A HCIP-Storage V5.5 (H13-624_V5.5) practice questions is a helpful, proven strategy to crack the HCIP-Storage V5.5 (H13-624_V5.5) exam successfully. It helps candidates to know their weaknesses and overall performance. DumpTorrent software has hundreds of HCIP-Storage V5.5 (H13-624_V5.5) exam dumps that are useful to practice in real-time. The HCIP-Storage V5.5 (H13-624_V5.5) practice questions have a close resemblance with the actual H13-624_V5.5 exam.

Huawei H13-624_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.

Topic 2	Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.
Topic 3	Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.
Topic 4	Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.

2026 H13-624_V5.5 Reliable Exam Testking Pass Certify | Efficient Test H13-624_V5.5 Pdf: HCIP-Storage V5.5

If you are already an employee or busy in your routine, you can prepare HCIP-Storage V5.5 (H13-624_V5.5) exam quickly with DumpTorrent pdf questions. H13-624_V5.5 pdf exam questions help applicants study for the HCIP-Storage V5.5 (H13-624_V5.5) exam at any time from any location. With the pdf questions, it will be easy for you to complete the HCIP-Storage V5.5 (H13-624_V5.5) exam preparation in a short time.

Huawei HCIP-Storage V5.5 Sample Questions (Q99-Q104):

NEW QUESTION # 99

Regarding source deduplication, which one of the following descriptions is incorrect?

- A. Only the data of the new data block needs to be transferred to the target end, no information related to the old data block needs to be transferred
- B. When data is transmitted from the source end to the target end, the source end first performs a hash comparison on the transmitted data block and removes duplicates.
- C. Compared with target end deduplication, it can save transmission bandwidth.
- D. Occupy source end resources for deduplication processing.

Answer: A

NEW QUESTION # 100

An account is a credential for using an object storage service (compatible with Amazon S3 interface), and its management function does not include:

- A. Certificate Management
- B. Contract business management
- C. Basic account management
- D. Cross-domain access policy management

Answer: C

NEW QUESTION # 101

In the Huawei HyperMetro active-active solution, when the active-active data center link fails, priority sites can be submitted first Arbitration, so that the priority site will win the arbitration first, and can continue to provide host services

- **A. True**
- B. False

Answer: A

NEW QUESTION # 102

An industry customer purchases several Huawei flash storage devices for service deployment. During routine management, an engineer finds that a controller of one device is faulty, but the fault is common, so the engineer does not need to perform emergency handling.

- A. TRUE
- **B. FALSE**

Answer: B

NEW QUESTION # 103

In actual service scenarios, the HyperMetro feature of Huawei OceanStor Pacific series supports incremental synchronization. If a site fails, the site that wins arbitration continues providing services, and I/O requests change from the dual-write state to the single-write state. After the faulty site recovers, data generated during the fault can be synchronized to the recovered site.

- A. FALSE
- **B. TRUE**

Answer: B

Explanation:

The HyperMetro feature in Huawei OceanStor Pacific series provides active-active storage with high availability. The *HCIP-Storage V5.5 Training Material (Module 4: Storage Design and Implementation)* states: "HyperMetro supports incremental synchronization. In the event of a site failure, the site that wins arbitration (via quorum server or static priority) continues services in single-write mode. After the faulty site recovers, HyperMetro resumes dual-write mode and synchronizes incremental data generated during the fault to the recovered site, ensuring data consistency." This process ensures minimal data loss and seamless recovery, making the statement true. The material emphasizes that incremental synchronization reduces the bandwidth and time required compared to full synchronization.
