Braindumpsqa, the best certification company helps you climb the ladder to success. Getting Nutanix NCA-6.10 certification is setting the pathway to the height of your career. This career-oriented credential opens up vistas of opportunities for you to many medium and large-sized organizations. Such a tremendous opportunity is just a step ahead. Try NCA-6.10 Dumps to ensure your success in exam with money back guarantee.

Nutanix Certified Associate v6.10 Sample Questions (Q67-Q72):

NEW QUESTION # 67

What is the recommended step before performing any upgrade procedure?

- A. Put the hosts into maintenance mode
- B. Clear all alerts in Prism
- C. Put the CVMs into maintenance mode
- **D. Run Nutanix Cluster Check**

Answer: D

Explanation:

The correct answer is B. Run Nutanix Cluster Check (NCC).

Before performing any upgrade procedure (AOS, Foundation, LCM, etc.), it is strongly recommended to run the Nutanix Cluster Check (NCC). This tool performs a comprehensive health assessment of the cluster and validates its readiness for the upgrade, including:

- * Disk integrity
- * Network configuration
- * CVM health
- * Cluster services status

Prism UI Navigation Path:

Health > Run NCC Check (via Actions menu)

Command Line Alternative:

bash

CopyEdit

ncc health_checks run_all

Clarifications:

- * A (Put hosts into maintenance mode): Not required before upgrades; LCM handles host management automatically.
- * C (Put CVMs into maintenance mode): Not correct. CVMs must be operational during upgrades.
- * D (Clear all alerts): Irrelevant unless the alerts indicate upgrade-blocking issues, which NCC identifies.

Official Reference:

- * Nutanix Upgrade Guide - Pre-upgrade Checklist Section

- * Excerpt: "It is strongly recommended to run NCC prior to starting the upgrade process to detect any cluster issues."

NEW QUESTION # 68

Which hypervisor supports integrated IP address management (IPAM)?

- A. XenServer
- B. ESXi
- C. Hyper-V
- **D. AHV**

Answer: D

Explanation:

Nutanix AHV (Acropolis Hypervisor) supports integrated IP address management (IPAM) as a built-in feature. IPAM allows administrators to dynamically allocate and manage IP addresses for VMs within a network segment. This functionality simplifies network management by automating the assignment of IPs without relying on external DHCP servers.

- * A. ESXi: Incorrect, as ESXi does not include built-in IPAM.
- * B. Hyper-V: Incorrect, as Hyper-V lacks integrated IPAM functionality.
- * C. AHV: Correct, as AHV has built-in IPAM for automated IP address allocation.
- * D. XenServer: Incorrect, as XenServer does not support integrated IPAM.

NEW QUESTION # 69

How many copies of the metadata are maintained within a Redundancy Factor 3 cluster?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

NEW QUESTION # 70

An administrator needs to verify whether the cluster is protected currently from potential data loss due to a component failure. From the Prism Element Home dashboard, how should the administrator accomplish this task?

- **A. Look at the Data Resiliency Status widget.**
- B. Navigate to the Health dashboard.
- C. Click on Home and then Alerts.
- D. Select the gear icon and then select Pulse.

Answer: A

Explanation:

To verify if the cluster is currently protected from potential data loss due to a component failure, the administrator should check the Data Resiliency Status widget on the Prism Element Home dashboard. This widget provides real-time information about the cluster's resiliency status, including warnings or errors about data redundancy or protection.

Other options:

- * A. Select the gear icon and then select Pulse: Pulse is used for telemetry data, not data resiliency status.
- * B. Click on Home and then Alerts: Alerts show specific issues but do not directly indicate the overall resiliency status.
- * D. Navigate to the Health dashboard: The Health dashboard provides detailed health checks but does not display the current resiliency status.

Nutanix Administration Guide - Data Resiliency Status.

Nutanix Prism UI Documentation - Dashboard Overview.

NEW QUESTION # 71

An administrator needs to create a VM Template from an existing VM. What is required for this action to be successful?

- **A. The VM is powered off.**
- B. Sysprep or Cloud-init script.
- C. The VM is powered on.
- D. Windows OS is installed.

Answer: A

NEW QUESTION # 72

.....
