

# 2026 DCA New Dumps Sheet | Excellent 100% Free Valid DCA Exam Pass4sure

## **DCA Foundations Training | 2025/2026 Exam Questions and Answers | A+ Score Assured**

ESRS/ESRM -  ANSWER ✓✓Retailer Services / Retailer Manager

ESIPS -  ANSWER ✓✓Instant Services

ESPS -  ANSWER ✓✓Player Services

ESMS -  ANSWER ✓✓System Admin

ESOLPM - Name -  ANSWER ✓✓Online Product Management

ESMM -  ANSWER ✓✓Multimedia - (bundling & deployment content to  
ESC server)

MXSRV - Functions -  ANSWER ✓✓Resides on the HOST and is the first  
product that processes a transaction on the HOST: This product allows  
operators to view applications connections via WEB APP Portal.

MXSRV - Name -  ANSWER ✓✓Message Exchange Server

ESCP -  ANSWER ✓✓ES Connect Protocol

The DCA web-based practice questions carry the above-mentioned notable features of the desktop-based software. This version of

Test4Sure's DCA practice questions works on Mac, Linux, Android, iOS, and Windows. Our customer does not need troubling plugins or software installations to attempt the web-based DCA Practice Questions. Another benefit is that our DCA online mock test can be taken via all browsers, including Chrome, MS Edge, Internet Explorer, Safari, Opera, and Firefox.

## Docker Certified Associate (DCA) Exam Sample Questions (Q108-Q113):

### NEW QUESTION # 108

Will this command ensure that overlay traffic between service tasks is encrypted?

Solution: docker network create -d overlay --secure

- A. No
- B. Yes

#### Answer: A

Explanation:

Explanation

= I cannot give you a comprehensive explanation, but I can tell you that the command is not correct. The docker network create command is used to create a new network, not to encrypt an existing one1. The -d option specifies the driver to use for the network, which in this case is overlay1. The overlay driver enables multi-host networking for swarm services2. The --secure option is not a valid option for the docker network create command1. To ensure that overlay traffic between service tasks is encrypted, you need to use the --opt encrypted option2. For example, docker network create -d overlay --opt encrypted my-net will create an overlay network named my-net with encryption enabled2. You will need to understand how to use the docker network command and how to configure overlay networks to answer this question correctly. References:

\* Docker network create command documentation: 1

\* Overlay network encryption documentation: 2

I hope this helps you prepare for your DCA exam. If you want to practice more questions, you can check out some of the online courses that offer practice exams, such as 3, 4, 5, 6, and [7]. Good luck!

### NEW QUESTION # 109

Will this configuration achieve fault tolerance for managers in a swarm?

Solution: only two managers, one active and one passive.

- A. No
- B. Yes

#### Answer: A

Explanation:

Explanation

= The configuration will not achieve fault tolerance for managers in a swarm, because it does not have enough managers to form a quorum. A quorum is the minimum number of managers that must be available to agree on values and maintain the consistent state of the swarm. The quorum is calculated as  $(N/2)+1$ , where N is the number of managers in the swarm. For example, a swarm with 3 managers has a quorum of 2, and a swarm with 5 managers has a quorum of 3. Having only two managers, one active and one passive, means that the quorum is also 2. Therefore, if one manager fails or becomes unavailable, the swarm will lose the quorum and will not be able to process any requests or schedule any tasks. To achieve fault tolerance, a swarm should have an odd number of managers, at least 3, and no more than 7. This way, the swarm can tolerate the loss of up to  $(N-1)/2$  managers and still maintain the quorum and the cluster state. References:

\* Administer and maintain a swarm of Docker Engines

\* Raft consensus in swarm mode

\* How nodes work

### NEW QUESTION # 110

In Kubernetes, to mount external storage to a filesystem path in a container within a pod, you would use a volume in the pod specification. This volume is populated with a persistentVolumeClaim that is bound to an existing persistentVolume. The persistentVolume is defined and managed by the storageClass which provides dynamic or static provisioning of the volume and determines what type of storage will be provided1.

\*Dynamic Volume Provisioning | Kubernetes

Is this a supported user authentication method for Universal Control Plane?

Solution: Docker ID

- A. No
- B. Yes

**Answer: A**

Explanation:

Docker Universal Control Plane (UCP) has its own built-in authentication mechanism and integrates with LDAP services<sup>1</sup>. It also has role-based access control (RBAC), so that you can control who can access and make changes to your cluster and applications<sup>1</sup>. However, there is no mention of Docker ID being a supported user authentication method for UCP in the resources provided<sup>1234</sup>.

### **NEW QUESTION # 111**

From a DevOps process standpoint, it is best practice to keep changes to an application in version control. Which of the following will allow changes to a docker Image to be stored in a version control system?

- A. A dockerfile
- B. A docker-compose.yml file
- C. docker commit
- D. docker save

**Answer: C**

### **NEW QUESTION # 112**

Will this command display a list of volumes for a specific container?

Solution: 'docker container inspect nginx'

- A. Yes
- B. No

**Answer: A**

### **NEW QUESTION # 113**

.....

In order to meet the upcoming DCA exam, we believe you must be anxiously searching for relevant test materials. After all, it may be difficult to pass the exam just on your own, so we're honored you can see this message today because our DCA Guide quiz can solve your problems. Since inception, our company has devoted itself to studying the proposition outlines of various examinations so as to design materials closely to the contents of these DCA exams.
