If you choose to buy the ExamDumpsVCE's raining plan, we can make ensure you to 100% pass your first time to attend Avaya Certification 77201X Exam. If you fail the exam, we will give a full refund to you.

Avaya IP Office™ Platform Implement Certified Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

What is the default SNMP port on IP Office?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:
The default SNMP port on IP Office is 161 (Option A), per the SNMP standard for monitoring. Option B (162) is for SNMP traps, Option C (5060) is for SIP, and Option D (8080) is for web services.References:
Avaya IP Office SNMP Configuration Guide.

NEW QUESTION # 43
Which feature allows a user to lock their phone to prevent unauthorized use?

- A. Hot Desking
- B. Phone Lock
- C. Call Barring
- D. Mobile Twinning

Answer: B

Explanation:
Phone Lock (Option B) allows a user to secure their phone with a PIN, preventing unauthorized use. Option A is for logging into phones, Option C restricts outbound calls, and Option D links to external numbers-none lock the phone itself.References: Avaya IP Office Phone User Guide.

NEW QUESTION # 44
Which feature allows a user to forward their calls to an external number?

- A. Call Diversion
- B. Mobile Twinning
- C. Remote Call Forward
- D. Call Forwarding

Answer: B

Explanation:
Mobile Twinning (Option B) allows a user to link their IP Office extension to an external number (e.g., a mobile phone), so calls ring both devices simultaneously or sequentially. This is distinct from Option A (Call Forwarding), which redirects calls to another internal extension or voicemail, not typically an external number without additional setup. Option C (Remote Call Forward) is not a standard IP Office term, and Option D (Call Diversion) is a synonym for forwarding but less specific to external numbers.References: Avaya IP Office Mobile Twinning Configuration Guide.

NEW QUESTION # 45
What is the purpose of the IP Office Server Edition Secondary Server?

- A. To handle SIP trunking
- B. To act as a failover for the Primary Server
- C. To manage voicemail services
- D. To provide additional user capacity

Answer: B

Explanation:
The Secondary Server in IP Office Server Edition is designed to act as a failover for the Primary Server (Option B), ensuring

resilience. If the Primary Server fails, the Secondary takes over call processing and management, maintaining service continuity. Option A is incorrect as capacity is expanded via Expansion Systems, not the Secondary Server. Option C is false because voicemail is typically handled by Voicemail Pro, which can run on either server or a separate system. Option D is incorrect as SIP trunking is managed by the Primary Server or Expansion Systems, not specifically the Secondary Server. References: Avaya IP Office Server Edition Resilience Configuration Guide.

NEW QUESTION # 46
What is the purpose of the IP Office System Monitor?

- A. To configure hunt groups
- B. To provide real-time debugging and tracing
- C. To upgrade firmware
- D. To manage voicemail greetings

Answer: B

Explanation:
The IP Office System Monitor is a diagnostic tool that provides real-time debugging and tracing (Option B), displaying logs for troubleshooting issues like call failures or protocol errors. Option A is handled by IP Office Manager, Option C by Voicemail Pro, and Option D by Manager or Web Manager-not System Monitor. References: Avaya IP Office System Monitor Guide.

NEW QUESTION # 47
......

You can easily operate this type of practicing test on iOS, Windows, Android, and Linux. And the most convenient thing about this type of 77201X practice exam is that you don't have to install any software as it is a 77201X web-based practice exam. ExamDumpsVCE also has a product support team available every time to help you out in any terms.
