Certificate EMEA-Advanced-Support Exam | EMEA-Advanced-Support Valid Exam Pattern

Our company is a multinational company which is famous for the EMEA-Advanced-Support training materials in the international market. After nearly ten years' efforts, now our company have become the topnotch one in the field, therefore, if you want to pass the EMEA-Advanced-Support exam as well as getting the related certification at a great ease, I strongly believe that the study materials compiled by our company is your solid choice. To be the best global supplier of electronic study materials for our customers through innovation and enhancement of our customers' satisfaction has always been our common pursuit. The advantages of our EMEA-Advanced-Support Study Guide are as follows.

Fortinet EMEA Advanced Support Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

Link aggregation allows network devices to _____

- A. Increase bandwidth of an interface
- B. Increase bandwidth by binding physical interfaces into a single channel
- C. Restrict the bandwidth
- D. None of the above

Answer: B

Explanation:

Link aggregation, also known as IEEE 802.3ad or 802.1ax, enables the binding of multiple physical interfaces to form a single logical interface, which increases the overall bandwidth and provides redundancy. This is achieved by combining the bandwidth of the individual links into one aggregated link. For example, if two

1Gbps interfaces are aggregated, the logical link can provide up to 2Gbps bandwidth. This configuration is commonly used in FortiGate devices to enhance network performance without replacing hardware. The option B correctly describes this by stating "Increase bandwidth by binding physical interfaces into a single channel," which aligns with the official description. Incorrect options include A, which is vague and does not specify the method of binding multiple interfaces; C, which is the opposite of the purpose; and D, which is invalid.

Exact extract: Link aggregation (IEEE 802.3ad/802.1ax) enables you to bind two or more physical interfaces together to form an aggregated (combined) link. This new link ... Link aggregation combines multiple physical interfaces into a single logical interface, increasing bandwidth and link redundancy. Traffic is distributed evenly.

NEW QUESTION # 12

In FortiGate, what is the purpose of the 'set webfilter-profile' command in a firewall policy?

- A. Sets the web server authentication profile
- B. Enables deep packet inspection for web traffic
- C. Applies a web filtering profile to block or allow URLs
- D. Configures the web proxy settings

Answer: C

Explanation:

The 'set webfilter-profile' command applies a web filtering profile to a firewall policy, enabling URL blocking or allowing based on categories or specific URLs. It does not enable DPI (B), configure proxies (C), or set authentication (D). Exact extract: "The 'set webfilter-profile' command applies a web filtering profile to a firewall policy, controlling access to websites based on URL categories or specific URLs."

NEW QUESTION # 13

Which of the following Authentication protocols uses clear text?

- A. CHAP
- B. MSCHAP
- C. EAP
- D. PAP

Answer: D

Explanation:

PAP (Password Authentication Protocol) sends username and password in clear text over the network, making it insecure. CHAP uses challenge-response with hash, MSCHAP is Microsoft variant with hash, EAP is extensible and can use various methods but not inherently clear text. Exact extract: It's "impossible" to authenticate wireless users based on EAP-PEAP sessions against OpenLdap, except, if the users using clear text authentication methods (PAP). Clear text HTTP authentication is not secure. All user names and data (and, depending on the authentication style, passwords) are sent in clear text. If you ... Fortinet ... Password Authentication Protocol (PAP). Used to authenticate PPP connections. Transmits passwords and other user information in clear text. The default token page contains a "Token Code:" text field. Recommended customization. It's recommended to delete the "Token Code:" text. FortiWeb will use ... If you follow the configuration guide for NPS you'll see (step 9) you need to enable "Unencrypted authentication (PAP, SPAP)" (link below).

NEW QUESTION # 14

What does the FortiGate 'set nat enable' command do in a firewall policy?

- A. Disables NAT for the policy
- B. Forces NAT to use a specific IP pool
- C. Enables NAT for outgoing traffic
- D. Enables NAT for incoming traffic only

Answer: C

Explanation:

The 'set nat enable' command in a FortiGate firewall policy enables Source NAT (SNAT) for outgoing traffic, typically rewriting the source IP to the FortiGate's interface IP or an IP pool. It does not disable NAT (B), force a specific pool (C), or limit to incoming traffic (D). Exact extract: "The 'set nat enable' command in a firewall policy enables Source NAT, rewriting the source IP address of outgoing traffic to the egress interface IP or a configured NAT pool."

NEW QUESTION # 15

Hybrid cloud means that

- A. One customer uses VMs with multiple different operating systems in the same cloud account
- B. The cloud provider uses AMD, Intel and possibly also other CPU vendors
- C. Some of the customer's systems are virtualized in the public cloud and some are in the local datacenter
- D. Cloud provider provides both 32-bit and 64-bit virtual machines

Answer: C

Explanation:

A hybrid cloud combines on-premises infrastructure (local datacenter) with public cloud resources, allowing workloads to operate across both environments for flexibility and scalability. Fortinet solutions like FortiGate- VM support hybrid cloud deployments. Option A refers to hardware diversity, C to OS variety, and D to architecture types, none of which define hybrid cloud. Exact extract: "Hybrid cloud is the combination of public cloud services with an on-premises private cloud or datacenter... This allows customers to run some systems in the public cloud and others in their local datacenter, managed seamlessly."

NEW QUESTION # 16

.....

Since Fortinet EMEA-Advanced-Support Certification is so popular and our VerifiedDumps can not only do our best to help you pass the exam, but also will provide you with one year free update service, so to choose VerifiedDumps to help you achieve your dream. For tomorrow's success, is right to choose VerifiedDumps. Selecting VerifiedDumps, you will be an IT talent.
