

2025 Fortinet NSE7_EFW-7.2: Fortinet NSE 7 - Enterprise Firewall 7.2 Unparalleled Valid Exam Prep

P.S. Free 2025 Fortinet NSE7_EFW-7.2 dumps are available on Google Drive shared by ExamDiscuss:
https://drive.google.com/open?id=1iHe7tVWNP6u_wg13_jjcwJDltxfAcB-e

We would like to provide our customers with different kinds of NSE7_EFW-7.2 practice torrent to learn, and help them accumulate knowledge and enhance their ability. Besides, we guarantee that the questions of all our users can be answered by professional personal in the shortest time with our NSE7_EFW-7.2 study guide. One more to mention, we can help you make full use of your sporadic time to absorb knowledge and information. In a word, compared to other similar companies aiming at NSE7_EFW-7.2 Test Prep, the services and quality of our NSE7_EFW-7.2 exam questions are highly regarded by our customers and potential clients.

In order to meet the needs of all customers, Our NSE7_EFW-7.2 study torrent has a long-distance aid function. If you feel confused about our NSE7_EFW-7.2 test torrent when you use our products, do not hesitate and send a remote assistance invitation to us for help, we are willing to provide remote assistance for you in the shortest time. We have professional IT staff, so your all problems about Fortinet NSE 7 - Enterprise Firewall 7.2 guide torrent will be solved by our professional IT staff. We can make sure that you will enjoy our considerate service if you buy our NSE7_EFW-7.2 study torrent. There are many IT staffs online every day; you can send your problem, we are glad to help you solve your problem. If you have any question about our NSE7_EFW-7.2 test torrent, do not hesitate and remember to contact us.

NSE7_EFW-7.2 Sample Exam - NSE7_EFW-7.2 Reliable Study Questions

Choose NSE7_EFW-7.2 premium files, you will pass for sure. Each questions & answers of NSE7_EFW-7.2 free training pdf are edited and summarized by our specialist with utmost care and professionalism. The Fortinet NSE7_EFW-7.2 latest online test is valid and really trustworthy for you to rely on. The highly relevant content & best valid and useful NSE7_EFW-7.2 Exam Torrent will give you more confidence and help you pass easily.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q52-Q57):

NEW QUESTION # 52

Refer to the exhibits, which contain the network topology and BGP configuration for a hub.
Exhibit A.

