SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud

Private Edition Sample Questions (Q31-Q36):

NEW QUESTION # 31

Where do you find industry cloud solutions to address a customer's unique requirement?

- A. SAP Business Technology Platform
- B. SAP Signavio Process Navigator
- C. SAP Discovery Center
- **D. SAP Store**

Answer: D

Explanation:

Industry cloud solutions are prebuilt, industry-specific applications or extensions developed by SAP and its partners to address unique customer requirements beyond the standard SAP S/4HANA functionality. Let's analyze where these can be found:

- * A. SAP Signavio Process Navigator: This tool provides process models, best practices, and reference content for SAP solutions, including SAP S/4HANA. While it helps with process discovery and optimization, it does not serve as a marketplace for finding or acquiring industry cloud solutions.
- * B. SAP Store: This is the correct answer. The SAP Store (store.sap.com) is the official online marketplace where customers can find, try, and buy industry cloud solutions developed by SAP and its ecosystem of partners. These solutions are tailored to specific industries (e.g., manufacturing, retail) and integrate with SAP S/4HANA Cloud Private Edition, often leveraging SAP Business Technology Platform (BTP). SAP documentation highlights the SAP Store as the go-to source for such offerings.
- * C. SAP Discovery Center: This platform provides information about SAP Business Technology Platform (BTP) services, missions, and use cases, including industry-specific scenarios. While it offers insights and starting points for building custom solutions, it is not a marketplace for prebuilt industry cloud solutions, making it incorrect here.
- * D. SAP Business Technology Platform (BTP): BTP is a platform for extending and customizing SAP solutions (e.g., via integration, analytics, or extensions). While industry cloud solutions may be built on BTP, the platform itself is not a source for finding or purchasing them-it's a technical foundation rather than a marketplace.

In conclusion, the SAP Store is where you find industry cloud solutions to address a customer's unique requirements.

NEW QUESTION # 32

A customer needs to move their system from the current version of SAP S/4HANA (on-premise) to the same release version of SAP S/4HANA Cloud Private Edition.

What type of transition do you recommend?

- A. System Upgrade
- B. Lift & Shift
- C. Selective Data Transition
- **D. System Conversion**

Answer: D

NEW QUESTION # 33

When do you use the SAP Fiori app "Launchpad App Manager?" Note: There are 2 correct answers to this question.

- A. To maintain technical catalogs
- **B. To create custom catalogs**
- **C. To view where launchpad content is used**
- D. To manage business catalogs with references to SAP Fiori app tiles in technical catalogs

Answer: B,C

NEW QUESTION # 34

After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. SAP Integration Solution Advisory Methodology
- B. SAP Business Accelerator Hub
- C. Integration and API List
- D. SAP Cloud ALM Requirements app

Answer: A

NEW QUESTION # 35

Where do you document and prioritize requirements gathered from the Fit-to-Standard analysis workshops?

- A. SAP Cloud ALM
- B. SAP Signavio Process Navigator
- C. SAP Solution Manager
- D. Implementation Guide

Answer: A

Explanation:

In SAP S/4HANA Cloud Private Edition implementations, requirements gathered during Fit-to-Standard analysis workshops are documented and prioritized using SAP Cloud ALM. This tool facilitates efficient management of project requirements, ensuring alignment with business objectives.

Option A: SAP Solution Manager

This option is incorrect. While SAP Solution Manager offers comprehensive application lifecycle management, SAP Cloud ALM is the recommended tool for cloud-centric implementations, providing tailored functionalities for documenting and prioritizing requirements.

Option B: SAP Cloud ALM

This option is correct. SAP Cloud ALM is designed to support cloud implementations, offering features to document, track, and prioritize requirements effectively. During Fit-to-Standard workshops, requirements are captured in SAP Cloud ALM, facilitating seamless integration into the project lifecycle.

SAP Learning

Option C: SAP Signavio Process Navigator

This option is incorrect. SAP Signavio Process Navigator aids in process modeling and analysis but is not primarily used for documenting and prioritizing requirements from workshops.

Option D: Implementation Guide

This option is incorrect. The Implementation Guide (IMG) is utilized for system configuration and customization, not for documenting workshop requirements.

In summary, SAP Cloud ALM is the appropriate tool for documenting and prioritizing requirements from Fit-to-Standard analysis workshops in SAP S/4HANA Cloud Private Edition projects, ensuring structured and efficient project execution.

In SAP S/4HANA Cloud Private Edition implementations, requirements gathered during Fit-to-Standard analysis workshops are documented and prioritized using SAP Cloud ALM. This tool facilitates efficient management of project requirements, ensuring alignment with business objectives.
