This Pegasystems PEGACPSA24V1 certification exam is designed to validate a candidate's skills and knowledge. With Pegasystems PEGACPSA24V1 Certification Exam everyone can upgrade their expertise and knowledge level.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q180-Q185):

NEW QUESTION # 180

Which type of data source retrieves external data in real-time?

- A. Data Transform
- B. Value List
- C. Lookup Table
- D. Connector

Answer: D

Explanation:

A Connector integrates with external systems to retrieve real-time data when needed. It allows Pega to interact with web services, REST APIs, and databases. This ensures that applications use the most up- to-date information. Connectors improve system interoperability and data accuracy.

NEW QUESTION # 181

Which feature is used to retrieve and display external data without storing it in the case?

- A. Case Property
- B. Data Transform
- C. Value List
- D. Data Page

Answer: D

Explanation:

A Data Page retrieves external data on demand without storing it in the case. This ensures that applications always access the most recent data from external sources, such as databases or web services. It improves efficiency by reducing unnecessary data duplication. Data Pages enhance application performance and accuracy.

NEW QUESTION # 182

Which layout is best for displaying a list of items in a flexible, card-based format?

- A. Work Queue Prioritization
- B. SLA Recalculation Table
- C. Grid Layout
- D. Repeating Dynamic Layout

Answer: D

Explanation:

A Repeating Dynamic Layout is ideal for displaying lists in a flexible, responsive card format. It allows better styling and mobile-friendly presentation compared to grid layouts. SLA tables and work queue prioritization do not manage UI layouts.

NEW QUESTION # 183

Which two options allow adding fields to a case type? (Choose Two)

- A. Data Model
- B. Case Designer
- C. Work Queue Settings
- D. SLA Adjustment

Answer: A,B

Explanation:

Fields can be added via the Case Designer (for UI-driven fields) or the Data Model (for property-based fields). These ensure that cases capture the necessary information for processing. SLA adjustments and work queues do not control case fields.

NEW QUESTION # 184

Which method is used to conditionally populate fields based on business logic?

- A. Data Page
- B. When Rule
- C. SLA Timer
- D. Case Lifecycle Rule

Answer: B

Explanation:

A When Rule applies conditional logic to determine whether a field should be populated or modified. It enables dynamic decision-making in forms, ensuring that only relevant data appears. It is used for conditional workflows, approvals, and dynamic UI behaviors. When Rules enhance process flexibility.

NEW QUESTION # 185

.....

Our ActualTorrent team know that it is very hard to build trust relationship between the seller and customer.