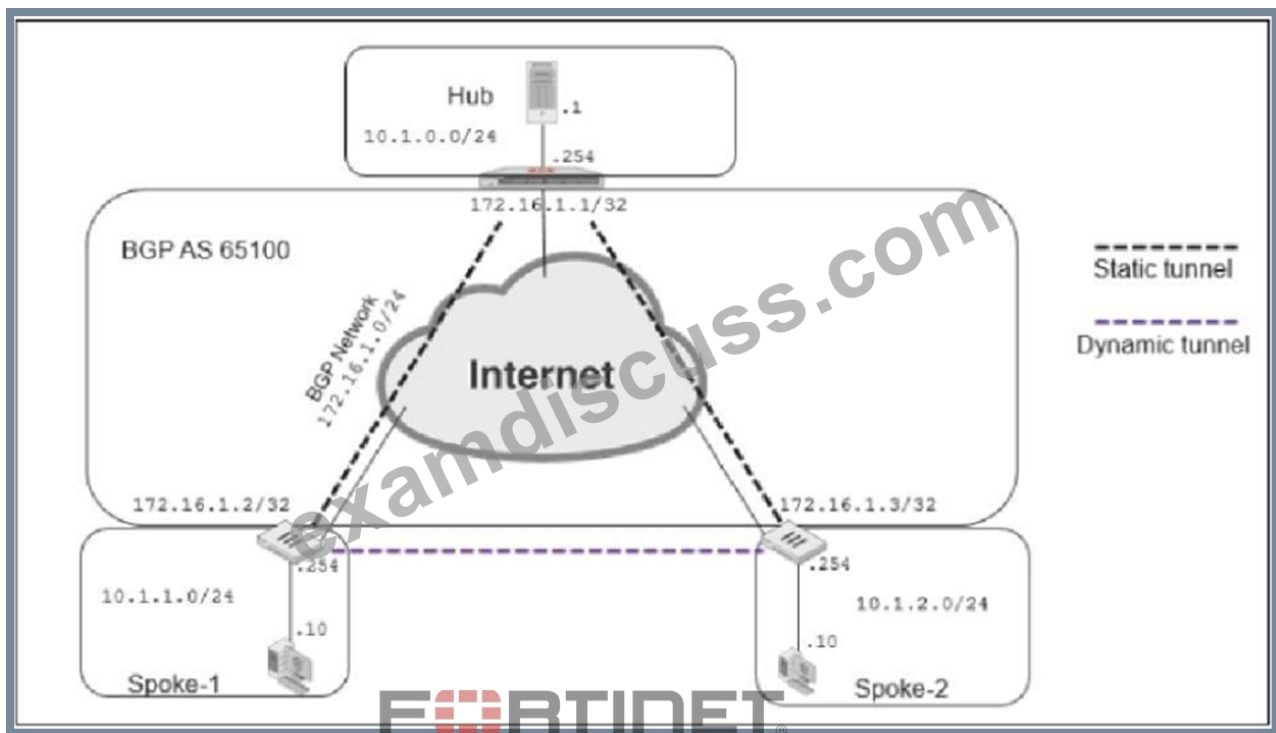

Exhibit B.

```

Hub # show router bgp
config router bgp
  set as 65100
  set router-id 172.16.1.1
  config neighbor-group
    edit "advpn"
      set remote-as 65100

      set route-reflector-client disable
    next
  end
  config neighbor-range
    edit 1
      set prefix 172.16.1.0 255.255.255.0
      set neighbor-group "advpn"
    next
  end
  config network
    edit 1
      set prefix 10.1.0.0 255.255.255.0
    next
  end
  ....
end

```

An administrator is trying to configure ADVPN with a hub and spoke VPN setup using iBGP. All the VPNs are up and connected to the hub. The hub is receiving route information from both spokes over iBGP; however the spokes are not receiving route information from each other.

What change must the administrator make to the hub BGP configuration so that the routes learned from one spoke are forwarded to the other spoke?

- A. Configure the hub as a route reflector
- B. Add a prefix list to the hub that permits routes to be shared between the spokes
- C. Configure auto-discovery-sender on the hub
- D. Enable route redistribution under config router bgp

Answer: A

Explanation:

If you are using iBGP for advpn, you must configure the hub as a route reflector. So, routes learned from one spoke are forwarded to the other spokes.

NEW QUESTION # 53

Exhibit.

```

config vpn ipsec phase1-interface
edit "tunnel"
set interface "port1"
set ike-version 2
set keylife 28800
set peertype any
set net-device enable
set proposal aes128-gcm-prfsha256 aes256gcm-prfsha384
set auto-discovery-receiver enable
set remote-gw 10.64.1.1
set psksecret fortinet
next

```

Refer to the exhibit, which contains the partial ADVPN configuration of a spoke. Which two parameters must you configure on the corresponding single hub? (Choose two.)

- A. Set auto-discovery-receiver enable
- B. Set auto-discovery-sender enable
- C. Set ike-version 2
- D. Set auto-discovery-forwarder enable

Answer: B,D

Explanation:

For an ADVPN spoke configuration shown, the corresponding hub must have auto-discovery-sender enabled to send shortcut advertisement messages to the spokes. Also, the hub would need to have auto-discovery-forwarder enabled if it is to forward on those shortcut advertisements to other spokes. This allows the hub to inform all spokes about the best path to reach each other. The ike-version does not need to be reconfigured on the hub if it's already set to version 2 and auto-discovery-receiver is not necessary on the hub because it's the one sending the advertisements, not receiving.

NEW QUESTION # 54

Refer to the exhibit, which contains an ADVPN network diagram and a partial BGP configuration.

