A Itcerttest will not only increase your knowledge but it will polish your skills as well to proceed successfully in the world of Microsoft.

Microsoft Azure Fundamentals Sample Questions (Q115-Q120):

NEW QUESTION # 115

To complete the sentence, select the appropriate option in the answer area.

Data that is stored in the Archive access tier of an Azure Storage account _____

☐ can be accessed at any time by using azcopy.exe.
☐ can only be read by using Azure Backup.
☐ must be restored before the data can be accessed.
☐ must be rehydrated before the data can be accessed.

Answer:

Explanation:

Data that is stored in the Archive access tier of an Azure Storage account _____

☐ can be accessed at any time by using azcopy.exe.
☐ can only be read by using Azure Backup.
☐ must be restored before the data can be accessed.
☐ must be rehydrated before the data can be accessed.

NEW QUESTION # 116

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
To use Azure Active Directory (Azure AD) credentials to sign in to a computer that runs Windows 10, the computer must be joined to Azure AD.	☐	☐
Users in Azure Active Directory (Azure AD) are organized by using resource groups.	☐	☐
Azure Active Directory (Azure AD) groups support dynamic membership rules.	☐	☐

Answer:

Explanation:

Statements	Yes	No
To use Azure Active Directory (Azure AD) credentials to sign in to a computer that runs Windows 10, the computer must be joined to Azure AD.	☐	☒
Users in Azure Active Directory (Azure AD) are organized by using resource groups.	☒	☐
Azure Active Directory (Azure AD) groups support dynamic membership rules.	☒	☐

NEW QUESTION # 117

You need to create a new Azure file share.

What should you use? To answer, select the service in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 118

You plan to deploy a service to Azure virtual machines.

You need to ensure that the service will be available if a datacenter fails.

What should you use as part of the virtual machine deployment?

- A. availability sets
- B. host groups
- C. availability zones
- D. proximity placement groups

Answer: C

Explanation:

Azure availability zones are physically separate locations within each Azure region that are tolerant to local failures. Failures can range from software and hardware failures to events such as earthquakes, floods, and fires. Tolerance to failures is achieved because of redundancy and logical isolation of Azure services. To ensure resiliency, a minimum of three separate availability zones are present in all availability zone-enabled regions.

NEW QUESTION # 119

This question requires that you evaluate the underlined text to determine if it is correct.

A support plan solution that gives you best practice information, health status and notifications, and 24/7 access to billing information at the lowest possible cost is a Standard support plan.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- **B. Basic**
- C. Developer
- D. Premier

Answer: B

Explanation:

Explanation

A basic support plan provides:

* 24x7 access to billing and subscription support, online self-help, documentation, whitepapers, and support forums

* Best practices: Access to full set of Azure Advisor recommendations

* Health Status and Notifications: Access to personalized Service Health Dashboard & Health API References:
