1z1-809 Test Certification Cost & 1z1-809 Trusted Exam Resource

After you pay for our 1z1-809 exam material online, you will get the link to download it in only 5 to 10 minutes. You don't have to wait a long time to start your preparation for the 1z1-809 exam. And if we have a new version of your 1z1-809 Study Guide, we will send an E-mail to you. Whenever you have questions about our 1z1-809 learning quiz, you are welcome to contact us via E-mail. We sincerely offer you 24/7 online service.

Oracle 1z1-809 (Java SE 8 Programmer II) Certification Exam is a comprehensive exam that tests a candidate's knowledge of Java programming. 1z1-809 exam is designed for experienced Java developers who have already passed the Oracle Certified Associate (OCA) exam and have a solid understanding of the Java programming language. 1z1-809 exam covers a wide range of topics, including advanced Java concepts, database connectivity, and security.

Oracle 1z1-809 Certification Exam is intended for experienced Java developers who have a deep understanding of Java SE 8. It is recommended that candidates have at least two years of experience working with Java SE 8 before attempting 1z1-809 exam.

Oracle Java SE 8 Programmer II Sample Questions (Q81-Q86):

NEW QUESTION # 81

Given the code fragment:

```
public static void main(String[] args) {  
    Stream.of("Java", "Unix", "Linux")  
        .filter(s -> s.contains("n"))  
        .peek(s -> System.out.println("PEEK: " + s))  
        // line n1  
}
```

Which two code fragments, when inserted at line n1 independently, result in the output PEEK: Unix?

- A. `.findAny ()`;
- B. `.anyMatch ()`;
- C. `.allMatch ()`;
- D. `.findFirst ()`;
- E. `.noneMatch ()`;

Answer: D

NEW QUESTION # 82

Given:

```
public class Product {  
    int id; int price;  
    public Product (int id, int price) {  
        this.id = id;  
        this.price = price;  
    }  
    public String toString () { return id + ":" + price;}  
}
```

and the code fragment:

```
List<Product> products = new ArrayList<> (Arrays.asList(new Product(1, 10),  
    new Product (2, 30),  
    new Product (3, 20));  
Product p = products.stream().reduce(new Product (4, 0), (p1, p2) -> {  
    p1.price+=p2.price;  
    return new Product (p1.id, p1.price);});  
products.add(p);  
products.stream().parallel()  
    .reduce((p1, p2) -> p1.price > p2.price ? p1 : p2)  
    .ifPresent(System.out::println);  
What is the result?
```

- A. The program prints nothing
- B. 4:0
- C. 2:30
- D. 4:60
- E. 4:602:303:201:10

Answer: E

NEW QUESTION # 83

Given:

```
public enum USCurrency {  
    PENNY (1),  
    NICKLE(5),  
    DIME (10),  
    QUARTER(25);  
    private int value;  
    public USCurrency(int value) {  
        this.value = value;  
    }  
    public int getValue() {return value;}  
}  
public class Coin {  
    public static void main (String[] args) {  
        USCurrency usCoin =new USCurrency.DIME;  
        System.out.println(usCoin.getValue());  
    }  
}
```

```
}
}
```

Which two modifications enable the given code to compile? (Choose two.)

- A. Make the USCurrency enumeration constructor private.
- B. Nest the USCurrency enumeration declaration within the Coin class.
- C. Remove the new keyword from the instantiation of usCoin.
- D. Make the getter method of value as a static method.
- E. Add the final keyword in the declaration of value.

Answer: A,C

NEW QUESTION # 84

Given the code fragment:

```
int[] lst = {1, 2, 3, 4, 5, 4, 3, 2, 1};
int sum = 0;
for (int frnt = 0, rear = lst.length - 1;
     frnt < 5 && rear >= 5;
     frnt++, rear--) {
    sum = sum + lst[frnt] + lst[rear];
}
System.out.print(sum);
```

What is the result?

- A. 0
- B. 1
- C. 2
- D. Compilation fails
- E. AnArrayIndexOutOfBoundsException is thrown at runtime

Answer: B

NEW QUESTION # 85

Given the code fragment:

```
4. class X {
5.     public void printFileContent() {
6.         /* code goes here */
7.         throw new IOException();
8.     }
9. }
10. public class Test {
11.     public static void main(String[] args) {
12.         X xobj = new X();
13.         xobj.printFileContent();
14.     }
15. }
```

Which two modifications should you make so that the code compiles successfully?

- A. Replace line 5 with public void printFileContent () throws IOException (
- B. Replace line 13 with:

```
try {
    xobj.printFileContent();
} catch (Exception e) { }
```

- C. At line 14, insert throw new IOException ();
- D. Replace line 7 with throw IOException ("Exception raised");
- E. Replace line 11 with public static void main (String [] args) throws Exception (

Answer: A,E

NEW QUESTION # 86

.....

[illegible]
