We keep updating our Certified Agile Scrum Product Owner (CASPO) (CASPO-001) preparation material after getting feedback from professionals. A 24/7 customer is available at VCE4Plus to help customers in the right way and solve their problems quickly.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q66-Q71):

NEW QUESTION # 66

The Product Owner is accountable for the functionality included in each Increment. Does he or she have the final say over the definition of "Done"?

- A. No, the Scrum Team is responsible for the definition of "Done". The Product Owner may be consulted.
- B. Yes, the Product Owner is responsible for the definition of "Done". The Developers may be consulted.

Answer: A

Explanation:

The Scrum Guide clarifies that the definition of "Done" is a shared commitment created by the Scrum Team:

"The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product." While the Product Owner defines what goes into the Increment (via the Product Backlog), the definition of "Done" is a collaborative effort, often driven by the Developers' technical expertise and organizational standards, with input from the Product Owner on value and quality expectations.

Option A incorrectly gives the Product Owner sole authority, while B correctly reflects the team's collective responsibility, with the Product Owner as a contributor, not the final arbiter.

NEW QUESTION # 67

True or False: There must be a release every Sprint.

- A. False
- B. True

Answer: A

Explanation:

Scrum requires a "potentially releasable" Increment each Sprint, but actual release is at the Product Owner's discretion. The Scrum Guide states: "The Increment must be usable... The Product Owner may choose to release it immediately."

* A: False-release isn't mandatory.

NEW QUESTION # 68

Why would the Product Owner concern themselves with technical debt? (Choose the best answer)

- A. The total cost of ownership (TCO) of the product will be impacted if technical debt is present and grows
- B. They wouldn't, it is an issue for Developers

- C. The Scrum Master is responsible for technical debt management

Answer: A

Explanation:

Technical debt affects product value, a Product Owner's core concern. The Scrum Guide doesn't explicitly mention technical debt, but the Product Owner's accountability for "maximizing the value of the product" implies considering factors like TCO, which rises with debt due to rework or maintenance costs.

* A: Correct—debt impacts long-term value and cost.

* B: The Scrum Master facilitates, not manages debt.

NEW QUESTION # 69

The purpose of a Sprint Retrospective is for the Scrum Team to: (Choose the best answer)

- A. Review stories planned for the next Sprint and provide estimates
- B. The Product Owner
- C. Demonstrate completed User Stories to the Product Owner
- D. Inspect how the last Sprint went and plan improvements for the next Sprint

Answer: D

Explanation:

The Sprint Retrospective is a key Scrum event focused on continuous improvement. The Scrum Guide defines its purpose explicitly as an opportunity for the Scrum Team (Product Owner, Scrum Master, and Developers) to reflect on the past Sprint and identify actionable ways to enhance their effectiveness and quality in the next Sprint. Option C— "Inspect how the last Sprint went and plan improvements for the next Sprint"—accurately captures this intent, aligning with Scrum's empirical pillars of inspection and adaptation.

Let's evaluate all options:

* A (Review stories planned for the next Sprint and provide estimates): This pertains to Sprint Planning or Product Backlog refinement, not the Retrospective. The Retrospective focuses on past performance, not future planning of specific stories or estimation.

* B (Demonstrate completed User Stories to the Product Owner): This describes the Sprint Review, where the Increment is showcased to stakeholders, not the Retrospective, which is an internal team event.

* C: Correct—the Retrospective is about inspecting the last Sprint (e.g., processes, interactions, tools) and adapting by planning improvements, making it the best answer.

NEW QUESTION # 70

What pre-conditions must be fulfilled in order to allow Sprint Planning to begin? (Choose the best answer)

- A. A fully refined Product Backlog
- B. Enough "Ready" Product Backlog to fill the Sprint
- C. A clear and non-negotiable Sprint Goal
- D. Formal budget approval to conduct another Sprint
- E. There are no such pre-conditions
- F. A clear but negotiable business objective for the Sprint

Answer: E

Explanation:

Scrum imposes no formal pre-conditions for Sprint Planning beyond the Sprint starting. The Scrum Guide states: "Sprint Planning initiates the Sprint by laying out the work to be performed for the Sprint."

* A: A fully refined backlog isn't required; refinement is ongoing.

* B: Budget approval isn't a Scrum concept.

* C, D: The Sprint Goal is defined during, not before, Sprint Planning.

* E: Some "Ready" items help, but it's not mandatory; planning can refine items.

NEW QUESTION # 71

.....

The pass rate is 98.95% for the CASPO-001 exam torrent, and you can pass the exam if you choose us. The CASPO-001 exam dumps we recommend to you are the latest information we have, with that you can know the information of the exam center timely.
