And you will enjoy the Terraform-Associate-003 test guide freely for one year, which can save your time and money. We will send you the latest Terraform-Associate-003 study materials through your email.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q65-Q70):

NEW QUESTION # 65
In a Terraform Cloud workpace linked to a version control repository speculative plan rum start automatically commit changes to version control.

- A. False
- B. True

Answer: B

Explanation:
When you use a remote backend that needs authentication, HashiCorp recommends that you:

NEW QUESTION # 66
You have provisioned some virtual machines (VMs) on Google Cloud Platform (GCP) using the gcloud command line tool. However, you are standardizing with Terraform and want to manage these VMs using Terraform instead. What are the two things you must do to achieve this? Choose two correct answers.

- A. Run the terraform Import-gcp command
- B. Provision new VMs using Terraform with the same VM names
- C. Write Terraform configuration for the existing VMs
- D. Use the terraform import command for the existing VMs

Answer: C,D

Explanation:
To import existing resources into Terraform, you need to do two things1:
Write a resource configuration block for each resource, matching the type and name used in your state file.
Run terraform import for each resource, specifying its address and ID. There is no such command as terraform Import-gcp, and provisioning new VMs with the same names will not import them into Terraform.

NEW QUESTION # 67
You have declared a variable called var.list which is a list of objects that all have an attribute id . Which options will produce a list of the IDs? Choose two correct answers.

- A. { for o in var.llst : o => o.id }
- B. [var.list [*] , id]
- C. [for o in var.list : o.Id]
- D. var.list[*].id

Answer: C,D

Explanation:
These are two ways to produce a list of the IDs from a list of objects that have an attribute id, using either a for expression or a splat expression syntax.

NEW QUESTION # 68
You have multiple team members collaborating on infrastructure as code (IaC) using Terraform, and want to apply formatting standards for readability.
How can you format Terraform HCL (HashiCorp Configuration Language) code according to standard Terraform style convention?

- A. Run the terraform fmt command during the code linting phase of your CI/CD process Most Voted
- B. Manually apply two spaces indentation and align equal sign "=" characters in every Terraform file (*.tf)
- C. Designate one person in each team to review and format everyone's code
- D. Write a shell script to transform Terraform files using tools such as AWK, Python, and sed

Answer: A

NEW QUESTION # 69
When should you run terraform init?

- A. After you start coding a new terraform project and before you run terraform plan for the first time.
- B. After you run terraform plan for the time in a new terraform project and before you run terraform apply
- C. Every time you run terraform apply
- D. Before you start coding a new Terraform project

Answer: A

Explanation:
You should run terraform init after you start coding a new Terraform project and before you run terraform plan for the first time. This command will initialize the working directory by downloading the required providers and modules, creating the initial state file, and performing other necessary tasks. Reference = : Initialize a Terraform Project

NEW QUESTION # 70
......
