SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q52-Q57):

NEW QUESTION # 52

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. User with Partner Administrator can configure translation.
- **B. Translations are included in migrations and are listed as AMLStringResource in the migration**
- C. Contact an SAP Deployment lead for customization help.
- D. Create a package to migrate translations by ICM.

Answer: B

NEW QUESTION # 53

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies to this scenario?

- A. In the enumeration file, the Value column must only contain whole numbers
- **B. The display order in the drop down matches the order defined in the enumeration file**
- **C. The user can filter the values using the search box in the chooser**
- D. The display order of the values is alphabetical

Answer: B,C

NEW QUESTION # 54

Which syntax is used for writing custom Validity Conditions?

- A. Python
- B. XML
- C. Scheme
- **D. Regular expression**

Answer: D

Explanation:

SAP Ariba uses an expression language based on Object-Graph Navigation Language (OGNL) to define custom validity conditions on fields. Within these expressions, regular expressions (regex) are supported to perform complex pattern validations, such as validating email formats or custom string structures. Other programming languages like Python, Scheme, or XML are not supported for this purpose. The use of regular expressions within SAP Ariba's validity conditions provides powerful, flexible validation capabilities, allowing administrators to enforce data quality rules precisely at the field level, consistent with official SAP Ariba documentation on validation expressions.

NEW QUESTION # 55

What are the key characteristics of a Bluefield deployment scenario? Note: There are 2 correct answers to this question.

- A. The Test site has been configured using the SAP Bluefield template

- B. The customer already has an SAP Ariba Strategic Sourcing suite solution deployed
- C. Many team members have a naive perception of deploying software solutions
- D. The Production site may have live transactions

Answer: B,D

NEW QUESTION # 56

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Deployment Description
- B. Onboard Resource Center
- C. Inline Help
- D. Partner Statement of Work

Answer: A

Explanation:

The Deployment Description document formally defines the scope, roles, and responsibilities of the SAP Deployment Lead within a specific SAP Ariba project. It provides clarity on tasks such as migration coordination, technical issue resolution, and stakeholder communication. Other documents like the Onboard Resource Center provide logistical support, the Partner Statement of Work focuses on partner deliverables, and Inline Help offers in-application guidance-not role definitions. The Deployment Description is the authoritative reference for deployment lead responsibilities.

NEW QUESTION # 57

.....

The field of SAP is growing rapidly and you need the SAP C-ACDET-2506 certification to advance your career in it. But clearing the C-ACDET-2506 test is not an easy task.
