Salesforce Certified Advanced Administrator Sample Questions (Q188-Q193):

NEW QUESTION # 188

An administrator needs a business process automated, but only for certain users and profiles. The administrator will need to frequently update which users and profiles will use the process. After evaluating the declarative options, it was determined that this functionality must be done via an Apex trigger.

What software requirement should the administrator request so that process execution can be declaratively controlled?

- A. Use a System permission that is assigned to the user or profile.
- **B. Use a custom permission set that is assigned to the user.**
- C. Use Apex Class Access to assign the Apex code to the user or profile.
- D. Use Process Automation Setting in Setup to the appropriate users or profiles.

Answer: B

Explanation:

Explanation

Use a custom permission set that is assigned to the user because custom permissions are a way to grant access to custom processes or functionality based on user profiles or permission sets. Custom permissions can be referenced by Apex code, validation rules, flows, or other logic to control whether a process should run for a user or not. Custom permissions can be used to declaratively control process execution by assigning them to users or profiles.

NEW QUESTION # 189

The VP of finance noticed incomplete information on the record that indicates if the borrower was approved or offered an alternate product. This information is collected mid-way through the sales cycle in a picklist.

How should the administrator ensure this Add is completed prior to closing the opportunity?

- A. Create a workflow rule.
- B. Make the field required in field-level security.
- C. Make the field required on the page layout.
- **D. Create a validation rule,**

Answer: D

NEW QUESTION # 190

Cloud Kicks has a Process Builder which should trigger upon a status change from on approval process. The Process Builder triggers if the status is updated manually, but not as a result of the approval process update.

What could the administrator do to troubleshoot the issue?

- A. Change the value with a Specific New Field Value so the Process Builder knows what value to look for.
- **B. Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action.**
- C. Check the Approval Process to make sure it is on the correct version.
- D. Turn Recursion the Process Builder under the Advanced Settings so the Process Builder fires again.

Answer: B

Explanation:

Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action is what the administrator should do to troubleshoot the issue. This option allows the approval process field update to trigger any workflow rules or processes that are based on the updated field value. If this option is not checked, the approval process field update will not trigger any workflow rules or processes, and the Process Builder will not fire.

NEW QUESTION # 191

To set the default level of access for users to be able to access each other's records, you would use:

Select one:

- **A. Organization Wide Defaults.**
- B. Territory Management
- C. Sharing Rules.
- D. The Role Hierarchy.

Answer: A
