New Professional-Cloud-Security-Engineer Reliable Braindumps Files Pass Certify | High Pass-Rate Professional-Cloud-Security-Engineer Latest Exam Papers: Google Cloud Certified - Professional Cloud Security Engineer Exam

The desktop Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) practice test software is similar to the web-based Professional-Cloud-Security-Engineer format as far as its features are concerned. But it works offline only on the Windows operating system. The offline Professional-Cloud-Security-Engineer practice exam can be taken easily just by just installing the software on your Windows laptop or computer. All three Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) formats of TestBraindump are according to the latest content of the Google Professional-Cloud-Security-Engineer examination.

Google Cloud Certified - Professional Cloud Security Engineer Exam Sample Questions (Q254-Q259):

NEW QUESTION # 254

Your organization uses BigQuery to process highly sensitive, structured datasets. Following the "need to know" principle, you need to create the Identity and Access Management (IAM) design to meet the needs of these users:

- * Business user must access curated reports.
- * Data engineer: must administrate the data lifecycle in the platform.
- * Security operator: must review user activity on the data platform.

What should you do?

- A. Configure data access log for BigQuery services, and grant Project Viewer role to security operators.
- **B. Create curated tables in a separate dataset and assign the role roles/bigquery.dataViewer.**
- C. Generate a CSV data file based on the business user's needs, and send the data to their email addresses.
- D. Set row-based access control based on the "region" column, and filter the record from the United States for data engineers.

Answer: B

Explanation:

Explanation

This option directly addresses the needs of the business user who must access curated reports. By creating curated tables in a separate dataset, you can control access to specific data. Assigning the roles/bigquery.dataViewer role allows the business user to view the data in BigQuery.

NEW QUESTION # 255

Your organization has had a few recent DDoS attacks. You need to authenticate responses to domain name lookups. Which Google Cloud service should you use?

- A. Google Cloud Armor
- **B. Cloud DNS with DNSSEC**
- C. HTTP(S) Load Balancing
- D. Cloud NAT

Answer: B

Explanation:

Reference:

The Domain Name System Security Extensions (DNSSEC) is a feature of the Domain Name System (DNS) that authenticates responses to domain name lookups. It does not provide privacy protections for those lookups, but prevents attackers from manipulating or poisoning the responses to DNS requests. <https://cloud.google.com/dns/docs/dnssec>

NEW QUESTION # 256

A customer wants to make it convenient for their mobile workforce to access a CRM web interface that is hosted on Google Cloud Platform (GCP). The CRM can only be accessed by someone on the corporate network. The customer wants to make it available over the internet.

Your team requires an authentication layer in front of the application that supports two-factor authentication. Which GCP product should the customer implement to meet these requirements?

- A. Cloud Identity-Aware Proxy
- B. Cloud Endpoints
- C. Cloud Armor
- D. Cloud VPN

Answer: A

Explanation:

Cloud IAP is integrated with Google Sign-in which Multi-factor authentication can be enabled.

<https://cloud.google.com/iap/docs/concepts-overview>

NEW QUESTION # 257

You need to provide a corporate user account in Google Cloud for each of your developers and operational staff who need direct access to GCP resources. Corporate policy requires you to maintain the user identity in a third-party identity management provider and leverage single sign-on. You learn that a significant number of users are using their corporate domain email addresses for personal Google accounts, and you need to follow Google recommended practices to convert existing unmanaged users to managed accounts.

Which two actions should you take? (Choose two.)

- A. Add users to your managed Google account and force users to change the email addresses associated with their personal accounts.
- B. Use the Google Admin console to view which managed users are using a personal account for their recovery email.
- C. Send an email to all of your employees and ask those users with corporate email addresses for personal Google accounts to delete the personal accounts immediately.
- D. Use the Transfer Tool for Unmanaged Users (TTUU) to find users with conflicting accounts and ask them to transfer their personal Google accounts.
- E. Use Google Cloud Directory Sync to synchronize your local identity management system to Cloud Identity.

Answer: D,E

Explanation:

A - Requires third-party IDp and wants to leverage single sign-on.

D - https://cloud.google.com/architecture/identity/migrating-consumer-accounts#initiating_a_transfer

"In addition to showing you all unmanaged accounts, the transfer tool for unmanaged users lets you initiate an account transfer by sending an account transfer request."

NEW QUESTION # 258

An office manager at your small startup company is responsible for matching payments to invoices and creating billing alerts. For compliance reasons, the office manager is only permitted to have the Identity and Access Management (IAM) permissions necessary for these tasks. Which two IAM roles should the office manager have? (Choose two.)

- A. Billing Account Costs Manager
- B. Project Creator
- C. Billing Account User
- D. Billing Account Viewer
- E. Organization Administrator

Answer: A,D

Explanation:

Explanation

<https://cloud.google.com/billing/docs/how-to/billing-access#overview-of-cloud-billing-roles-in-cloud-iam> Billing Account Costs Manager (roles/billing.costsManager)
 - Manage budgets and view and export cost information of billing accounts (but not pricing information) Billing Account Viewer (roles/billing.viewer)
 - View billing account cost information and transactions.

NEW QUESTION # 259
