Salesforce Field-Service-Consultant exam covers a wide range of topics related to the implementation and management of field service applications. Field-Service-Consultant exam covers topics such as scheduling and dispatching, work orders, mobile workforce management, inventory management, and customer communication. Passing Field-Service-Consultant Exam requires a deep understanding of the Field Service application and how it can be customized to meet the specific needs of different businesses.

Salesforce Certified Field Service Consultant Sample Questions (Q66-Q71):

NEW QUESTION # 66
Universal Containers is looking to implement Entitlement Management to meet the following requirements:

1) Any employee from the customer account is eligible for support.
2) Specific purchased products are eligible for support.
What Objects should be set up for Entitlement Management?

- A. Accounts and Service Contracts
- B. Contacts and Service Contracts
- C. Accounts and Assets
- D. Contracts and Assets

Answer: A

NEW QUESTION # 67

When customers call in for support at AW Computing, a case is always created. If the issue cannot be solved without dispatching a technician, a work order is created from the case. Milestones are currently being used on cases, and support operations would like to extend the use of milestones to the work orders. To meet this requirement, the system administrator added the milestone Lightning component to the work order Lightning record page. Technicians and managers are reporting that there are no milestones listed when viewing the record.
How should this issue be resolved?

- A. Add work order milestones after the case milestones to the entitlement process.
- B. Make sure the case entitlement record is being shared with the service resource.
- C. Create a separate entitlement process associated to the work order object.
- D. Ensure the work order entitlement is related to the same process as the case entitlement.

Answer: C

NEW QUESTION # 68

When completing a Work Order in the field, the Technician needs to capture two signatures to ensure compliance.
Which steps are needed to configure the signature capture?

- A. Create two custom fields for the Service Appointment and use Flows to capture each signature.
- B. Create relevant Signature Types and add Signature Blocks to the Service Report Template.
- C. Create a Flow that adds two Signature Blocks when the Service Report is generated,
- D. Create two Service Reports and add one Signature Block to each Report.

Answer: B

Explanation:
Explanation
This option allows capturing multiple signatures on a service report by creating different signature types (such as customer approval or technician verification) and adding them to the service report template. References:

NEW QUESTION # 69

Universal containers products need to be traceable form the factory to customer sites. The products are installed using disposable kits.
How should the consultant configure this?

- A. Creak the products as serialized inventory and the installation kits as unsterilized inventory.
- B. Create the products and the installation kits as unsterilized inventory.
- C. Create the products and the installation kits as a single serialized product.
- D. Create the products and the installation kits as serialized inventory.

Answer: A

NEW QUESTION # 70

A consultant has implemented user territories at Northern Trail Outfitters (NTO) in a private sharing model. A new Midwest Service Territory has been created.

Which two actions should NTO take to give the dispatcher access to all relevant Midwest records? Choose 2 answers

- A. Create a new user territory associated with the Service Territory and dispatcher.
- B. Add the resources assigned to the Service Territory's Member related list.
- C. Configure and run the User Territory Sharing Job in Field Service Settings.
- D. Assign a new user territory and add each of the assigned service resources.

Answer: A,C

Explanation:

User Territories are records that associate users with service territories for sharing purposes[90]. Creating a new user territory associated with the Service Territory and dispatcher would allow giving access to all relevant Midwest records by linking them with their corresponding service territory[91]. Configuring and running the User Territory Sharing Job in Field Service Settings would allow updating sharing rules based on user territories automatically at regular intervals such as daily or weekly[92]. Assigning a new user territory and adding each of the assigned service resources would not give access to all relevant Midwest records
