

2025 CheckPoint High Hit-Rate Related 156-536 Certifications

P.S. Free 2025 CheckPoint 156-536 dumps are available on Google Drive shared by VCEdumps: <https://drive.google.com/open?id=1izKygn6fHY27ZprgEWQtuOBEMfgDI8EK>

VCEdumps has been devoted itself to provide all candidates who are preparing for IT certification exam with the best and the most trusted reference materials in years. With regards to the questions of IT certification test, VCEdumps has a wealth of experience. VCEdumps has helped numerous candidates and got their reliance and praise. So, don't doubt the quality of VCEdumps CheckPoint 156-536 Dumps. It is high quality dumps helping you 100% pass 156-536 certification test. VCEdumps promises 100% FULL REFUND, if you fail the exam. With this guarantee, you don't need to hesitate whether to buy the dumps or not. Missing it is your losses.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.
Topic 2	• Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.
Topic 3	• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.

HOT Related 156-536 Certifications - High-quality CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) - 156-536 Test Dump

Our 156-536 study material is the most popular examination question bank for candidates. 156-536 study material has helped thousands of candidates successfully pass the exam and has been praised by all users since it was appearance. 156-536 study material has the most authoritative test counseling platform, and each topic in 156-536 Study Materials is carefully written by experts who are engaged in researching in the field of professional qualification exams all the year round. They have a very keen sense of change in the direction of the exam, so that they can accurately grasp the important points of the exam.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q79-Q84):

NEW QUESTION # 79

Which solution encrypts various types of removable storage media including USB drives, backup hard drives, and SD cards?

- **A. Media Encryption and Port Protection (MEPP)**
- B. Full Recovery with Media Encryption
- C. Endpoint's Media Encryption (ME) Software Capability
- D. Full Disk Encryption and File Recovery

Answer: A

NEW QUESTION # 80

Which command in a CLI session is used to check installed licenses on the Harmony Endpoint Management Server?

- A. show licenses all
- **B. cplic print -x**
- C. cplic add <license filename="">
D. cplic print +x</license>

Answer: B

Explanation:

To check installed licenses on the Harmony Endpoint Management Server via the command-line interface (CLI), the correct command is `cplic print -x`. This is a standard Check Point command for displaying detailed license information, as referenced in the CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf on page 58 under "Getting Licenses." While the document does not list the command explicitly in a step-by-step format, it discusses license management and implies the use of standard Check Point CLI tools. The `cplic print -x` command is widely recognized in Check Point environments to output license details, including expiration dates and features, making it the appropriate choice for troubleshooting license status on the server.

Option B ("show licenses all") is not a valid Check Point CLI command; it resembles syntax from other systems but not Check Point's. Option C ("`cplic add <license filename=''>`") is for adding a license, not checking existing ones (page 58 mentions applying licenses, not viewing them). Option D ("`cplic print +x`") contains a syntax error; the correct flag is `-x`, not `+x`. Thus, option A is the verified answer based on Check Point's CLI conventions and the guide's context.

</license> References:

CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 58: Getting Licenses (discusses license management, implying standard CLI usage).

NEW QUESTION # 81

Which of the following is TRUE about the functions of Harmony Endpoint components?

- A. SmartConsole connects to and manages the Endpoint Management Server (EMS)
- B. SmartEndpoint connects to the Check Point Security Management Server (SMS)
- **C. SmartEndpoint Console connects to and manages the Endpoint Management Server (EMS)**
- D. Web Management Console for Endpoint connects to the Check Point Security Management Server (SMS)

Answer: C

Explanation:

The SmartEndpoint Console is a key component in the Harmony Endpoint architecture, specifically designed to connect to and manage the Endpoint Management Server (EMS). It is a Check Point SmartConsole application used to deploy, monitor, and configure endpoint security clients and policies, communicating directly with the EMS. In contrast, SmartEndpoint does not connect to the Security Management Server (SMS) as stated in option A. SmartConsole (C) is a broader management tool for Check Point gateways, not specifically for the EMS. Option D, regarding the Web Management Console, is not supported by the documentation as connecting to the SMS. Therefore, "SmartEndpoint Console connects to and manages the Endpoint Management Server (EMS)" (B) is the true statement.

NEW QUESTION # 82

The Remote Help tool can be used to assist users in password recovery. What type of assistance does this tool provide?

- A. The Remote Help tool provides:
 - a) Link to the secret location of an encrypted password file
 - b) Key to decrypt the password file
- **B. The Remote Help tool provides:**
 - a) **User Logon Pre-boot Remote Help**
 - b) **Media Encryption Remote Help**
- C. The Remote Help tool unlocks admin accounts on SmartEndpoint
- D. The Remote Help tool only provides procedural information and FAQs about the Endpoint Security Client, including the procedure to reset the password

Answer: B

Explanation:

The Remote Help tool in Check Point Harmony Endpoint assists users with password recovery for specific scenarios, namely Full Disk Encryption (FDE) and Media Encryption & Port Protection (MEPP). The CP_R81.

20_Harmony_Endpoint_Server_AdminGuide.pdf on page 425, under "Remote Help," provides a clear description:

"There are two types of Full Disk Encryption Remote Help:

* One Time Login - One Time Login lets users access Remote Help using an assumed identity for one session, without resetting the password. Users who lose their Smart Cards must use this option.

* Remote password change - This option is applicable for users with fixed passwords who are locked out.

For USB storage devices protected by Media Encryption & Port Protection policies, only remote password change is available."

This extract confirms that Remote Help offers User Logon Pre-boot Remote Help (for FDE, covering one-time login and password changes) and Media Encryption Remote Help (for MEPP, limited to password changes), precisely matching Option B.

* Option A is incorrect because Remote Help is an active assistance tool, not merely a source of procedural information or FAQs (see page 425).

* Option C is inaccurate; providing links to encrypted files or decryption keys would compromise security and is not mentioned in the documentation.

* Option D is wrong as Remote Help assists end-users with their own access, not admin accounts on SmartEndpoint (see page 425).
