Salesforce Certified Administrator Sample Questions (Q206-Q211):

NEW QUESTION # 206

The administrator at Cloud Kicks writes an assignment rule to send all cases created via email or the web to the Automated Cases Queue. Any manually created cases should be owned by the agent creating them, however, the manually created cases now show the administrator as the owner.

What will the administrator find when troubleshooting this issue?

- A. The Owner field is missing on the webform and email template.
- B. An escalation rule is changing the case owner on case creation
- C. Another assignment rule is giving ownership to the administrator
- **D. The Assignment Rule checkbox is selected by default.**

Answer: D

Explanation:

Explanation

The Assignment Rule checkbox is a checkbox that appears on manual case creation pages when assignment rules are defined for cases. The Assignment Rule checkbox determines whether or not to apply assignment rules to manually created cases. If the Assignment Rule checkbox is selected by default, then any manually created cases will be assigned according to assignment rules instead of being owned by the agent creating them. To prevent this from happening, an administrator can either deselect the Assignment Rule checkbox when creating cases manually; or change the default setting for this checkbox under setup by selecting or deselecting Use active assignment rules by default.

NEW QUESTION # 207

Cloud Kicks want its reports to show a Fiscal Year that starts on February 1 and has 12 months.

How Should the Administrator Address this requirement?

- A. Set the Fiscal Year to Custom and the duration to 4 quarters.
- B. Set the Fiscal Year to Standard and the starting month as February.
- **C. Set the Fiscal Year to Custom and the starting month as February.**
- D. Set the Fiscal Year to Standard and the duration to 12 months.

Answer: C

Explanation:

Explanation

A standard fiscal year starts on January 1 and ends on December 31. A custom fiscal year can be set to start on any month and end on any month. In this case, Cloud Kicks wants its fiscal year to start on February 1 and end on January 31. This can be achieved by setting the fiscal year to Custom and the starting month to February.

Setting the fiscal year to Standard and the starting month to February will not work, as the standard fiscal year starts on January 1.

Setting the fiscal year to Custom and the duration to 4 quarters will not work, as the duration of a fiscal year is 12 months. Setting the fiscal year to Standard and the duration to 12 months will not work, as the standard fiscal year starts on January 1.

Custom fiscal years are fiscal years that follow a custom-defined structure that differs from the Gregorian calendar. They can be used by organizations that have fiscal years that start on a different month than January or have fiscal years that are divided into custom periods such as quarters or weeks. To set up a custom fiscal year that starts on February 1 and has 12 months, an administrator needs to set the fiscal year to custom and the starting month as February in the fiscal year settings. Setting the fiscal year to standard or the duration to 4 quarters does not meet the requirement of having a custom fiscal year that starts on February 1.

NEW QUESTION # 208

The Marketing team at Cloud Kicks uses campaigns to generate product interest. They want custom picklist values for the campaign member Status field for each campaign they run, currently, they ask the administrator to add or delete values, but this is very time consuming.

Which two user permission should allow the Marketing team to customize the campaign member status picklist values themselves? Choose 2 answers

- A. Edit permission for campaigns
- B. Customize Application permission
- C. Create and Edit for Campaign Member
- D. Marketing user feature license

Answer: A,D

Explanation:

Explanation

To customize the campaign member status picklist values themselves, marketing users need two things: a marketing user feature license and edit permission for campaigns. A marketing user feature license enables users to create, edit, and delete campaigns; manage campaign members; and update campaign history via the import wizards or API. Edit permission for campaigns allows users to modify existing campaigns and their related records such as campaign members and campaign member statuses. NEW QUESTION # 209

The Support team at Ursa Major Solar prefers using split list views on the case homepage. Occasionally, the team views shipments from another support application.

What should the administrator configure to allow the team to use the split list view?

- A. Include the Shipments tab on the app's navigation bar.
- B. Filter by a single shipment record type in the list view.
- C. Add the Manage List Views permission for support users.
- D. Split views are only available on standard objects.

Answer: D

Explanation:

Explanation

Split views are a feature that allows users to view records as a split list on object home pages in Lightning Experience apps that use console navigation. Split views show records in two panes: a list view pane on the left and a record detail pane on the right. Users can switch between different list views and records without losing context or scrolling. However, split views are only available on standard objects such as accounts, contacts, leads, opportunities, cases, etc., and not on custom objects such as shipments.

NEW QUESTION # 210

Universal Containers requires a different Lightning page to be displayed when Accounts are viewed in the Sales Console and in the Service Console.

How should an administrator meet this requirement?

- A. Create different user profiles.
- B. Define multiple record types.
- C. Assign Lightning pages as app default.
- D. Update page layout assignments.

Answer: C

Explanation:

Explanation

Lightning pages are custom layouts that let you design pages for your Salesforce org using Lightning App Builder. You can assign
