Annual qualification examination, although content broadly may be the same, but as the policy of each year, the corresponding examination pattern grading standards and hot spots will be changed, the 1Z0-1114-25 Test Prep can help users to spend the least time to pass the exam.

Oracle Redwood Application 2025 Developer Associate Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which is the correct sequence of steps in the Design process?

- A. Understand the statement, articulate the problem, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- B. Articulate the vision, identify the Redwood Page templates, understand the problem, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- C. Articulate the vision, understand the problem, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- **D. Understand the problem, articulate the vision, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world**

Answer: D

Explanation:

Full Detailed in Depth Explanation:

The Redwood design process, as outlined in Oracle's Redwood documentation, follows a structured approach to ensure a user-centered and iterative design. The correct sequence starts with "Understand the problem" (to define the challenge), followed by "Articulate the vision" (to set goals), "Identify the Redwood Page templates to use" (to select appropriate patterns), "Add the detail and refine the design" (to iterate), "Specify the design for development" (to hand off to developers), and "Monitor engagement in the real world" (to evaluate post-launch). Option D reflects this logical flow. Option A reverses the initial steps, Option B uses incorrect terminology ("Understand the statement"), and Option C misorders understanding the problem after template selection, which disrupts the process.

NEW QUESTION # 27

Which two tools allow UI/UX Designers to reuse Redwood's shared libraries and templates for projects and products?

- **A. Figma**
- B. PowerPoint
- **C. Adobe XD**
- D. UXPin
- E. Marvel

Answer: A,C

Explanation:

Full Detailed in Depth Explanation:

Redwood supports Adobe XD (B) and Figma (C) with shared libraries for design consistency. UXPin (A), Marvel (D), and PowerPoint (E) aren't integrated.

NEW QUESTION # 28

In which three cases would you need a Visual Builder service instance to deploy your app to? (Choose three.)

- **A. When there is an application that is accessible from a vanity URL (custom domain)**
- B. For gaining access to Oracle Fusion Apps REST services
- **C. For gaining access to an external database through a REST service requiring basic auth**
- D. For enabling the app to be integrated into the Fusion Cloud Apps menu
- **E. When the app needs to be accessed by users who do not have Fusion Apps access**

Answer: A,C,E

Explanation:

Full Detailed in Depth Explanation:

A Visual Builder (VB) service instance is a stand-alone runtime environment separate from Fusion Apps. Option A is correct because external users without Fusion access require a VB instance to host the app. Option B is valid as VB instances support REST integrations with external databases using basic authentication. Option C is accurate because vanity URLs are supported by VB instances for custom domains. Option D is incorrect because Fusion Apps REST services are typically accessed via AppUI extensions within Fusion, not a separate VB instance. Option E is wrong as integration into Fusion menus relies on AppUI extensions, not a stand-alone VB instance.

NEW QUESTION # 29

Which are the three out-of-the-box functionalities provided by Redwood for developing an application? (Choose three.)

- A. Localization
- B. Telemetry and feedback
- C. Caching services
- D. Responsiveness
- E. Accessibility

Answer: A,D,E

Explanation:

Full Detailed in Depth Explanation:

Redwood offers Localization (A), Responsiveness (C), and Accessibility (D) as core features. Caching (B) and Telemetry (E) are not standard out-of-the-box functionalities.

NEW QUESTION # 30

Which two statements are true about Web Components?

- A. A Web Component can be composed of JET components, HTML, JavaScript, and CSS
- B. A Web Component is a reusable piece of UI that can be embedded as a custom HTML element
- C. Web Component is not composed of JET components, HTML, JavaScript, and CSS
- D. A Web Component is a collection of Service Connections, Business Objects, and CSS

Answer: A,B

Explanation:

Full Detailed in Depth Explanation:

Web Components in VB are reusable UI elements (A) built with JET, HTML, JS, and CSS (C). They aren't collections of services/objects (B), and D contradicts C.

NEW QUESTION # 31

.....

When you first contact our software, different people will have different problems. Maybe you are not comfortable with our 1Z0-1114-25 exam question and want to know more about our products and operations. As long as you have questions, you can send e-mail to us, we have online staff responsible for ensuring 24-hour service to help you solve all the problems about our 1Z0-1114-25 Test Prep. After you purchase our 1Z0-1114-25 quiz guide, we will still provide you with considerate services. Maybe you will ask whether we will charge additional service fees.
