1Z1-771 Valid Dumps Free, 1Z1-771 Latest Guide Files

P.S. Free & New 1Z1-771 dumps are available on Google Drive shared by Braindumpsqa: https://drive.google.com/open?id=1Uwgx2nrhkq63wKC4686uZbzH2c09_djf

Overall, 1Z1-771 is committed to helping candidates achieve success in the Oracle 1Z1-771 exam. Their goal is to save students time and money, and they guarantee that candidates who use their product will pass the 1Z1-771 Exam on their first try. With the right study material and support team, passing the exam at the first attempt is an achievable goal.

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 2	• Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.

Topic 3	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 4	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 5	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 6	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 7	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 8	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 9	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 10	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.

Efficient 1Z1-771 Valid Dumps Free Provide Prefect Assistance in 1Z1-771 Preparation

Our company is a professional certificate exam materials provider, and we have occupied in this field for years. Our company is in the leading position in exam materials providing. 1Z1-771 exam materials of us have high pass rate, and you can pass it by using them, and money back guarantee for your failure. 1Z1-771 Exam Materials have the questions and answers and therefore you can practice the question and check the answers in a quite convenient way. We also offer you free update for one year, and you can get the latest version timely if you buy the 1Z1-771 exam dumps from us.

Oracle APEX Cloud Developer Professional Sample Questions (Q51-Q56):

NEW QUESTION # 51
Which three data types are supported by Oracle APEX Workflow parameters and item types?

- A. NUMBER
- B. Image
- C. CLOB
- D. VARCHAR

Answer: A,C,D

Explanation:
Workflow parameters and page items in APEX support:

B . NUMBER: For numeric values (e.g., 123.45), used in calculations or IDs.
C . CLOB: For large text (e.g., descriptions), stored as character large objects.
D . VARCHAR: For variable-length strings (e.g., EMPLOYEE_NAME), capped at 4000 characters in most cases.
A . Image: Not a supported data type for parameters or items; images are handled as BLOBs or file uploads, not directly as a Workflow parameter type.
These types align with Oracle Database, ensuring robust data handling in workflows.

NEW QUESTION # 52

Which is NOT an available Geometry Column data type for the map region?

- A. GeoJSON
- B. JSON OBJECT
- C. SDO_GEOMETRY
- D. Latitude/Longitude

Answer: B

Explanation:
The Map Region in APEX supports spatial data via:
GeoJSON: A JSON-based standard for geographic data (e.g., points, polygons).
SDO_GEOMETRY: Oracle's native spatial data type for storing geometry (e.g., SDO_GEOMETRY(2001, 4326, SDO_POINT_TYPE(-122, 37, NULL), NULL, NULL)).
Latitude/Longitude: Separate columns for lat/long coordinates, mapped to points.
JSON OBJECT: Not a supported geometry type; while JSON can store data, it's not a specific spatial format recognized by the Map Region without GeoJSON structure.
This ensures compatibility with Oracle Spatial and common GIS standards.

NEW QUESTION # 53

An APEX e-commerce application is being used by 50 users. You have a promotional offer, and you need to send a push notification to all the subscribed users on their devices. Which step must be performed in Oracle APEX to achieve this?

- A. Enable push notifications at the application level and let APEX handle the subscription and delivery process automatically.
- B. Create a PL/SQL block to fetch all the subscribed users and send push notifications by using APEX_APPL_PUSH_SUBSCRIPTIONS & APEX_PWA.SEND.
- C. Create a Dynamic Action of Send Push Notification type to send push notifications to all the subscribed users.
- D. Create a REST Data Source to send push notifications to all the subscribed users.

Answer: B

Explanation:
To send push notifications to all subscribed users, you must:
Enable push notifications at the application level (a prerequisite).
Use a PL/SQL block with APEX_APPL_PUSH_SUBSCRIPTIONS to fetch subscribers and APEX_PWA.SEND to send the notifications.
Option A is incorrect as there's no "Send Push Notification" Dynamic Action type. Option B is incomplete as enabling alone doesn't send notifications. Option C is unrelated to push notifications.

NEW QUESTION # 54

Which client credentials are used for authentication during the 'Check Syntax' process?

- A. APEX Developer credentials
- B. Database schema credentials
- C. APEX Workspace Admin credentials

Answer: B

Explanation:
The "Check Syntax" process in APEX, typically used in SQL Workshop or when validating code, authenticates using Database

schema credentials. These are the credentials of the schema associated with the APEX workspace (e.g., username/password of the schema like "HR"). This ensures the process has access to parse and validate SQL or PL/SQL against the database objects in that schema.

APEX Workspace Admin credentials: These are for managing workspaces, not executing database-level syntax checks.

APEX Developer credentials: These authenticate developers into the APEX IDE, not the database runtime environment.

This design aligns with APEX's security model, where database operations are tied to the schema, ensuring accurate validation and error reporting (e.g., missing privileges or invalid objects).

NEW QUESTION # 55

In a faceted search page, facets can be displayed as different UI types. Which two facet item types are supported in the faceted search region?

- A. Popup LOV
- B. Range
- C. Date Picker
- D. Checkbox Group

Answer: B,D

Explanation:

In Oracle APEX, a faceted search page allows users to filter data using facets, which are displayed as UI components in the Faceted Search region. According to the Oracle APEX documentation, the supported facet item types include:

Range: Used for numeric or date ranges, allowing users to filter data within a specified range (e.g., salary or hire date).

Checkbox Group: Used for multi-select options, enabling users to select multiple values from a list (e.g., departments).

Other types like Popup LOV and Date Picker are valid item types in APEX but are not natively supported as facet types in the Faceted Search region. Popup LOV is typically used for single-value selection in forms, and Date Picker is a standalone item type, not a facet-specific UI.

NEW QUESTION # 56

......

Therefore, you must prepare as per the changes of the Oracle 1Z1-771 real test. For your assistance, Braindumpsqa offers free real Oracle 1Z1-771 dumps updates if Oracle Certification Exams changes the 1Z1-771 examination content within 365 days of your purchase. These free 1Z1-771 dumps updates will prevent you from mental stress, wasting time, and losing money.
