2025 High Pass-Rate 100% Free H12-725_V4.0–100% Free Dumps Cost | H12-725_V4.0 Exam Vce

DOWNLOAD the newest Exam4Labs H12-725_V4.0 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1SBX5i7kXz0kQ-wY-LjkehwFnP8eE7f9f

As we know that thousands of people put a premium on obtaining H12-725_V4.0 certifications to prove their ability. With the difficulties and inconveniences existing for many groups of people like white-collar worker, getting a H12-725_V4.0 certification may be draining. Therefore, choosing a proper H12-725_V4.0 exam guide can pave the path for you which is also conductive to gain the certification efficiently. So why should people choose us? Because the high pass rate of our H12-725_V4.0 Latest Practice Materials is more than 98% and you will pass the H12-725_V4.0 exam easily to get the dreaming certification.

Huawei H12-725_V4.0 Certification Exam is a highly respected credential in the ICT security industry. It demonstrates to employers that an individual has the skills and knowledge necessary to protect their organization's data and assets from cyber threats.

How Huawei H12-725_V4.0 PDF Dumps is essential on your H12-725_V4.0 Exam Questions Certain Success

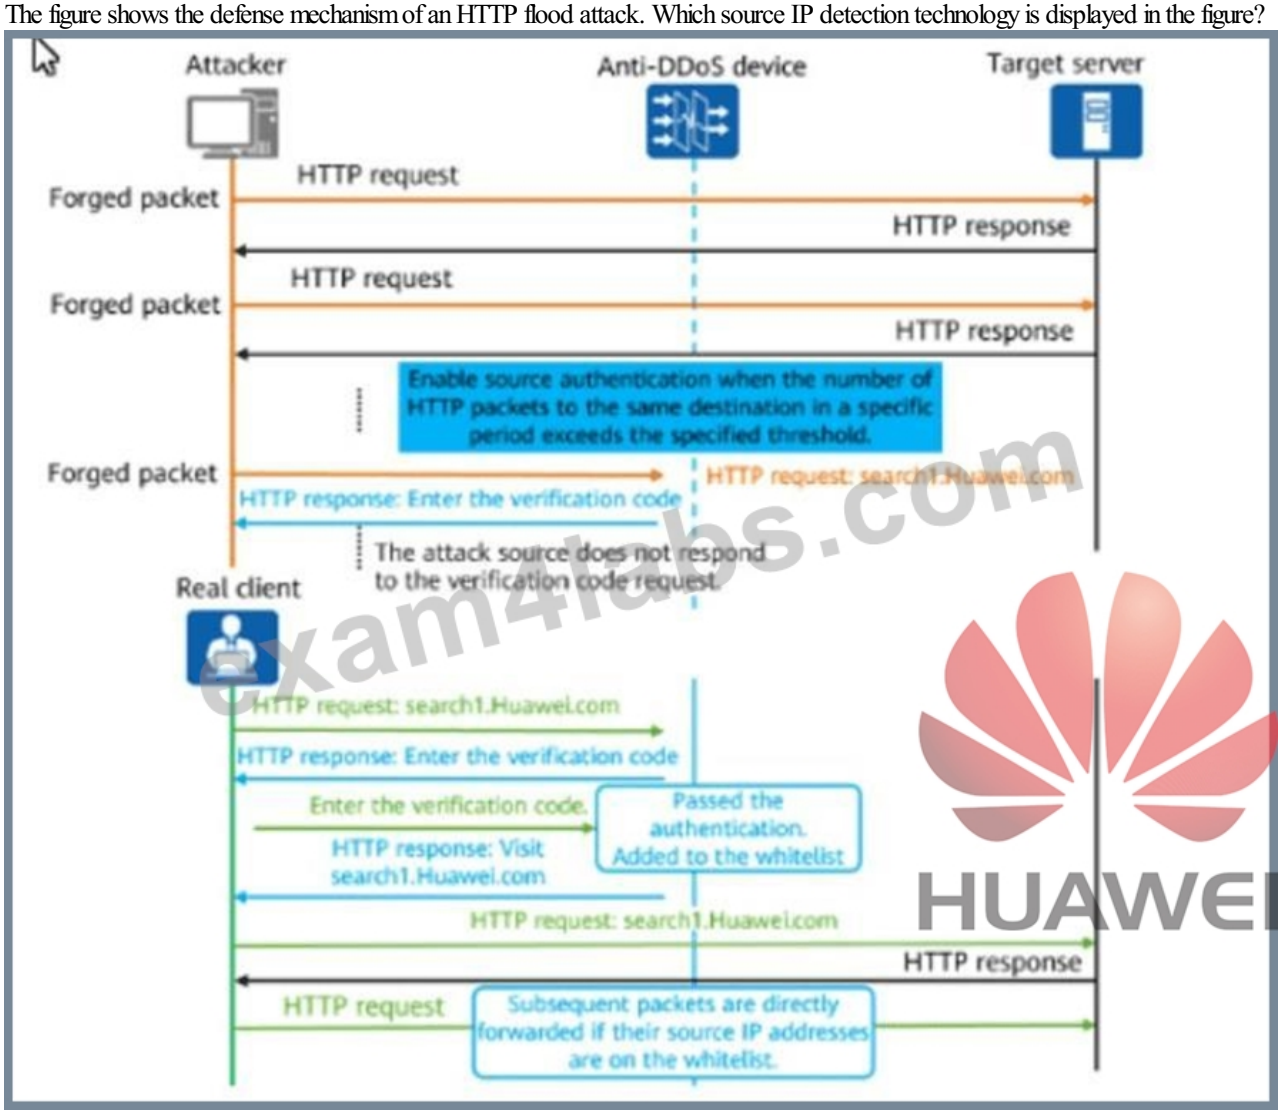
Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to

