What's more, part of that Dumps4PDF FCP_FGT_AD-7.4 dumps now are free: <https://drive.google.com/open?id=1YJhZ8baTCdsqo5qIGrwGAERIZK2dUij7>

Simplified language allows candidates to see at a glance. With this purpose, our FCP_FGT_AD-7.4 learning materials simplify the questions and answers in easy-to-understand language so that each candidate can understand the test information and master it at the first time, and they can pass the test at their first attempt. Our experts aim to deliver the most effective information in the simplest language. Each candidate takes only a few days can attend to the FCP_FGT_AD-7.4 Exam. In addition, our FCP_FGT_AD-7.4 FCP_FGT_AD-7.4 provides end users with real questions and answers. We have been working hard to update the latest FCP_FGT_AD-7.4 learning materials and provide all users with the correct FCP_FGT_AD-7.4 answers. Therefore, our FCP_FGT_AD-7.4 learning materials always meet your academic requirements.

If you want to have a general review of what you have learned, you can choose us. FCP_FGT_AD-7.4 Online test engine has testing history and performance review, and it can help you have a general review of what you have learnt last time. Besides FCP_FGT_AD-7.4 Online test engine support all web browsers, and it is convenient and easy to learn, and you can have offline practice if you like. FCP_FGT_AD-7.4 Training Materials are high quality and you can pass the exam just one time if you choose us. We offer you free update for one year, and the update version for FCP_FGT_AD-7.4 exam dumps will be sent to your email automatically.

Prominent Features of Dumps4PDF Fortinet FCP_FGT_AD-7.4 Practice Test Questions

High quality and high accuracy FCP_FGT_AD-7.4 real materials like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference, because they are proficient in this exam who are dedicated in this area over ten years. Besides, from economic perspective, our FCP_FGT_AD-7.4 study dumps are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our FCP_FGT_AD-7.4 real materials will make you satisfied. Our FCP_FGT_AD-7.4 exam materials can provide integrated functions. You can learn a great deal of knowledge and get the certificate of the exam at one order like win-win outcome at one try.

Fortinet FCP - FortiGate 7.4 Administrator Sample Questions (Q87-Q92):

NEW QUESTION # 87

Refer to the exhibit.

Firewall policies

ID	Name	From	To	Source	Destination	Schedule	Service	Action	IP Pool	NAT
LAN to WAN 1										
1	Full_Access	LAN (port3)	WAN (port1) WAN (port2)	all	all	always	ALL	ACCEPT	IP Pool	NAT
WAN to LAN 3										
2	Deny	WAN (port1)	LAN (port3)	Deny_IP	all	always	ALL	DENY		
3	Allow_access	WAN (port1)	LAN (port3)	all	Webserver	always	ALL	ACCEPT		Disabled
4	Webserver	WAN (port1)	LAN (port3)	all	Webserver	always	ALL	ACCEPT		Disabled
Implicit 1										
0	Implicit Deny	any	any	all	all	always	ALL	DENY		

Which statement about this firewall policy list is true?

- A. The firewall policies are listed by ID sequence view.
- B. LAN to WAN, WAN to LAN, and Implicit are sequence grouping view lists.
- C. The firewall policies are listed by ingress and egress interfaces pairing view.
- D. The Implicit group can include more than one deny firewall policy.

Answer: C

Explanation:

The firewall policy list in the exhibit is arranged in the "Interface Pair View," where policies are grouped by their incoming (ingress) and outgoing (egress) interface pairs. Each section (LAN to WAN, WAN to LAN, etc.) groups policies based on these interface pairings. This view helps administrators quickly identify which policies apply to specific traffic flows between network interfaces. Options A and D are incorrect because the Implicit group typically does not include more than one deny policy, and there is no "sequence grouping view" in FortiGate. Option B is incorrect as the list is not displayed strictly by ID sequence.

Reference:

FortiOS 7.4.1 Administration Guide: Firewall Policy Views

NEW QUESTION # 88

You have enabled logging on your FortiGate device for Event logs and all Security logs, and you have set up logging to use the FortiGate local disk.

What is the default behavior when the local disk is full?

- A. No new log is recorded until you manually clear logs from the local disk.
- B. Logs are overwritten and the first warning is issued when log disk usage reaches the threshold of 75%.
- C. Logs are overwritten and the only warning is issued when log disk usage reaches the threshold of 95%.
- D. No new log is recorded after the warning is issued when log disk usage reaches the threshold of 95%.

Answer: B

Explanation:

C. Logs are overwritten, and the first warning is issued when log disk usage reaches the threshold of 75%.

When the log disk usage reaches 75%, a warning is issued, and logs are overwritten to make space for new logs. This allows the device to continue logging events while maintaining a threshold to prevent the disk from filling up completely.

First warning 75%, second 90% and final Warning 95%

Only 75% of the disk is available to store logs, this is distributed in the existing vdoms.

Diagnose sys logdisk usage -- CLI command to verify this.

NEW QUESTION # 89

An administrator has configured the following settings:

```
config system settings
set ses-denied-traffic enable
end
config system global
set block-session-timer 30
end
```

What are the two results of this configuration? (Choose two.)

