Do you feel headache looking at so many IT certification exams and so many exam materials? What should you do? Which materials do you choose? If you don't know how to choose, I choose your best exam materials for you. You can choose to attend Google Professional-Cloud-Database-Engineer exam which is the most popular in recent. Getting Professional-Cloud-Database-Engineer certificate, you will get great benefits. Moreover, to effectively prepare for the exam, you can select Actualtests4sure Google Professional-Cloud-Database-Engineer certification training dumps which are the best way to pass the test.

Google Professional-Cloud-Database-Engineer exam is a certification offered to professionals who have the expertise in designing, developing, and managing Google Cloud Platform (GCP) databases. Google Cloud Certified - Professional Cloud Database Engineer certification is aimed towards individuals who have a deep understanding of database architecture, data modeling, and data management using GCP services. Professional-Cloud-Database-Engineer exam tests the candidate's ability to design, develop, and administer GCP databases, as well as their knowledge of GCP database services such as Cloud SQL, Cloud Spanner, and Cloud Bigtable.

Google Cloud Certified - Professional Cloud Database Engineer certification exam is designed to evaluate the candidate's proficiency in working with the Google Cloud Platform, which is a highly scalable and reliable cloud infrastructure. Professional-Cloud-Database-Engineer Exam consists of multiple-choice and multiple-select questions that test the candidate's understanding of cloud-native database services, such as Cloud SQL, Cloud Spanner, and Cloud Bigtable, and how to design, implement, and manage them. Professional-Cloud-Database-Engineer exam also evaluates the candidate's ability to automate database operations and ensure security and compliance.

**Get Updated Google Professional-Cloud-Database-Engineer Exam Questions
(2025)**

We update our Google Professional-Cloud-Database-Engineer exam dumps over time and mark the changes online. Enroll in the Google Professional-Cloud-Database-Engineer exam dumps and start your preparation with Google Professional-Cloud-Database-Engineer practice questions. We will provide you with the information covered in the current test and incorporate materials that originate from Google Professional-Cloud-Database-Engineer Exam Dumps. You will get a handful of knowledge about topics that will benefit your professional career.

The Google Professional-Cloud-Database-Engineer Exam consists of multiple-choice and multiple-select questions and is timed at two hours. Candidates must achieve a passing score to earn the certification. Google Cloud Certified - Professional Cloud Database Engineer certification is valid for two years, after which the candidates need to recertify to maintain their certification status.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q70-Q75):

NEW QUESTION # 70

Your company is shutting down their data center and migrating several MySQL and PostgreSQL databases to Google Cloud. Your database operations team is severely constrained by ongoing production releases and the lack of capacity for additional on-premises backups. You want to ensure that the scheduled migrations happen with minimal downtime and that the Google Cloud databases stay in sync with the on-premises data changes until the applications can cut over.

What should you do? (Choose two.)

- A. Use an external read replica to migrate the databases to Cloud SQL.
- **B. Use replication from an external server to migrate the databases to Cloud SQL.**
- C. Use a read replica to migrate the databases to Cloud SQL.
- **D. Use Database Migration Service to migrate the databases to Cloud SQL.**
- E. Use a cross-region read replica to migrate the databases to Cloud SQL.

Answer: B,D

NEW QUESTION # 71

You are running an instance of Cloud Spanner as the backend of your ecommerce website. You learn that the quality assurance (QA) team has doubled the number of their test cases. You need to create a copy of your Cloud Spanner database in a new test environment to accommodate the additional test cases. You want to follow Google-recommended practices. What should you do?

- A. Use Cloud Functions to run the export in Avro format.
- **B. Use Dataflow to run the export in Avro format.**
- C. Use Dataflow to run the export in text format.
- D. Use Cloud Functions to run the export in text format.

Answer: B

Explanation:

<https://cloud.google.com/spanner/docs/import-export-overview#file-format>

NEW QUESTION # 72

You are evaluating Cloud SQL for PostgreSQL as a possible destination for your on-premises PostgreSQL instances. Geography is becoming increasingly relevant to customer privacy worldwide. Your solution must support data residency requirements and include a strategy to:

configure where data is stored

control where the encryption keys are stored

govern the access to data

What should you do?

- A. Create a Cloud SQL for PostgreSQL instance on Google Cloud for the data that does not need to adhere to data residency requirements. Keep the data that must adhere to data residency requirements on-premises. Make application changes to support both databases.
- B. Use features like customer-managed encryption keys (CMEK), VPC Service Controls, and Identity and Access Management (IAM) policies.
- **C. Allow application access to data only if the users are in the same region as the Google Cloud region for the Cloud SQL for**

PostgreSQL database.

- D. Replicate Cloud SQL databases across different zones.

Answer: C

NEW QUESTION # 73

Your hotel booking company is expanding into Country A, where personally identifiable information (PII) must comply with regional data residency requirements and audits. You need to isolate customer data in Country A from the rest of the customer data. You want to design a multi-tenancy strategy to efficiently manage costs and operations. What should you do?

- **A. Apply an instance data management pattern.**
- B. Apply a schema data management pattern.
- C. Apply a table data management pattern.
- D. Apply a database data management pattern.

Answer: A

Explanation:

NEW QUESTION # 74

Your team uses thousands of connected IoT devices to collect device maintenance data for your oil and gas customers in real time. You want to design inspection routines, device repair, and replacement schedules based on insights gathered from the data produced by these devices. You need a managed solution that is highly scalable, supports a multi-cloud strategy, and offers low latency for these IoT devices. What should you do?

- A. Use Bigtable with Looker.
- B. Use Firestore with Looker.
- C. Use Cloud Spanner with Data Studio.
- **D. Use MongoDB Atlas with Charts.**

Answer: D

NEW QUESTION # 75