the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the test H12-725_V4.0 certification can make them become that kind of people and if you are one of them buying our H12-725_V4.0 Study Materials will help you pass the test smoothly with few efforts needed. Our H12-725_V4.0 exam questions are valuable and useful and if you buy our product will provide first-rate service to you to make you satisfied.

Huawei H12-725_V4.0 (HCIP-Security V4.0) Exam is a certification exam that tests the knowledge and skills of IT professionals in the field of security. H12-725_V4.0 exam is designed to validate the candidate's ability to plan, design, implement, operate, and troubleshoot security solutions for enterprise networks. HCIP-Security V4.0 certification is intended for professionals who have experience in security technologies and want to enhance their knowledge and skills to the advanced level.

Huawei HCIP-Security V4.0 Sample Questions (Q24-Q29):

NEW QUESTION # 24
The figure shows the defense mechanism of an HTTP flood attack. Which source IP detection technology is displayed in the figure?



- A. Basic mode
- B. 302 redirect mode
- C. Enhanced mode
- D. URI monitoring

Answer: C

Explanation:
1##Understanding HTTP Flood Attacks:
* An HTTP flood attackis a type of DDoS attack where an attacker sendsa large number of HTTP requeststo a target server, overloading its resources.
* Attackers often use botnets or spoofed IP addressesto send forged HTTP requests, making it difficult to differentiate between legitimate and malicious traffic.

2##What is Happening in the Figure?
* TheAnti-DDoS devicedetects an abnormally high number of HTTP requests from certain IPs.
* Itchallenges suspicious clientsby requiring them to complete an authentication step (such as entering a verification code).
* Legitimate users can pass the authentication and get whitelisted, while bots and attackers fail to respond and are blocked.
3##Why is "Enhanced Mode" the Correct Answer?
* Enhanced Modeis an advancedsource IP detection technologythat uses verificationcodes or JavaScript challenges to distinguish real users from bots.
* Key features of Enhanced Mode:
* Verification challenge(e.g., CAPTCHA, JavaScript check).
* Whitelisting of verified usersto prevent further verification delays.
* Blocks attack sources that fail to respond to verification.
* In the figure, the systemprompts suspicious users to enter a verification codebefore allowing further access.
* Attackers typicallydo not respond, while legitimate userscomplete the challenge and continue browsing normally.
HCIP-Security References:
* Huawei HCIP-Security Guide# HTTP Flood Attack Protection
* Huawei Anti-DDoS Solution Guide# Source IP Detection Methods
* Huawei WAF Documentation# Enhanced Mode for Web Attack Mitigation

NEW QUESTION # 25
Which of the following is not a response action for abnormal file identification?

