### NEW QUESTION # 47

What are the key aspects of the standalone connector? Note: There are 3 correct answers to this question.

- A. It runs ETL scripts externally of SAP Signavio Process Intelligence.
- B. It connects to other process modeling platforms and collects process model information.
- C. It connects different investigations of process.
- D. It can be used if the source system is not covered by standard connectors.
- E. It uses the API of SAP Signavio Process Intelligence to push data into a process.

Answer: A,D,E

Explanation:

The standalone connector in SAP Signavio has several key aspects:

- \* It can be used if the source system is not covered by standard connectors, allowing for a more flexible integration of data into SAP Signavio Process Intelligence from a wider range of systems.
- \* It uses the API of SAP Signavio Process Intelligence to push data into a process, enabling automated data flow and integration from external systems into Signavio.
- \* It runs ETL (Extract, Transform, Load) scripts externally of SAP Signavio Process Intelligence, which allows for the preprocessing of data before it is integrated into the Signavio environment, ensuring the data meets the necessary format and standards.

Connecting to other process modeling platforms and collecting process model information, and connecting different investigations of process are not described functionalities of the standalone connector.
