In the 21 Century, the {Examcode} certification became more and more recognized in the society because it represented the certain ability of examinees. However, in order to obtain {Examcode} certification, you have to spend a lot of time preparing for the FCP_FGT_AD-7.6 exam. Many people gave up because of all kinds of difficulties before the examination, and finally lost the opportunity to enhance their self-worth. As a thriving multinational company, we are always committed to solving this problem. For example, the FCP_FGT_AD-7.6 Learning Engine we developed can make the FCP_FGT_AD-7.6 exam easy and easy, and we can confidently say that we did this.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.

Topic 2	<ul style="list-style-type: none"> Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 3	<ul style="list-style-type: none"> Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.
Topic 4	<ul style="list-style-type: none"> Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Topic 5	<ul style="list-style-type: none"> Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.

FCP_FGT_AD-7.6 Authentic Exam Hub - FCP_FGT_AD-7.6 Latest Exam Registration

Most people define FCP_FGT_AD-7.6 study tool as regular books and imagine that the more you buy, the higher your grade may be. It is true this kind of view make sense to some extent. However, our FCP_FGT_AD-7.6 real questions are high efficient priced with reasonable amount, acceptable to exam candidates around the world. Our FCP_FGT_AD-7.6 practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. Unlike those untenable practice materials in the market, our FCP_FGT_AD-7.6 practice materials are highly utilitarian for their accuracy of the real exam because all content are compiled by proficient experts who engaged in this area more than ten years. It is our unwavering will to help you pass the exam by FCP_FGT_AD-7.6 study tool smoothly.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q36-Q41):

NEW QUESTION # 36

Refer to the exhibit.

Profile Name :

- Monitoring_Access
- NOC_Access
- prof_admin
- super_admin

The NOC team connects to the FortiGate GUI with the NOC_Access admin profile. They request that their GUI sessions do not disconnect too early during inactivity.

What must the administrator configure to answer this specific request from the NOC team?

- A. Move NOC_Access to the top of the list to ensure all profile settings take effect.

- B. Ensure that all NOC_Access users are assigned the super_admin role to guarantee access
- **C. Increase the admintimeout value under config system accprofile NOC_Access.**
- D. Increase the offline value of the Override Idle Timeout parameter in the NOC_Access admin profile.

Answer: C

Explanation:

The admintimeout setting in the admin access profile controls the inactivity timeout for GUI sessions. Increasing this value will extend the session duration before automatic disconnection.

NEW QUESTION # 37

Refer to the exhibit.

Priority	Details	Type	Action
1	ABC.Com	Application	Allow
2	Excessive-Bandwidth	Filter	Block

An administrator has configured an Application Overrides for the ABC.Com application signature and set the Action to Allow. This application control profile is then applied to a firewall policy that is scanning all outbound traffic. Logging is enabled in the firewall policy. To test the configuration, the administrator accessed the ABC.Com web site several times.

Why are there no logs generated under security logs for ABC.Com?

- A. The ABC.Com is configured under application profile, which must be configured as a web filter profile.
- B. The ABC.Com is hitting the category Excessive-Bandwidth.
- C. The ABC.Com Type is set as Application instead of Filter.
- **D. The ABC.Com Action is set to Allow.**

Answer: D

Explanation:

When the action is set to Allow in an application override, traffic matching this override is allowed without generating security logs because it bypasses deeper inspection and blocking.

NEW QUESTION # 38

Refer to the exhibits.

Network diagram

NAT IP pool configuration

Name	External IP Range	Type	ARP Reply
SNAT-Pool	100.65.0.49 - 100.65.0.49	Overload	<input checked="" type="checkbox"/> Enabled
SNAT-Remote	100.65.0.149 - 100.65.0.149	Overload	<input checked="" type="checkbox"/> Enabled
SNAT-Remote1	100.65.0.99 - 100.65.0.99	Overload	<input checked="" type="checkbox"/> Enabled

Firewall policies

Policy	Source	Destination	Schedule	Service	Action	IP Pool	NAT
LAN (port4) → WAN (port2)							
TCP traffic (2)	all	BR1-FGT	always	ALL_TCP	✓ ACCEPT	SNAT-Pool	<input checked="" type="checkbox"/> NAT
PING traffic (3)	all	all	always	PING	✓ ACCEPT	SNAT-Remote1	<input checked="" type="checkbox"/> NAT
IGMP traffic (4)	all	all	always	IGMP	✓ ACCEPT	SNAT-Remote	<input checked="" type="checkbox"/> NAT

The exhibits show a diagram of a FortiGate device connected to the network, as well as the IP pool configuration and firewall policy objects.

The WAN (port2) interface has the IP address 100.65.0.101/24.

The LAN (port4) interface has the IP address 10.0.11.254/24.

Which IP address will be used to source NAT (SNAT) the traffic, if the user on HQ-PC-1 (10.0.11.50) pings the IP address of BR-FGT (100.65.1.111)

- A. 100.65.0.49
- B. 100.65.0.149
- C. 100.65.0.99**
- D. 100.65.0.101

Answer: C

Explanation:

The ping traffic policy uses the IP pool named SNAT-Remote1, which has the external IP range 100.65.0.99.

Therefore, traffic matching this policy (ping from HQ-PC-1 to BR1-FGT) will use 100.65.0.99 for source NAT.

NEW QUESTION # 39

Which two statements are true about an HA cluster? (Choose two.)

- A. An HA cluster cannot have both in-band and out-of-band management interfaces at the same time.
- B. When sniffing the heartbeat interface, the administrator must see the IP address 169.254.0.2.
- C. Link failover triggers a failover if the administrator sets the interface down on the primary device.**
- D. HA incremental synchronization includes FIB entries and IPsec SAs.

Answer: C,D

Explanation:

Setting an interface down on the primary device triggers a failover due to link failover detection.

HA incremental synchronization includes forwarding information base (FIB) entries and IPsec security associations (SAs) to maintain session continuity.

NEW QUESTION # 40

What are three key routing principles in SD-WAN? (Choose three.)

- A. SD-WAN rules have precedence over any other type of routes.
- B. Regular policy routes have precedence over SD-WAN rules.
- C. By default, SD-WAN rules are skipped if the included SD-WAN members do not have a valid route to the destination.
- D. By default, SD-WAN rules are skipped if only one route to the destination is available.
- E. By default, SD-WAN rules are skipped if the best route to the destination is not an SD-WAN member.

Answer: A,C,E

Explanation:

SD-WAN rules are skipped if none of the SD-WAN members have a valid route to the destination.

SD-WAN rules take precedence over other route types.

SD-WAN rules are skipped if the best route to the destination is not an SD-WAN member by default.

NEW QUESTION # 41

.....

DumpsReview provides proprietary preparation guides for the certification exam offered by the FCP_FGT_AD-7.6 exam dumps. In addition to containing numerous questions similar to the FCP_FGT_AD-7.6 Exam, the FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) exam questions are a great way to prepare for the Fortinet FCP_FGT_AD-7.6 exam dumps.
