Test4Cram not only provide the products which have high quality to each candidate, but also provides a comprehensive after-sales service. If you are using our 312-76 products, we will let you enjoy one year of free updates. So that you can get the latest exam information in time. We will be use the greatest efficiency to service each candidate.

If talking about the details of the topics covered in this prerequisite exam, they are enumerated below:

- **Data Recovery Strategies: 37%**

This module focuses on your understanding of the data recovery process & best practices, best practices & standards in virtualization, and disaster recovery based on virtualization. It also covers the details of the data recovery overview, centralized & decentralized computing overview, centralized backup, survivable storage systems, and data consolidation overview.

- **Disaster Recovery Planning Process: 10%**

This objective evaluates the learners' understanding of the disaster recovery planning process & methodology as well as the disaster recovery planning overview.

- **Risk Assessment: 7%**

This area focuses on the individuals' knowledge of risk overview and associated terminology. It also focuses on equipping the candidates with the competence in the risk assessment process and best practices & standards in risk management.

- **Business Impact Analysis & Business Continuity Plan: 12%**

This topic covers the test takers' understanding of cost-benefit analysis & business impact analysis overview, standards of BIA, and how to perform it. It also evaluates their knowledge of business continuity plans and business continuity strategy

designs.

- **BCP Testing, Training, & Maintenance: 8%**

This domain requires one's understanding of business continuity plan testing, BCP training program, as well as maintaining & auditing of the business continuity plan.

- **Introduction to Disaster Recovery & Business Continuity: 9%**

This section covers the knowledge areas, which include the overview of disaster recovery & business continuity, disaster recovery & business continuity trends, as well as business continuity management overview. It also covers one's understanding of the best practices & standards in risk management and disaster recovery & business continuity.

The 312-76 Exam is created to validate the expertise of the potential candidates in planning, implementing, strategizing, and maintaining business continuity & disaster recovery plans. The certification process equips the individuals with an understanding of procedures and policies associated with the preparation of continuation or recovery of technology infrastructure. These are important to the organizations after human-induced or natural disasters. Those specialists who achieve success in this test qualify to earn EC-Council Certified Disaster Recovery Professional, also known as the EDRP certificate.

High Hit-Rate EC-COUNCIL - 312-76 - Valid EC-Council Disaster Recovery Professional (EDRP) Exam Objectives

The field of EC-COUNCIL is growing rapidly and you need the EC-COUNCIL 312-76 certification to advance your career in it. But clearing the EC-Council Disaster Recovery Professional (EDRP) (312-76) test is not an easy task. Applicants often don't have enough time to study for the 312-76 Exam. They are in desperate need of real 312-76 exam questions which can help them prepare for the EC-Council Disaster Recovery Professional (EDRP) (312-76) test successfully in a short time.

EC-COUNCIL EC-Council Disaster Recovery Professional (EDRP) Sample Questions (Q159-Q164):

NEW QUESTION # 159

Which of the following disaster recovery tests includes the operations that shut down at the primary site, and are shifted to the recovery site according to the disaster recovery plan?

- A. Structured walk-through test
- **B. Full-interruption test**
- C. Parallel test
- D. Simulation test

Answer: B

Explanation:

Explanation/Reference:

NEW QUESTION # 160

BS 7799 is an internationally recognized ISM standard that provides high level, conceptual recommendations on enterprise security. BS 7799 is basically divided into three parts. Which of the following statements are true about BS 7799? Each correct answer represents a complete solution. Choose all that apply.

- **A. BS 7799 Part 3 was published in 2005, covering risk analysis and management.**
- **B. BS 7799 Part 2 was adopted by ISO as ISO/IEC 27001 in November 2005.**
- C. BS 7799 Part 1 was adopted by ISO as ISO/IEC 27001 in November 2005.
- **D. BS 7799 Part 1 was a standard originally published as BS 7799 by the British Standards Institute (BSI) in 1995.**

Answer: A,B,D

NEW QUESTION # 161

Which of the following phases is the first step towards creating a business continuity plan?

- **A. Scope and Plan Initiation**
- B. Business Continuity Plan Development
- C. Plan Approval and Implementation
- D. Business Impact Assessment

Answer: A

NEW QUESTION # 162

Which of the following values specifies the acceptable latency of data that will be recovered?

- A. Recovery Target Objective
- B. Recovery Time Objective
- C. Recovery Plan Objective
- **D. Recovery Point Objective**

Answer: D

Explanation:

Explanation/Reference:

NEW QUESTION # 163

Which of the following terms refers to a storage technology that is used to capture real-time data changes and facilitate data restore points and recovery?

- A. Mirroring
- **B. Continuous Data Protection (CDP)**
- C. Disk-to-Disk (D2D)
- D. Virtual Tape Library (VTL)

Answer: B

Explanation:

Continuous Data Protection (CDP) is a technology that continuously captures and saves data changes in real time or near real time, allowing for granular restore points. Unlike traditional backups that occur at scheduled intervals, CDP tracks every change to data, enabling recovery to any point in time before a failure. In this context, CDP is the best fit as it facilitates real-time data capture and recovery.

* Option B (Mirroring): Mirroring duplicates data across two or more storage devices for redundancy but doesn't inherently capture real-time changes for multiple restore points.

* Option C (Virtual Tape Library): A VTL emulates tape storage using disk-based systems, primarily for backup, not real-time change capture.

* Option D (Disk-to-Disk): D2D refers to backing up data from one disk to another, typically at scheduled intervals, not in real time.

* EDRP v3 discusses CDP as an advanced backup technology under data protection strategies, highlighting its role in minimizing data loss by providing continuous recovery points (Module: Data Backup and Recovery).

NEW QUESTION # 164

.....

When you buy things online, you must ensure the security of online purchasing, otherwise your rights will be harmed. Our 312-76 study tool purchase channel is safe, we invite experts to design a secure purchasing process for our 312-76 qualification test, and the performance of purchasing safety has been certified, so personal information of our clients will be fully protected. We provide you with global after-sales service. If you have any questions that need to be consulted, you can contact our staff at any time to help you solve problems related to our 312-76 qualification test. Our thoughtful service is also part of your choice of buying our learning materials. Once you choose to purchase our 312-76 test guides, you will enjoy service.
