Our 220-1102 exam prep is elaborately compiled and highly efficiently, it will cost you less time and energy, because we shouldn't waste our money on some useless things. The passing rate and the hit rate are also very high, there are thousands of candidates choose to trust our 220-1102 guide torrent and they have passed the exam. We provide with candidate so many guarantees that they can purchase our 220-1102 Study Materials no worries. So we hope you can have a good understanding of the 220-1102 exam torrent we provide, then you can pass your 220-1102 exam in your first attempt.

As for ourselves, we are a leading and old-established CompTIA A+ Certification Exam: Core 2 firm in a very excellent position to supply the most qualified practice materials with competitive prices and efficient obtainment. They can be obtained within five minutes. Our 220-1102 practice materials integrating scientific research of materials, production of high quality 220-1102 training engine and considerate after-sales services have helped us won a prominent position in the field of materials.

Get Updated 220-1102 Latest Braindumps Sheet - All in Exam4Labs

we guarantee to you that our 220-1102 study questions are of high quality and can help you pass the exam easily and successfully.

Our 220-1102 exam questions boosts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our 220-1102 Exam Torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our 220-1102 guide torrent can simulate the exam and boosts the timing function.

CompTIA 220-1102 exam is a rigorous and challenging exam that requires a solid understanding of operating systems, mobile devices, and security. However, passing 220-1102 Exam and earning the CompTIA A+ certification can greatly enhance a candidate's career opportunities in the IT industry.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q439-Q444):

NEW QUESTION # 439

An administrator received a new shipment of mobile devices. Per company policy, all enterprise-issued devices must have two authentication methods, and the organization has already enforced the use of PIN codes as one method. Which of the following device features should the administrator enable?

- A. Hard token
- B. One-time password
- C. Smart card
- **D. Biometrics**

Answer: D

Explanation:

For securing mobile devices with two authentication methods, combining something the user knows (a PIN) with something the user is (biometrics) enhances security by implementing multi-factor authentication.

Smart card: Generally requires additional hardware and is not commonly used in mobile devices.

Biometrics: Uses unique biological traits such as fingerprints or facial recognition, providing a convenient and secure second method of authentication.

Hard token: Involves additional physical devices which might not be practical for mobile devices.

One-time password: Usually used for specific applications rather than as a general device authentication method.

NEW QUESTION # 440

A user reports seeing random, seemingly non-malicious advertisement notifications in the Windows 10 Action Center. The notifications indicate the advertisements are coming from a web browser. Which of the following is the best solution for a technician to implement?

- A. Disable the browser from sending notifications to the Action Center.
- B. Disable all Action Center notifications.
- **C. Move specific site notifications from Allowed to Block.**
- D. Run a full antivirus scan on the computer.

Answer: C

Explanation:

The best solution for a technician to implement is to disable the browser from sending notifications to the Action Center. This will prevent the random advertisement notifications from appearing in the Windows 10 Action Center, which can be annoying and distracting for the user. The technician can follow these steps to disable the browser notifications:

Open the browser that is sending the notifications, such as Microsoft Edge, Google Chrome, or Mozilla Firefox.

Go to the browser settings or options menu, and look for the privacy and security section.

Find the option to manage site permissions or notifications, and click on it.

You will see a list of sites that are allowed or blocked from sending notifications to the browser and the Action Center. You can either block all sites from sending notifications, or select specific sites that you want to block or allow.

Save the changes and close the browser settings.

This solution is better than the other options because:

Running a full antivirus scan on the computer (B) is not necessary, as the advertisement notifications are not malicious or harmful, and they are not caused by a virus or malware infection. Running a scan will not stop the notifications from appearing, and it will consume system resources and time.

Disabling all Action Center notifications is not advisable, as the Action Center is a useful feature that shows notifications and alerts from various apps and system events, such as email, calendar, security, updates, etc.

Disabling all notifications will make the user miss important information and reminders, and reduce the functionality of the Action Center.

