SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which of the following is a prerequisite for assigning a warehouse order to a resource automatically?

- A. The warehouse order must be picked from the same activity area that is assigned to the resource.
- B. The creation of a pick-handling unit must be done automatically with a packaging specification.

- C. The resource group of the resource must be assigned to the warehouse order creation rule.
- D. The warehouse order must be in a queue that is assigned to the resource either directly or through a resource group.

Answer: A

Explanation:

Automatic Assignment of Warehouse Orders to Resources

* A warehouse order can be automatically assigned to a resource if it is closely tied to specific operational areas, such as activity areas.

* Activity Areas (B): These represent logical divisions in the warehouse where resources perform tasks such as picking. The resource must be assigned to the same activity area to enable automatic assignment.

Excluded Options

* Option A: Although queues may influence assignment, they are not the sole determining factor for automatic assignment.

* Option C: Resource group assignment to warehouse order creation rules is unrelated to automatic order assignment.

* Option D: Automatic creation of pick-handling units is a packaging specification requirement, not directly related to resource assignment.

SAP S/4HANA Cloud Private Edition Reference

* Refer to Activity Areas in Resource Management in SAP EWM documentation for detailed configuration.

NEW QUESTION # 75

Which stock removal strategy can be realized with either packaging specifications or the alternative unit of measure (AUOM)? Note: There are 2 correct answers to this question.

- A. Large/small quantities
- B. Stringent FIFO
- C. Partial quantities first
- D. Fixed bin

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Stock removal strategies in SAP EWM determine how stock is picked. Option B ("Large/small quantities") is correct because it leverages packaging specifications or AUOM to prioritize picking larger or smaller units, configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Strategies > Stock Removal. Option D ("Partial quantities first") is correct as it uses AUOM to pick partial units first. Option A (Stringent FIFO) relies on date, not packaging/AUOM, and option C (Fixed bin) is location-based, not quantity-based.

NEW QUESTION # 76

What is the default requirement for an asynchronous goods receipt process in SAP Extended Warehouse Management?

- A. A purchase order
- B. A door assignment
- C. An inbound delivery
- D. An expected goods receipt

Answer: C

Explanation:

Asynchronous Goods Receipt in SAP EWM

* An inbound delivery is the default requirement for asynchronous goods receipt processes. It provides the necessary data for goods receipt posting in SAP EWM.

Excluded Options

* A (Expected Goods Receipt): This tracks anticipated goods but is not mandatory.

* C (Door Assignment): Relevant for physical goods receipt but not a prerequisite for the process.

* D (Purchase Order): Purchase orders initiate procurement but do not directly control goods receipt processes.

SAP S/4HANA Cloud Private Edition Reference

* Check Inbound Delivery and Goods Receipt Processes in SAP EWM.

NEW QUESTION # 77

With decentralized EWM, you can skip certain document categories. Which document category combination is still mandatory?

- A. An outbound delivery request and an outbound delivery order
- B. A production material request and a stock transfer
- **C. An outbound delivery order and an outbound delivery**
- D. A posting change request and a posting change

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In decentralized EWM, some document categories can be bypassed, but option A ("An outbound delivery order and an outbound delivery") is mandatory because the outbound delivery order (ODO) is created in EWM from an ERP outbound delivery request, and the outbound delivery is completed after processing, configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Outbound Delivery.

Other combinations (B, C, D) can be optional or situational.

NEW QUESTION # 78

Which of the following can you use to explore released APIs?

- A. SAP Integration Suite
- **B. SAP Business Accelerator Hub**
- C. SAP Application Interface Framework

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

SAP provides tools to explore released APIs, particularly for integration with SAP S/4HANA and EWM. Option A ("SAP Business Accelerator Hub") is correct because it is the official platform (previously known as SAP API Business Hub) where developers can discover, explore, and test SAP-released APIs, including those for EWM. It provides detailed documentation and sandbox environments, accessible via SAP's public portal. Option B ("SAP Application Interface Framework") is used for monitoring and managing interfaces, not exploring APIs. Option C ("SAP Integration Suite") is a tool for building integrations, not specifically for API exploration.

NEW QUESTION # 79

.....

There are no threshold limits to attend the C_S4EWM_2023 test such as the age, sexuality, education background and your job conditions, and anybody who wishes to improve their volume of knowledge and actual abilities can attend the test.
