

# 2025 Exam MB-920 Topics | Newest MB-920 100% Free New Soft Simulations

**How to Use this Booklet**

This booklet is designed to help prepare for the role play part of the oral exam through structured practice. There are **10 topics**, and each topic contains **3 role plays**:

- **1 Supported Role Play (aH)** - includes help boxes, key vocabulary, and success criteria, example answers
- **2 Independent Tasks (bH and cH)** - just the task scenario and teacher script

Each Supported Role Play follows a three-stage structure to help you prepare and perform confidently:

|                                                                                     | Stage          | What To Do                                                                                                           | Why It Helps                                                     |
|-------------------------------------------------------------------------------------|----------------|----------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
|    | <b>Plan</b>    | Write your ideas in the mind map in French before speaking. Focus on key vocabulary, question words, and verbs.      | Helps you prepare ideas and recall key phrases quickly.          |
|   | <b>Perfect</b> | Check your sentences for verbs, opinions, reasons, and connectives. Make sure each idea is accurate and interesting. | Ensures you show the examiner a range of grammar and structures. |
|  | <b>Perform</b> | Practise saying your answers out loud clearly and confidently using the teacher script.                              | Builds fluency and confidence for the real exam.                 |

Once you have completed these three stages, you can compare your answers with the example answers provided, which include a mini mark scheme to help you identify areas for improvement.

| Budget entries can be created from a Microsoft Excel workbook.                                | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation:

Answer Area

| Statements                                                                                    | Yes                              | No                               |
|-----------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Account segments can be defined and used in an organization's chart of accounts.              | <input checked="" type="radio"/> | <input type="radio"/>            |
| You must have Project Operations in order to enter timesheets and expenses against a project. | <input type="radio"/>            | <input checked="" type="radio"/> |
| Budget entries can be created from a Microsoft Excel workbook.                                | <input checked="" type="radio"/> | <input type="radio"/>            |

### NEW QUESTION # 28

A company creates a project plan in Dynamics 365 Project Operations.

The project plan must allow a project manager to:

- \* Track profitability,
- \* Collaborate on the work to be performed, and
- \* Allocate people to perform tasks.

You need to identify the project derivatives that the project plan must track.

Which three major project derivatives should the plan track? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. invoicing
- B. cost
- C. schedule updates
- D. resourcing

Answer: B,D

### NEW QUESTION # 29

A company plans to implement enterprise asset management. You need to recommend solutions for the company.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Options                              | Answer Area                                                                                                  |          |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------|----------|
|                                      | Feature                                                                                                      | Option   |
| Dynamics 365 Finance                 | Track the purchase price and other acquisition costs for a large machine.                                    | Solution |
| Dynamics 365 Supply Chain Management | Track the cost of spare parts, maintenance, and labor associated with a large machine through its lifecycle. | Solution |
| Dynamics 365 Product Visualize       |                                                                                                              |          |

**Answer:**

**Explanation:**

| Options                              | Answer Area                                                                                                  |                                      |

### NEW QUESTION # 30

A company implements Dynamics 365 Finance.

You need to recommend features that the company can use for integrated reporting scenarios.

Which feature should you recommend? To answer, drag the appropriate features to the correct scenarios. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

|                      | Scenario                                         | Feature |
|----------------------|--------------------------------------------------|---------|
| Native controls      | Display personalized views of data.              | Feature |
| Structured documents | Display income statements and balance sheets.    | Feature |
| Workspaces           | Create tax statements for customers and vendors. | Feature |
| Financial reporting  |                                                  |         |

**Answer:**

**Explanation:**

|                      | Scenario                                         | Feature              |
|----------------------|--------------------------------------------------|----------------------|
| Native controls      | Display personalized views of data.              | Workspaces           |
| Structured documents | Display income statements and balance sheets.    | Financial reporting  |
| Workspaces           | Create tax statements for customers and vendors. | Structured documents |
| Financial reporting  |                                                  |                      |

### NEW QUESTION # 31

A company plans to implement Dynamics 365 Supply Chain Management. Match each manufacturing strategy to its definition. To answer, drag the appropriate manufacturing strategy from the column on the left to its definition on the right. Each manufacturing strategy may be used once, more than once, or not at all.  
NOTE: Each correct selection is worth one point.

| Manufacturing strategies | Answer Area |
|--------------------------|-------------|
| Make-to-order            |             |
| Make-to-stock            |             |
| Configure-to-order       |             |
| Engineer-to-order        |             |

  

| Definition                                                                                  | Manufacturing strategy |
|---------------------------------------------------------------------------------------------|------------------------|
| Calculate minimum quantities required to replenish inventory based on historic consumption. | Manufacturing strategy |
| Trigger expensive steps of the value chain by using a sales order or transfer order.        | Manufacturing strategy |
| Create a prototype item based on specific requirements.                                     | Manufacturing strategy |

Answer:

Explanation:

| Manufacturing strategies | Answer Area |
|--------------------------|-------------|
| Make-to-order            |             |
| Make-to-stock            |             |
| Configure-to-order       |             |
| Engineer-to-order        |             |

  

| Definition                                                                                  | Manufacturing strategy     |
|---------------------------------------------------------------------------------------------|----------------------------|
| Calculate minimum quantities required to replenish inventory based on historic consumption. | Make-to-stock strategy     |
| Trigger expensive steps of the value chain by using a sales order or transfer order.        | Make-to-order strategy     |
| Create a prototype item based on specific requirements.                                     | Engineer-to-order strategy |
