Certified Cybersecurity Technician Exam Training Guide Improve Your Efficiency - Test4Cram

To save the clients' time, we send the products in the form of mails to the clients in 5-10 minutes after they purchase our 212-82 study materials and we simplify the information to let the clients only need dozens of hours to learn and prepare for the test. To help the clients solve the problems which occur in the process of using our 212-82 Study Materials, the clients can consult u about the issues about our study materials at any time.

ECCouncil 212-82 Exam is an industry-recognized certification that is highly valued by employers in the cybersecurity industry. Certified Cybersecurity Technician certification is especially important for individuals who are just starting their careers in cybersecurity and are looking for ways to differentiate themselves from other job applicants. Certified Cybersecurity Technician certification can also help individuals who are looking to advance their careers and take on more senior roles within their organizations.

ECCouncil Certified Cybersecurity Technician Sample Questions (Q79-Q84):

NEW QUESTION # 79

CyberX, an acclaimed cybersecurity firm with a diverse clientele ranging from financial institutions to healthcare providers, has been approached by NexusCorp. NexusCorp, a global supply chain giant, seeks assistance in drafting a new security policy after a series of cyber-attacks that highlighted vulnerabilities in its existing protocols. While NexusCorp uses state-of-the-art technology, its

security policies have not kept pace.

It needs a policy that acknowledges its complex organizational structure, vast geographic spread, and diversity in employee tech proficiency.

Which should be CyberX's primary consideration in this scenario?

- A. Emphasis on stringent password policies.
- B. Regular update schedules for software and hardware components.
- C. Use of the latest encryption algorithms.
- **D. Stakeholder involvement in policy formulation.**

Answer: D

Explanation:

* Inclusion of Diverse Perspectives:

* Involving stakeholders in policy formulation ensures that the security policy considers the diverse needs and perspectives of different departments and employees across NexusCorp's complex organizational structure.

NEW QUESTION # 80

Zayn, a network specialist at an organization, used Wireshark to perform network analysis. He selected a Wireshark menu that provided a summary of captured packets, IO graphs, and flow graphs. Identify the Wireshark menu selected by Zayn in this scenario.

- **A. Statistics**
- B. Analyze
- C. Packet list panel
- D. Status bar

Answer: A

Explanation:

Statistics is the Wireshark menu selected by Zayn in this scenario. Statistics is a Wireshark menu that provides a summary of captured packets, IO graphs, and flow graphs. Statistics can be used to analyze various aspects of network traffic, such as protocols, endpoints, conversations, or packet lengths.

NEW QUESTION # 81

A major metropolitan municipal corporation had deployed an extensive IoT network for managing various facilities in the city. A recent cyber attack has paralyzed the city's vital services, bringing them to a complete halt. The Security Operations Center (SOC) has captured the network traffic during the attack and stored it as IoT_capture.pcapng in the Documents folder of the Attacker Machine-1. Analyze the capture file and identify the command that was sent to the IoT devices over the network. (Practical Question)

- A. Woodland_Blaze_Warninggil
- **B. Forest_Fire_Alert444**
- C. Woodland_Blaze_Warning999
- D. Nature_Blaze_Warning555

Answer: B

Explanation:

To analyze the IoT network traffic capture and identify the command sent to IoT devices, follow these steps:

* Open the Capture File:

* Use a network analysis tool like Wireshark to open the IoT_capture.pcapng file.

* Filter and Analyze:

* Apply appropriate filters to isolate relevant traffic. Look for command patterns typically sent to IoT devices.

* Identify the Command:

* Upon analyzing the captured traffic, the command Forest_Fire_Alert444 is identified as the one sent over the network to IoT devices during the attack.

NEW QUESTION # 82

Hayes, a security professional, was tasked with the implementation of security controls for an industrial network at the Purdue level 3.5 (IDMZ). Hayes verified all the possible attack vectors on the IDMZ level and deployed a security control that fortifies the IDMZ against cyber-attacks.

Identify the security control implemented by Hayes in the above scenario.

- **A. Use of authorized RTU and PLC commands**
- B. MAC authentication
- C. Point-to-point communication
- D. Anti-DoS solution

Answer: A

NEW QUESTION # 83

Perform vulnerability assessment of an Android device located at IP address 172.30.20.110. Identify the severity score for the device. You can use the OpenVAS vulnerability scanner, available with Parrot Security, with credentials admin/password for this challenge. (Practical Question)

- A. 02.6
- **B. 2.8**
- C. 2.2
- D. 2.4

Answer: B

Explanation:

Performing a vulnerability assessment on an Android device using OpenVAS involves several steps. Here's how to approach this practical task:

* OpenVAS Setup: Ensure OpenVAS is installed and properly configured on Parrot Security OS.

* Scan Configuration:

* Launch OpenVAS and log in using the provided credentials (admin/password).

* Navigate to the "Scans" section and create a new task.

* Target Specification:

* Set the target IP address to 172.30.20.110.

* Perform the Scan:

* Initiate the scan and wait for it to complete. The duration will depend on the network and device complexity.

* Analyze Results:

* Once the scan completes, review the report generated by OpenVAS.

* Identify the severity score, which is typically displayed as part of the scan results summary.
