

2025 Oracle 1Z0-1151-25 Latest Reliable Braindumps Pdf

P.S. Free 2025 Oracle 1Z0-1151-25 dumps are available on Google Drive shared by Exam4Free: <https://drive.google.com/open?id=1oPFVwzTzcwZHnL-jT7vcj0Jtteair2UX>

If you are not aware of your problem, please take a good look at the friends around you! Now getting an international 1Z0-1151-25 certificate has become a trend. If you do not hurry to seize the opportunity, you will be far behind others! Now the time cost is so high, choosing 1Z0-1151-25 Exam Prep will be your most efficient choice. You can pass the 1Z0-1151-25 exam in the shortest possible time to improve your strength.

Exam4Free is a trusted platform that has been helping Oracle Cloud Infrastructure 2025 Multicloud Architect Professional 1Z0-1151-25 candidates for many years. Over this long time period, countless candidates have passed their Oracle Cloud Infrastructure 2025 Multicloud Architect Professional 1Z0-1151-25 Exam and they all got help from Oracle Cloud Infrastructure 2025 Multicloud Architect Professional practice questions and easily pass the final exam.

>> 1Z0-1151-25 Reliable Braindumps Pdf <<

1Z0-1151-25 Exam Questions, Reliable 1Z0-1151-25 Exam Tips

Our 1Z0-1151-25 practice materials are your best choice for their efficiency in different aspects: first of all, do not need to wait, you can get them immediately if you pay for it and download as your wish. Clear-arranged content is our second advantage. Some exam candidates are prone to get anxious about the 1Z0-1151-25 Exam Questions, but with clear and points of necessary questions within our 1Z0-1151-25 study guide, you can master them effectively in limited time.

Oracle 1Z0-1151-25 Exam Syllabus Topics:

Topic	Details

Topic 1	• Implement Oracle Database@Google Cloud: This section measures the proficiency of Cloud Database Engineers in utilizing Oracle Database@Google Cloud. It explores the architecture and operational framework for running Oracle databases on Google Cloud. Candidates will learn about onboarding procedures, provisioning resources, and managing database services effectively to optimize performance and availability in a Google Cloud-integrated multi-cloud ecosystem.
Topic 2	• Core OCI Services Overview: This section evaluates the knowledge of Identity and Database Administrators in managing OCI's core services for multi-cloud integration. It covers the implementation of identity federation between OCI Identity Domains and external identity providers, ensuring secure authentication across multiple cloud environments. Candidates will also gain expertise in configuring Virtual Cloud Network (VCN) components and administering OCI database services, including Base Databases, Autonomous Databases, and HeatWave, to support scalable multi-cloud deployments.
Topic 3	• Introduction to Multicloud: This section of the exam measures the skills of Cloud Architects in understanding multicloud environments and their benefits. It covers the reasons organizations adopt multi-cloud strategies, including flexibility, cost optimization, and risk management. Candidates will learn about common multicloud use cases and how they are implemented in Oracle Cloud Infrastructure (OCI) to enhance interoperability and performance.
Topic 4	• Configure Multicloud Connection Options: This section assesses the abilities of Network Engineers in configuring connectivity solutions for OCI multi-cloud environments. It includes setting up secure networking options such as Site-to-Site VPN and FastConnect for seamless cloud integration. Candidates will also learn how to implement Oracle Interconnect services for establishing direct, high-performance connections between OCI and third-party cloud providers like Microsoft Azure and Google Cloud.
Topic 5	• Implement Oracle Database@Azure: This section tests the expertise of Database Solutions Architects in deploying and managing Oracle Database@Azure. It covers the architectural components and onboarding processes required for provisioning databases in Azure while maintaining Oracle's advanced database capabilities. Candidates will also focus on configuring high availability and disaster recovery strategies to ensure business continuity and data resilience in a multi-cloud setup.

Oracle Cloud Infrastructure 2025 Multicloud Architect Professional Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which of the following statements is incorrect regarding the IP addressing requirements for establishing Oracle Interconnect for Azure?

- A. The customer is responsible for providing the BGP IP addresses for both the OCI and Azure sides of the connection.
- **B. The IP addresses used for the BGP sessions must be private IP addresses within the 169.254.0.0/16 range.**
- C. The Oracle Cloud Infrastructure (OCI) FastConnect virtual circuit requires two pairs of BGP IP addresses: a primary and a secondary pair.
- D. Each BGP session established over Oracle Interconnect for Azure uses a /30 subnet for the link local addresses.

Answer: B

Explanation:

The correct practice is to use private IP addresses from other private address spaces (like 10.0.0.0/8, 172.16.0.0/12, or 192.168.0.0/16) or, as is often the case with cloud interconnects, a dedicated, pre-agreed upon set of IP addresses specifically for the interconnect link, often provided by the cloud providers or a network service provider.

The other statements are correct:

a) The Oracle Cloud Infrastructure (OCI) FastConnect virtual circuit requires two pairs of BGP IP addresses: a primary and a secondary pair. This is for redundancy. If the primary BGP session fails, the secondary session takes over.

b) Each BGP session established over Oracle Interconnect for Azure uses a /30 subnet for the link local addresses. A /30 subnet provides four IP addresses, but only two are usable for the point-to-point connection between the OCI DRG and the Azure ExpressRoute router.

d) The customer is responsible for providing the BGP IP addresses for both the OCI and Azure sides of the connection. This is generally true, although the process may involve coordination with the cloud providers to ensure the addresses are compatible and

do not conflict with existing networks.

