Accurate FCP_FCT_AD-7.2 Prep Material | High Pass-Rate FCP—FortiClient EMS 7.2 Administrator 100% Free Downloadable PDF

It is a popular belief that only professional experts can be the leading one to do some adept job. And similarly, only high quality and high accuracy FCP_FCT_AD-7.2 exam questions like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference. Our FCP_FCT_AD-7.2 exam questions generally raised the standard of practice materials in the market with the spreading of higher standard of knowledge in this area. So your personal effort is brilliant but insufficient to pass the FCP—FortiClient EMS 7.2 Administrator exam and our FCP_FCT_AD-7.2 Test Guide can facilitate the process smoothly & successfully. Our FCP—FortiClient EMS 7.2 Administrator practice materials are successful by ensuring that what we delivered is valuable and in line with the syllabus of this exam.

Fortinet FCP—FortiClient EMS 7.2 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

What is the function of the quick scan option on FortiClient?

- A. It allows users to select a specific file folder on their local hard disk drive (HDD), to scan for threats.
- **B. It scans executable files, DLLs, and drivers that are currently running, for threats.**
- C. It scans programs and drivers that are currently running, for threats
- D. It performs a full system scan including all files, executable files, DLLs, and drivers for threats.

Answer: B

Explanation:

Understanding Quick Scan Function:

The quick scan option on FortiClient is designed to scan certain elements of the system quickly for threats.

Evaluating Scan Scope:

The quick scan specifically targets executable files, DLLs, and drivers that are currently running, providing a rapid assessment of the active components of the system.

Conclusion:

The correct answer is D, as it accurately describes the function of the quick scan option on FortiClient.

NEW QUESTION # 38

Which security fabric component sends a notification to quarantine an endpoint after IOC detection in the automation process?

- A. FortiAnalyzer
- **B. FortiClient EMS**
- C. FortiGate
- D. FortiClient

Answer: B

Explanation:

Understanding the Automation Process:

In the Security Fabric, automation processes can include actions such as quarantining an endpoint after an IOC (Indicator of Compromise) detection.

Evaluating Responsibilities:

FortiClient EMS plays a crucial role in endpoint management and can send notifications to quarantine endpoints.

Conclusion:

