ExamsLabs's Apple-Device-Support exam training materials are proved to be effective by some professionals and examinees that have passed Apple-Device-Support exam, ExamsLabs's Apple-Device-Support exam dumps are almost the same with real exam paper. It can help you pass Apple-Device-Support certification exam. After you purchase our Apple-Device-Support VCE Dumps, if you fail Apple-Device-Support certification exam or there are any problems of Apple-Device-Support test training materials, we will give a full refund to you. We believe that our ExamsLabs's Apple-Device-Support vce dumps will help you.

Apple Device Support Exam Sample Questions (Q70-Q75):

NEW QUESTION # 70

What are two features of two-factor authentication for a personal Apple ID?

- A. It ensures that only the account's owner can access the account.
- B. It doesn't require the Apple ID password.
- C. It requires a special app on the trusted device.
- D. It can be accessed on trusted devices.
- E. It uses a four-digit passcode to access a user's account.

Answer: A,D

NEW QUESTION # 71

Which setting should you check to find out if ACME manages her iPhone?

- A. General > Software Update
- B. General > Profile & Device Management
- C. General > VPN & Device Management
- D. Privacy & Security > Device Management
- E. Control Center > Device Profile

Answer: B

Explanation:

This is the correct setting to check if an iPhone is managed by an organization, such as ACME. A profile is a file that contains settings and policies that can be installed on an iPhone to control its features and behavior. A profile can be installed by an organization to manage the device remotely, or by the user to customize the device. A profile can also indicate that the device is supervised, which means that the organization has more control over the device and can apply extra restrictions. To see if an iPhone has a profile installed, go to Settings > General > Profile & Device Management. If there is no profile, this section will not appear. If there is a profile, tap on it to see what type of changes are made. To learn more about the features changed for your specific organization, ask your administrator whether these settings are enforced. References: Delete unknown configuration profiles from your iPhone or iPad, Get started with a supervised iPhone or iPad, See who has access to your iPhone or iPad, How to check if an iPhone is locked or unlocked

NEW QUESTION # 72

Safari profiles aren't syncing between a user's Mac and iPhone. What should you verify on the user's devices to resolve this issue?

- **A. Safari is turned on in the iCloud section of Apple Account settings.**
- B. Private Relay is turned on in the iCloud section of Apple Account settings.
- C. Safari extensions are turned on in the iCloud section of Apple Account settings.
- D. Profile syncing is turned on for the Apple Account.

Answer: A

Explanation:

Safari profiles (introduced in iOS 17/macOS Sonoma) allow users to separate browsing data (e.g., tabs, bookmarks) and sync them via iCloud. For syncing to work between a Mac and iPhone, Safari must be enabled in the iCloud settings on both devices (Settings > [user name] > iCloud on iPhone; System Settings > [user name] > iCloud on Mac). This toggle ensures bookmarks, history, tabs, and profiles sync.

* Option A is vague; there's no specific "Profile syncing" setting-Safari syncing covers profiles.

* Option B (Safari extensions) isn't required for profile syncing; extensions sync separately.

* Option C is correct, as disabling Safari in iCloud stops all Safari data syncing.

* Option D (Private Relay) enhances privacy but doesn't affect syncing. Verify this in Apple's "Set up and use iCloud Tabs" (support.apple.com/HT202530), which extends to profiles.

NEW QUESTION # 73

Your MDM administrator set a Recovery Lock on your supervised MacBook Pro. What additional steps must you complete to start your MacBook Pro in macOS Recovery?

- A. Enter the Recovery Lock password in System Settings > General > Startup Disk, then restart.
- B. When prompted, enter the Bypass Key.
- **C. When prompted, enter the recoveryOS password.**
- D. Take the Mac to an Apple Authorized Service Provider with proof of purchase.

Answer: C

Explanation:

Recovery Lock (MDM feature on supervised Macs) requires entering the recoveryOS password at the Recovery prompt to access macOS Recovery.

* Option A: Startup Disk doesn't handle this.

* Option B: Service isn't needed.

* Option D: Bypass Key isn't a standard term here.

* Option C: Correct-MDM-specific step. References: Apple Support - "MDM Recovery Lock" (support.apple.com/HT204142).

NEW QUESTION # 74

Scenario

Antonio recently bought his iPhone 14 Pro Max. It's taking over an hour to charge the device to 50% using his 5W USB power adapter that came with his previous iPhone.

Why can't Antonio fast charge his iPhone?

- A. Fast charging isn't supported on iPhone 14 Pro Max.
- B. Fast charging iPhone 14 Pro Max to 50% takes more than 60 minutes.
- **C. Fast charging requires a 20W or higher power adapter.**
- D. Fast charging requires a 61W or higher power adapter.

Answer: C

NEW QUESTION # 75

.....