NEW QUESTION # 53

What is a key benefit of using Oracle Autonomous Database on Shared Exadata Infrastructure?

- A. Unlimited storage capacity
- B. Seamless integration with third-party cloud providers
- **C. Automatic database tuning and patching**
- D. Enhanced physical security of hardware

Answer: C

Explanation:

A primary benefit of Oracle Autonomous Database on Shared Exadata Infrastructure is its ability to automatically tune and patch the database, reducing manual administration and improving performance and security. Option B is unrelated to the shared infrastructure model, Option C exaggerates storage (it's scalable, not unlimited), and Option D is a general infrastructure feature, not specific to Autonomous Database. Oracle's documentation highlights automation as a core advantage.

NEW QUESTION # 54

What is the first action that needs to be completed during the onboarding of Oracle Database@Azure?

- A. An active Azure subscription is linked with the OCI tenancy for billing purposes.
- B. The onboarding step is preceded by a private offer purchase from the Oracle Private Offer marketplace.
- C. Linking the OCI account is recommended (but optional) during onboarding to avoid logging in to the OCI account by manually providing credentials each time.
- **D. The customer consults Oracle Sales for a price agreement, which is then created as a Private Offer in the Azure marketplace by Oracle to be purchased by the customer.**

Answer: D

Explanation:

The initial step in onboarding Oracle Database@Azure is establishing a commercial agreement. This involves:

Contacting Oracle Sales: The customer first engages with Oracle Sales to discuss their requirements and negotiate pricing.

Private Offer Creation: Based on the agreed-upon terms, Oracle creates a Private Offer within the Azure Marketplace. This private offer is specifically tailored to the customer's needs and pricing.

Private Offer Purchase: The customer then purchases this private offer through the Azure Marketplace, formally establishing the commercial relationship for using Oracle Database@Azure.

This process ensures that the customer has a clear understanding of the costs and terms associated with the service before proceeding with any technical setup.

Why the other options are incorrect:

a). Linking the OCI account is recommended (but optional) during onboarding to avoid logging in to the OCI account by manually providing credentials each time: Linking an OCI account is beneficial for certain management tasks and integration, but it's not the first step in the onboarding process. The commercial agreement must be in place first.

b). An active Azure subscription is linked with the OCI tenancy for billing purposes: While billing is eventually handled through Azure, the initial step is establishing the commercial agreement through the private offer. The linking of subscriptions happens later in the process.

d). The onboarding step is preceded by a private offer purchase from the Oracle Private Offer marketplace: While the purchase is necessary, it's preceded by the consultation with Oracle Sales and the creation of the private offer itself

NEW QUESTION # 55

Regarding the benefits of multicloud, which of the following statements is NOT accurate?

- A. Multicloud allows organizations to utilize specialized, best-of-breed services available from different vendors.
- B. Multicloud enables businesses to avoid vendor lock-in, providing greater flexibility in choosing services.
- **C. A major advantage of Multicloud is to simplify the management of the different services into a single pane of glass.**
- D. By distributing workloads across multiple providers, multicloud improves overall resilience and reduces the impact of localized failures.

Answer: C

Explanation:

In reality, managing a multicloud environment is often more complex than managing a single-cloud environment. Each cloud provider has its own management tools, APIs, and interfaces. Integrating these into a true "single pane of glass" is a significant challenge, although there are emerging tools and platforms attempting to address this. It's not a simplification; it's an added layer of complexity. The other statements are accurate:

- a) Multicloud enables businesses to avoid vendor lock-in, providing greater flexibility in choosing services: This is a key driver for multicloud adoption.
- b) Multicloud allows organizations to utilize specialized, best-of-breed services available from different vendors: Different cloud providers excel in different areas, and multicloud allows organizations to take advantage of these specializations.
- d) By distributing workloads across multiple providers, multicloud improves overall resilience and reduces the impact of localized failures: This is a core benefit of multicloud for disaster recovery and business continuity.

NEW QUESTION # 56

When configuring a Site-to-Site VPN, which component resides on the customer's on-premises network?

- **A. Customer Premises Equipment (CPE)**
- B. Virtual Private Gateway (VPG)
- C. IPSec tunnel
- D. Dynamic Routing Gateway (DRG)

Answer: A

Explanation:

Here's why:

Customer Premises Equipment (CPE): The CPE is a physical or virtual device (e.g., a router, firewall, or dedicated VPN appliance) located on the customer's side of the VPN connection. It's responsible for establishing and maintaining the VPN tunnel to the cloud provider (in this case, OCI).

Why the other options are incorrect:

- A). Dynamic Routing Gateway (DRG): The DRG is an OCI resource. It acts as the termination point for the VPN connection on the OCI side.
- C). Virtual Private Gateway (VPG): While some cloud providers use the term "Virtual Private Gateway," OCI uses the DRG for this purpose. The VPG is not a component in OCI's VPN setup.
- D). IPSec tunnel: The IPSec tunnel is the logical connection established between the CPE and the DRG. It's not a physical component that resides on either side of the connection. It's the secure communication channel itself.

NEW QUESTION # 57

.....

By selecting our 1Z0-1151-25 training material, you will be able to pass the 1Z0-1151-25 exam in the first attempt. You will be able to get the desired results in 1Z0-1151-25 certification exam by checking out the unique self-assessment features of our 1Z0-1151-25 Practice Test software. You can easily get the high paying job if you are passing the 1Z0-1151-25 exam in the first attempt, and our 1Z0-1151-25 study guides can help you do so.