Moving specific site notifications from Allowed to Block (D) is not the best solution, as it will only stop the notifications from some sites, but not from others. The user may still receive advertisement notifications from other sites that are not blocked, or from new sites that are added to the Allowed list. This solution will also require the user to manually manage the list of sites, which can be tedious and time-consuming.

NEW QUESTION # 441

Which of the following only has a web browser interface?

- A. Linux
- B. Microsoft Windows
- C. iOS
- D. Chromium

Answer: D

Explanation:

Chromium is an operating system that only has a web browser interface. Chromium is an open-source project that provides the source code and framework for Chrome OS, which is a Linux-based operating system developed by Google. Chromium and Chrome OS are designed to run web applications and cloud services through the Chrome web browser, which is the only user interface available on the system. Chromium and Chrome OS are mainly used on devices such as Chromebooks, Chromeboxes and Chromebits. Linux is an operating system that does not only have a web browser interface but also a graphical user interface and a command-line interface. Linux is an open-source and customizable operating system that can run various applications and services on different devices and platforms. Linux can also support different web browsers, such as Firefox, Opera and Chromium. Microsoft Windows is an operating system that does not only have a web browser interface but also a graphical user interface and a command-line interface. Microsoft Windows is a proprietary and popular operating system that can run various applications and services on different devices and platforms. Microsoft Windows can also support different web browsers, such as Edge, Internet Explorer and Chrome. iOS is an operating system that does not only have a web browser interface but also a graphical user interface and a voice-based interface. iOS is a proprietary and mobile operating system developed by Apple that can run various applications and services on devices such as iPhone, iPad and iPod Touch. iOS can also support different web browsers, such as Safari, Firefox and Chrome. NEW QUESTION # 442

A hotel's Wi-Fi was used to steal information on a corporate laptop. A technician notes the following security log:

SRC: 192.168.1.1/secrets.zip Protocol SMB >> DST: 192.168.1.50/capture

The technician analyses the following Windows firewall information:

Port	Status	Direction
1	Open	In/Out
445	Open	In/Out
25	Open	Out
110	Open	In/Out
53	Open	In/Out

Which of the following protocols most likely allowed the data theft to occur?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

The protocol that most likely allowed the data theft to occur is SMB over TCP port 445. SMB is a network file sharing protocol that enables access to files, printers, and other resources on a network. Port 445 is used by SMB to communicate directly over TCP without the need for NetBIOS, which is an older and less secure protocol. The security log shows that the source IP address

192.168.1.1 sent a file named secrets.zip using SMB protocol to the destination IP address 192.168.1.50, which captured the file. The Windows firewall information shows that port 445 is enabled for inbound and outbound traffic, which means that it is not blocked by the firewall. Therefore, port 445 is the most likely port that was exploited by the attacker to steal the data from the corporate laptop.

NEW QUESTION # 443

Which of the following is also known as something you know, something you have, and something you are?

* ACL

- A. MFA
- B. NFC
- C. SMS

Answer: C

Explanation:

MFA stands for Multi-Factor Authentication, which is a method of verifying a user's identity using two or more different factors of authentication. The three factors of authentication are something you know, something you have, and something you are. These factors correspond to different types of information or evidence that only the legitimate user should possess or provide. For example:

- * Something you know: a password, a PIN, a security question, etc.
- * Something you have: a smart card, a token, a mobile device, etc.
- * Something you are: a fingerprint, a face, an iris, etc.

MFA provides a higher level of security than single-factor authentication, which only uses one factor, such as a password. MFA reduces the risk of unauthorized access, identity theft, and data breaches, as an attacker would need to compromise more than one factor to impersonate a user. MFA is commonly used for online banking, email accounts, cloud services, and other sensitive applications

NEW QUESTION # 444

.....

We are a leading corporation in this line handling 220-1102 study questions well with passing rate up to 98 and over percent, which is an unreachable goal for others. So our 220-1102 preparation exam enjoys good sales for the excellent quality and reasonable prices in recent years. And we are so sure that we can serve you even better than you can imagine with our 220-1102 learning guide since we are keeping on doing a better job in this career.