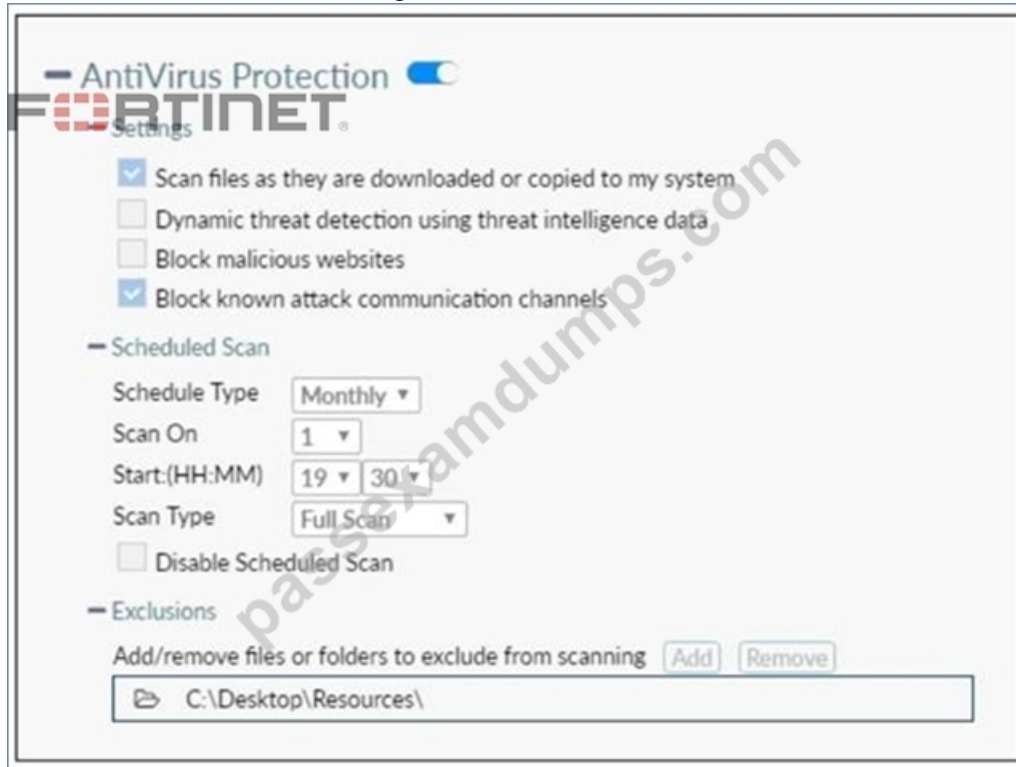

The correct security fabric component that sends a notification to quarantine an endpoint after IOC detection is FortiClient EMS.

Reference:

FortiClient EMS and automation process documentation from the study guides.

NEW QUESTION # 39

Refer to the exhibit. Based on The settings shown in The exhibit, which statement about FortiClient behaviour is Hue?

- A. FortiClient copies infected files to the Resources folder without scanning them.
- B. FortiClient quarantines infected ties and reviews later, after scanning them.
- C. FortiClient blocks and deletes infected files after scanning them.
- D. FortiClient scans infected files when the user copies files to the Resources folder.

Answer: D

Explanation:

Based on the settings shown in the exhibit, FortiClient is configured to scan files as they are downloaded or copied to the system. This means that if a user copies files to the "Resources" folder, which is not listed under exclusions, FortiClient will scan these files for infections. The exclusion path mentioned in the settings, "C:\Users\Administrator\Desktop\Resources", indicates that any files copied to this specific folder will not be scanned, but since the question implies that the "Resources" folder is not the same as the excluded path, FortiClient will indeed scan the files for infections.

NEW QUESTION # 40

An administrator deploys a FortiClient installation through the Microsoft AD group policy After installation is complete all the custom configuration is missing.

What could have caused this problem?

- A. The FortiClient MST file is missing from the distribution package
- B. FortiClient does not have permission to access the distribution package.
- C. The FortiClient package is not assigned to the group
- D. The FortiClient exe file is included in the distribution package

Answer: C

Explanation:

When deploying FortiClient via Microsoft AD Group Policy, it is essential to ensure that the deployment package is correctly assigned to the target group. The absence of custom configuration after installation can be due to several reasons, but the most likely cause is:

* **Deployment Package Assignment:** The FortiClient package must be assigned to the appropriate group in Group Policy Management. If this step is missed, the installation may proceed, but the custom configurations will not be applied. Thus, the administrator must ensure that the FortiClient package is correctly assigned to the group to include all custom configurations.

NEW QUESTION # 41

Refer to the exhibits.

Which shows the configuration of endpoint policies.

Based on the configuration, what will happen when someone logs in with the user account student on an endpoint in the trainingAD domain?

- A. FortiClient EMS will assign the Training policy for on-fabric endpoints and the Sales policy for the off- fabric endpoint
- B. FortiClient EMS will assign the Sales policy
- C. FortiClient EMS will assign the Default policy
- **D. FortiClient EMS will assign the Training policy**

Answer: D

Explanation:

Based on the configuration shown in the exhibits:

- * There are three endpoint policies configured: Training, Sales, and Default.
- * The "Training" policy is assigned to the "trainingAD.training.lab" group.
- * The "Sales" policy is assigned to "All Groups" and "trainingAD.training.lab/student."
- * The "Default" policy has no specific groups assigned.

When someone logs in with the user account "student" on an endpoint in the "trainingAD" domain:

- * The "Training" policy is specifically assigned to the "trainingAD.training.lab" group.
- * The "Sales" policy includes "trainingAD.training.lab/student" but not the general "trainingAD.training.lab" group.
- * The system will prioritize the most specific match for the group.

Therefore, FortiClient EMS will assign the "Training" policy to the "student" account logging into the "trainingAD" domain as it matches the group "trainingAD.training.lab" directly.