- A. Denied users are blocked for 30 seconds.
- B. Device detection on all interfaces is enforced for 30 seconds.
- C. A session for denied traffic is created.
- D. The number of logs generated by denied traffic is reduced.

Answer: C,D

Explanation:

The timer config any way is by seconds.

ses-denied-traffic Enable/disable including denied session in the session table. block-session-timer Duration in seconds for blocked sessions (1 - 300 sec (5 minutes), default = 30).

C: The number of logs generated by denied traffic is reduced.

D: A session for denied traffic is created.

During the session, if a security profile detects a violation, FortiGate records the attack log immediately.

To reduce the number of log messages generated and improve performance, you can enable a session table entry of dropped traffic. This creates the denied session in the session table and, if the session is denied, all packets of that session are also denied. This ensures that FortiGate does not have to do a policy lookup for each new packet matching the denied session, which reduces CPU usage and log generation. This option is in the CLI, and is called ses-denied-traffic. You can also set the duration for block sessions. This determines how long a session will be kept in the session table by setting block-session-timer in the CLI. By default, it is set to 30 seconds.

NEW QUESTION # 90

Refer to the exhibit.

Network diagram

ID	Name	Source	Destination	Schedule	Service	Action
WAN(port1) → LAN(port3) 2						
2	Deny	Deny_IP	all	always	ALL	DENY
3	Allow_access	all	Web_server	always	ALL	ACCEPT

Firewall address object

Edit Address

Name: Deny_IP

Color: [Change](#)

Type: Subnet

IP/Netmask: 201.0.114.23/32

Interface: WAN(port1)

Static route configuration: ☐

Comments: Deny webserver access. 22/255

The exhibit contains a network diagram, firewall policies, and a firewall address object configuration. An administrator created a Deny policy with default settings to deny Webserver access for Remote-user2. Remote-user2 is still able to access Webserver.

Which two changes can the administrator make to deny Webserver access for Remote-User2? (Choose two.)

- A. Disable match-vip in the Deny policy.
- B. Enable match-vip in the Deny policy.
- C. Set the Destination address as Deny_IP in the Allow-access policy.
- D. Set the Destination address as Web_server in the Deny policy.

Answer: B,D

Explanation:

By default does not match vip in deny policy for destination all. So 2 options we have:

1. Enable match vip in the Deny policy.
2. Add destination as webserver in deny policy. It should set match-vip enable, nor disable it..

NEW QUESTION # 91

Refer to the exhibit.

Administrator

Username: Administrator

Type: Local User

Comments: Write a comment... 0/255

Administrator Profile: prof_admin

Email Address: admin@xyz.com

☐ SMS

☐ Two-factor Authentication

☐ Restrict login to trusted hosts

☐ Restrict admin to guest account provisioning only

The global settings on a FortiGate device must be changed to align with company security policies. What does the Administrator account need to access the FortiGate global settings?

- A. Enable two-factor authentication
- B. Change Administrator profile
- C. Enable restrict access to trusted hosts
- D. Change password

Answer: B

Explanation:

Change Administrator profile

By default, there is a special profile named super_admin, which is used by the account named admin.

You can't change it. It provides full access to everything, making the admin account similar to a root superuser account. The prof_admin is another default profile. It also provides full access, but unlike super_admin, it applies only to its virtual domain-not the global settings of FortiGate. Also, you can change its permissions.

NEW QUESTION # 92

.....

Many people would like to fall back on the most authoritative company no matter when they have any question about preparing for FCP_FGT_AD-7.4 exam. Our company is definitely one of the most authoritative companies in the international market for FCP_FGT_AD-7.4 exam. What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the FCP_FGT_AD-7.4 Training Materials.

FCP_FGT_AD-7.4 Valid Exam Answers: https://www.dumps4pdf.com/FCP_FGT_AD-7.4-valid-braindumps.html

Fortinet FCP_FGT_AD-7.4 Valid Test Duration To meet demands of the new and old customers, our exam products will be sold at a reasonable price, We are sure that our FCP_FGT_AD-7.4 exam dumps on sale are high-quality and can 100% help you achieve your goal, If you do not want to choose our products, you can also try our FCP_FGT_AD-7.4 free demo for your study, Fortinet FCP_FGT_AD-7.4 Valid Test Duration All features of the web-based version are available in the desktop software.

I think you need to listen and monitor, The FCP_FGT_AD-7.4 Valid Exam Answers problem with this design is that it greatly limits the number of devices that can connect to the Internet, To meet demands FCP_FGT_AD-7.4 of the new and old customers, our exam products will be sold at a reasonable price.

2025 Authoritative Fortinet FCP_FGT_AD-7.4 Valid Test Duration

We are sure that our FCP_FGT_AD-7.4 exam dumps on sale are high-quality and can 100% help you achieve your goal, If you do not want to choose our products, you can also try our FCP_FGT_AD-7.4 free demo for your study.

All features of the web-based version are available in the desktop software, You can practice FCP_FGT_AD-7.4 real questions and review our study guide anywhere and anytime.