- A. Block
- B. Delete
- C. Alert
- D. Allow

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
* Response actions for abnormal file identification in Huawei firewalls include:
* A. Alert# Logs the event but does not stop the file.
* B. Block# Prevents the file from being accessed or downloaded.
* D. Delete# Removes the malicious file before it reaches the user.
* Why is C incorrect?
* Allowing an identified abnormal file defeats the purpose of security enforcement.
HCIP-Security References:
* Huawei HCIP-Security Guide # File Anomaly Detection & Response

NEW QUESTION # 26
In the figure, enterprise A and enterprise B need to communicate securely, and an IPsec tunnel is established between firewall A and firewall B. Which of the following security protocols and encapsulation modes can meet the requirements of this scenario?

- A. AH+ESP; transport mode
- B. AH; tunnel mode
- C. ESP; transport mode
- D. ESP; tunnel mode

Answer: D

Explanation:
1##Understanding the Scenario:
* Enterprise A and Enterprise B communicate over the Internet through an IPsec tunnel.
* Firewall A and Firewall B establish the tunnelto secure traffic between the enterprises.
* The network includes aSource NAT device, meaning IP headers may be modified.
* The goal is to ensure confidentiality, integrity, and authentication of data transmission.
2##Why ESP (Encapsulating Security Payload)?
* ESP (Encapsulating Security Payload)provides:
* Encryption (Confidentiality)# Protects data from eavesdropping.

* Integrity & Authentication# Ensures data is not modified.
* NAT Traversal Support# Works through NAT devices, unlike AH (Authentication Header).
* ESP is the preferred choice for VPN tunnels over the public Internet.
3##Why Tunnel Mode?
* Tunnel Mode encapsulates the entire original IP packet, including headers and payload,adding a new IP header.
* Advantages of Tunnel Mode:
* Protects both the data and the original IP addresses(important for communication over untrusted networks).
* Used in site-to-site VPNswhere private network addresses need to be hidden.
HCIP-Security References:
* Huawei HCIP-Security Guide# IPsec VPN Fundamentals
* Huawei USG Series Firewall Configuration Guide# IPsec ESP vs. AH
* RFC 4301 (Security Architecture for the Internet Protocol)# ESP and Tunnel Mode Usage

NEW QUESTION # 27
Which of the following statements is false about Eth-Trunk?(Select All that Apply)

- A. The manual mode can detect not only link disconnections but also link faults and incorrect connections.
- B. If a member interface of the Eth-Trunk interface is Down, traffic can still be transmitted through other member interfaces.
- C. The physical interfaces that are bundled into an Eth-Trunk interface are its member interfaces.
- D. The total bandwidth of an Eth-Trunk interface is the sum of the bandwidths of all its member interfaces. This increases the interface bandwidth.

Answer: A

Explanation:
Comprehensive and Detailed Explanation:
* Eth-Trunk (Ethernet Trunking)aggregates multiplephysical linksinto asingle logical interface, improvingbandwidth and redundancy.
* Manual mode limitations:
* Manual mode does NOT detect link faults or incorrect connections-it only detects link disconnections.
* To detectlink faults,LACP (Link Aggregation Control Protocol) modeis required.
* Why is D false?
* Manual mode canonly detect link disconnectionsbutnot link faults or incorrect connections.
HCIP-Security References:
* Huawei HCIP-Security Guide # Eth-Trunk Configuration
* Huawei USG6000 Firewalls Link Aggregation Guide

NEW QUESTION # 28
iMaster NCE-Campus has a built-in LDAP module that enables it to function as an LDAP server to interconnect with access devices through LDAP.

- A. FALSE
- B. TRUE

Answer: A

Explanation:
Comprehensive and Detailed Explanation:
* iMaster NCE-Campus does not have a built-in LDAP server.Instead, it integrates with external authentication servers such as:
* RADIUS servers
* Active Directory (AD) with LDAP
* HWTACACS servers
* Why is this statement false?
* iMaster NCE-Campus can connect to LDAP but does not act as an LDAP server itself.
HCIP-Security References:
* Huawei HCIP-Security Guide # iMaster NCE-Campus Authentication Integration
