

2025 Reliable ISO-IEC-27001-Foundation Download Free Dumps Help You Pass ISO-IEC-27001-Foundation Easily

By using the DumpExam ISO-IEC-27001-Foundation valid exam lab questions, there is no need to purchase anything else or attend expensive training. We promise that you can pass the ISO-IEC-27001-Foundation certification at the first try. We will update our questions and answers in time after thoroughly analysis of latest real exams, so the ISO-IEC-27001-Foundation Exam Dumps shown front of you is the latest and valid. Besides, we offer you one year free update APMG-International study dumps after your purchase.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 2	Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 3	Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 4	Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 5	Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.

Topic 6	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 7	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.

DumpExam APMG-International ISO-IEC-27001-Foundation Exam Study Guide can be a lighthouse in your career. Because it contains all ISO-IEC-27001-Foundation exam information. Select DumpExam, it can help you to pass the exam. This is absolutely a wise decision. DumpExam is your helper, you can get double the result, only need to pay half the effort.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which statement about the conduct of audits is true?

- A. During Stage 1 of a certification audit, evidence is collected by observing activities
- **B. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- C. Third party audits are conducted by a customer of the organization
- D. The certificate issued after a successful re-certification audit in typical schemes lasts for one year

Answer: B

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

NEW QUESTION # 17

What is the definition of a threat according to ISO/IEC 27000?

- A. A weakness of an asset or a control that can be exploited
- B. The risk remaining after risk treatment
- C. A single or a series of unwanted or unexpected information security events
- **D. A potential cause of an unwanted incident which can result in harm to a system or organization**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

NEW QUESTION # 18

Identify the missing word(s) in the following sentence.

"Information security, cybersecurity and privacy protection - [?]" is the title of ISO/IEC 27005.

- A. Information security management systems - Requirements
- **B. Guidance on managing information security risks**
- C. Information security controls
- D. Guidelines for information security management systems auditing

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:

ISO/IEC 27005:2022 is titled:

"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).

Thus, the correct answer is C: Guidance on managing information security risks.

NEW QUESTION # 19

What activity is done first when preparing for an initial certification audit?

- A. Provide evidence that nonconformities from an internal audit have been actioned
- B. Provide records to the Certification Body auditor for the Stage 2 audit
- **C. Agree the scope of the ISMS with the Certification Body auditor**
- D. Provide documents to the Certification Body auditor for the Stage 1 audit

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:

Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body.

ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage

2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.

Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

NEW QUESTION # 20

Which factor is required to be determined when understanding the organization and its context?

- **A. Internal issues affecting the purpose of the ISMS**
- B. The information security objectives relevant to the ISMS
- C. The ISO/IEC 27001 clauses which apply to the management system
- D. The processes that will be required to operate the ISMS

Answer: A

Explanation:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.
