Key 200-901 Concepts - 200-901 Exam PDF

The DumpsQuestion is committed to making the entire 200-901 exam preparation journey simple, smart, and successful. To achieve this objective the DumpsQuestion is offering the top-rated and updated 200-901 exam practice test questions in three different formats. All these three DumpsQuestion 200-901 Exam Questions formats contain the real, valid, and error-free DevNet Associate Exam (200-901) exam practice test questions that are ideal study material for quick Cisco 200-901 exam preparation.

Cisco 200-901 exam is intended for IT professionals who have foundational knowledge of network and software engineering concepts and are looking to expand their skills and knowledge in these areas. 200-901 Exam is also suitable for individuals who are interested in pursuing a career in software development or network engineering, as it provides a solid foundation in both areas.

Cisco DevNet Associate Exam Sample Questions (Q144-Q149):

NEW QUESTION # 144

Refer to the exhibit.

```
>>> response_data = requests.get(base_url, request_url, cookies=cookies)
Traceback (most recent call last):
  File "<stdin>", line 1, in <module>
NameError: name 'requests' is not defined
>>>
```

A Python code has been written to query a device. The executed code results in the error shown. Which action resolves the problem?

- A. `import requests`

- B. pip install requests
- C. requests("GET", base_url+ request_url, cookies=cookies)
- D. import json

Answer: A

NEW QUESTION # 145

Which platform has an API that can be used to obtain a list of vulnerable software on user devices?

- A. Cisco Umbrella
- **B. Cisco Firepower**
- C. Cisco Advanced Malware Protection
- D. Cisco Identity Services Engine

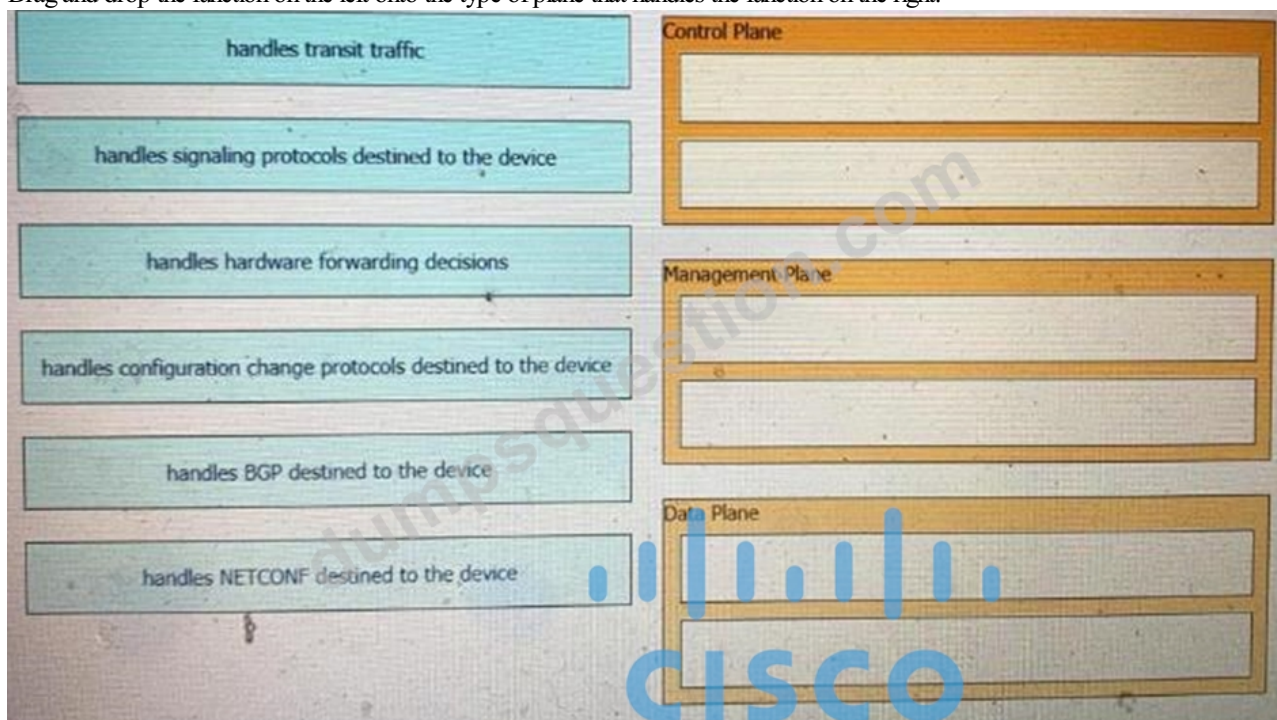

Answer: B

Explanation:

NEW QUESTION # 146

Drag and drop the function on the left onto the type of plane that handles the function on the right.

Answer:

Explanation:

NEW QUESTION # 147

What is a benefit of using Python classes?

- A. They allow a Python script to import code from various independent modules.
- **B. They improve code organization by keeping data members and methods together.**
- C. They remove the concept of inheritance to improve code readability and maintainability.
- D. They simplify integration by testing the classes independently from other components.

Answer: B

Explanation:

Python classes are a fundamental aspect of object-oriented programming (OOP) in Python. They offer several benefits:

- * **Improved Code Organization:** Classes bundle data (attributes) and functionality (methods) together. This encapsulation helps keep related parts of the code together, making it easier to understand and manage.
- * **Reusability and Inheritance:** Classes support inheritance, allowing the creation of new classes based on existing ones. This promotes code reuse and can lead to a more logical structure.
- * **Modularity:** By using classes, you can create modules that encapsulate specific functionalities, making the code modular and easier to maintain.
- * **Encapsulation and Abstraction:** Classes allow for encapsulating data and functionality, providing a clear structure and abstraction layers, which enhance code readability and maintainability.

NEW QUESTION # 148

Which is an advantage of using network programmability?

- **A. It provides for more scalable and replicable network provisioning.**
- B. Manual configuration is faster.
- C. It removes CLI access for devices.
- D. No cloud abstraction occurs.

Answer: A
