen denken. Und das ist Ihr gute Helfer. Die starke Oracle 1Z1-771 Dumps von ExamFragen sind die Folgen und die Erfahrung von reichen IT-Eliten. Sie können leichter Erfolg machen, wenn Sie ihre Erfahrungen bekommen.

Oracle 1Z1-771 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Thema 2	Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Thema 3	Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Thema 4	Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Thema 5	Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.

Thema 6	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Thema 7	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Thema 8	• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Thema 9	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Thema 10	• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Thema 11	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Thema 12	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Thema 13	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Thema 14	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Thema 15	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Thema 16	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.

1Z1-771 Unterlagen mit echte Prüfungsfragen der Oracle Zertifizierung

Die Senior Experten haben die online Prüfungsfragen zur Oracle 1Z1-771 Zertifizierungsprüfung nach ihren Kenntnissen und Erfahrungen bearbeitet, deren Ähnlichkeit mit den realen Prüfungen 95% beträgt. Ich habe Vertrauen in unsere Produkte. Wenn Sie die Produkte von ExamFragen kaufen, wird ExamFragen Ihnen helfen, die Oracle 1Z1-771 Zertifizierungsprüfung einmalig zu bestehen. Sonst erstatteten wir Ihnen gesammte Einkaufgebühren.

Oracle APEX Cloud Developer Professional 1Z1-771 Prüfungsfragen mit Lösungen (Q35-Q40):

35. Frage

Which three data types are supported by Oracle APEX Workflow parameters and item types?

- A. CLOB
- B. NUMBER
- C. Image
- D. VARCHAR

Antwort: A,B,D

Begründung:

Workflow parameters and page items in APEX support:

B . NUMBER: For numeric values (e.g., 123.45), used in calculations or IDs.

C . CLOB: For large text (e.g., descriptions), stored as character large objects.

D . VARCHAR: For variable-length strings (e.g., EMPLOYEE_NAME), capped at 4000 characters in most cases.

A . Image: Not a supported data type for parameters or items; images are handled as BLOBs or file uploads, not directly as a Workflow parameter type.

These types align with Oracle Database, ensuring robust data handling in workflows.

36. Frage

Which two AI Service Providers are supported by Oracle APEX?

- A. Jarvis
- B. DOC Document Generator pre-built function
- C. OCI Generative AI
- D. OpenAI

Antwort: C,D

Begründung:

Oracle APEX integrates with external AI service providers to power features like Generative AI and text generation. The supported providers are:

OpenAI: A widely recognized AI provider offering models like GPT, integrated via API keys for tasks such as text generation, summarization, or SQL authoring in APEX.

OCI Generative AI: Oracle Cloud Infrastructure's native AI service, optimized for Oracle ecosystems, providing secure, scalable AI capabilities directly within the OCI environment.

DOC Document Generator: This is not an AI service provider; it's a hypothetical or misnamed option unrelated to APEX's AI integration.

Jarvis: While a fictional AI (e.g., from Iron Man), it's not a real provider supported by APEX.

These integrations require configuration in the Instance Administration settings, including credentials and endpoints, enabling APEX to leverage cutting-edge AI for app development and runtime features.

37. Frage

How many instances of a Workflow can exist in the "In Development" state?

- A. 0
- B. 1
- C. Unlimited

Antwort: B

Begründung:

In Oracle APEX Workflow, only one instance of a workflow can exist in the "In Development" state at a time. This ensures that developers work on a single draft version before publishing it. Multiple instances are allowed in other states (e.g., "Published"), but not during development.

38. Frage

Which three Theme Components are available out-of-the-box with the Universal Theme?

- A. Comments
- B. Calendar
- C. Badge
- D. REST Data Sources

Antwort: A,B,C

Begründung:

The Universal Theme (Theme 42) provides pre-built components:

A . Calendar: A region type for date-based displays (e.g., events), styled with Universal Theme templates (e.g., FullCalendar integration).

B . Comments: A region type for user feedback or notes, with built-in styling and moderation options.

C . Badge: A UI component for displaying counts or statuses (e.g., "5 New"), often in navigation or lists, styled via CSS classes.

D . REST Data Sources: A data feature, not a theme component; it's a Shared Component, not a UI element tied to Universal Theme.

Technical Insight: These components leverage Universal Theme's CSS (e.g., t-Badge, t-Calendar) and JavaScript for interactivity, reducing custom coding.

Use Case: A dashboard with a Calendar for schedules, Comments for feedback, and Badges for unread alerts.

Pitfall: Customizing requires Theme Roller or CSS overrides.

39. Frage

Which two statements are true about creating and managing an APEX Workspace?

- A. A workspace can be associated with only one schema.
- B. You can create only two workspaces in an APEX Service (APEX Application Development) instance.
- C. New schemas cannot be created during workspace creation.
- D. During workspace creation, you can associate the workspace with an existing database schema.

Antwort: C,D

Begründung:

APEX Workspaces define development environments tied to database schemas:

A . During workspace creation, you can associate the workspace with an existing database schema: In the Workspace creation wizard (via Instance Administration), you select an existing schema (e.g., "HR") to link, enabling access to its objects. This is a standard step, ensuring immediate usability.

B . New schemas cannot be created during workspace creation: APEX doesn't provide a UI to create schemas here; schemas must pre-exist in the database, created via SQL (e.g., CREATE USER).

C . A workspace can be associated with only one schema: False; a workspace can associate with multiple schemas post-creation via "Manage Workspace to Schema Assignments." D . You can create only two workspaces: False; the limit depends on the APEX instance configuration (e.g., cloud service tier), not a fixed number like two.

Use case: Associating existing schemas is key for leveraging pre-built databases.

40. Frage

.....

Ob Sie glauben oder nicht, bieten wir die autoritativen und wirkungsvollen Prüfungsunterlagen der Oracle 1Z1-771. Wir sind sehr bereit, die beste Hilfe der Oracle 1Z1-771 Prüfungsvorbereitung Ihnen anzubieten. Vielleicht brauchen Sie nur die Zertifizierung der Oracle 1Z1-771, um Ihren Wunsch des Aufstiegs zu erfüllen. Wir wissen, dass man leicht den Impulskauf bereuen, deshalb empfehlen wir Ihnen, zuerst zu probieren und dann zu kaufen. Die Demo der Prüfungsunterlagen der Oracle 1Z1-771 können Sie auf unserer Website einfach herunterladen. Probieren Sie mal!
