ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q587-Q592):

NEW QUESTION # 587

Who is not affected by HIPAA?

- A. banks
- B. universities
- C. billing agencies
- D. clearing houses

Answer: A

Explanation:

University: there are medical universities and thus could be a covered entity and as such, affected by HIPAA.

NEW QUESTION # 588

According to private sector data classification levels, how would salary levels and medical information be classified?

- A. Public
- **B. Private**
- C. Confidential
- D. Sensitive

Answer: B

Explanation:

According to the classification levels of the private sector, this information is classified as Private because this information is from a personal nature. There is no need for other employees to see details about your health or your salary range, this can lead to internal problems inside the company, problems like jealous employees.

NEW QUESTION # 589

At a MINIMUM, a formal review of any Disaster Recovery Plan (DRP) should be conducted

- **A. annually.**
- B. monthly.
- C. bi-annually.
- D. quarterly.

Answer: A

NEW QUESTION # 590

Which choice below is NOT an example of an issue-specific policy?

- A. Virus-checking disk policy
- **B. Defined router ACLs**
- C. E-mail privacy policy
- D. Unfriendly employee termination policy

Answer: B

Explanation:

Answer c is an example of a system-specific policy, in this case the router's access control lists. The other three answers are examples of issue-specific policy, as defined by NIST. Issue-specific policies are similar to program policies, in that they are not technically focused. While program policy is traditionally more general and strategic (the organization's computer security program, for example), issue-specific policy is a nontechnical policy addressing a single or specific issue of concern to the organization, such as the procedural guidelines for checking disks brought to work or e-mail privacy concerns. System-specific policy is technically focused and addresses only one computer system or device type. Source: National Institute of Standards and Technology, An Introduction to Computer Security: The NIST Handbook Special Publication 800-12.

NEW QUESTION # 591

What is the second step in the identity and access provisioning lifecycle?

- A. Provisioning

- Answer: C**