Network diagram

Partial BGP configuration

```
Hub # show router bgp
config router bgp
  set as 65100
  set router-id 172.16.1.1
  config neighbor-group
    edit "advpn"
      set remote-as 65100
      ...
    next
  end
  ...
end
```

Which two parameters should you configure in config neighbor-range? (Choose two.)

- A. set prefix 10.1.0 255.255.254.0
- B. set route-reflector-client enable
- C. set prefix 172.16.1.0 255.255.255.0
- D. set neighbor-group advpn

Answer: C,D

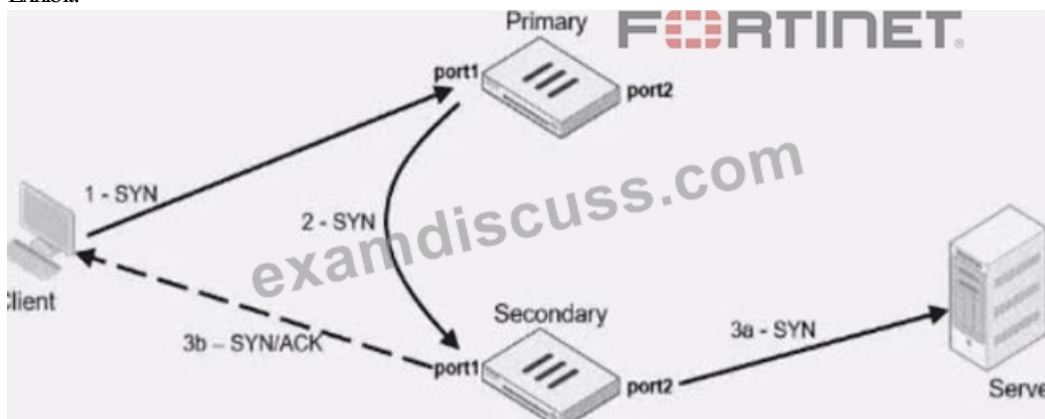

Explanation:

In the ADVPN configuration for BGP, you should specify the prefix that the neighbors can advertise. Option A is correct as you would configure the BGP network prefix that should be advertised to the neighbors, which matches the BGP network in the diagram. Option C is also correct since you should reference the neighbor group configured for the ADVPN setup within the BGP configuration.

NEW QUESTION # 55

Exhibit.

Refer to the exhibit, which contains an active-active load balancing scenario.

During the traffic flow the primary FortiGate forwards the SYN packet to the secondary FortiGate.

What is the destination MAC address or addresses when packets are forwarded from the primary FortiGate to the secondary FortiGate?

- **A. Secondary physical MAC port1**
- B. Secondary physical MAC port2 then virtual MAC port2
- C. Secondary virtual MAC port1 then physical MAC port1
- D. Secondary virtual MAC port1

Answer: A

Explanation:

In an active-active load balancing scenario, when the primary FortiGate forwards the SYN packet to the secondary FortiGate, the destination MAC address would be the secondary's physical MAC on port1, as the packet is being sent over the network and the physical MAC is used for layer 2 transmissions.

NEW QUESTION # 56

Which statement about meta fields is true?

- A. Meta field changes are applied only at the ADOM level.
- B. Meta fields can be used as variables in scripts or provisioning templates.
- **C. Meta fields are useful for creating multiple objects with the same logical name but different values.**
- D. Meta fields must be set to required.

Answer: C

Explanation:

Meta fields are useful when an enterprise has global offices or branches and the FortiManager administrator must create multiple objects with the same logical name, but different values.

NEW QUESTION # 57

.....

We hope you can find the information you need at any time while using our NSE7_EFW-7.2 study materials. In addition to the content updates, our system will also be updated for the NSE7_EFW-7.2 training materials. If you have any opinions, you can tell us that our common goal is to create a product that users are satisfied with. We have three different NSE7_EFW-7.2 Exam Braindumps for you to choose: the PDF, Software and APP online. And the varied displays can help you study at any time and condition.
