Compared with products from other companies, our C-ACDET-2506 practice materials are responsible in every aspect. After your purchase of our C-ACDET-2506 exam braindumps, the after sales services are considerate as well. We have considerate after sales services with genial staff. They are willing to solve the problems of our C-ACDET-2506 training guide 24/7 all the time. If you have any question that you don't understand, just contat us and we will give you the most professional advice immediately.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	● Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	● Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 3	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

ExamsLabs provides proprietary preparation guides for the certification exam offered by the C-ACDET-2506 exam dumps. In addition to containing numerous questions similar to the C-ACDET-2506 exam, the C-ACDET-2506 Exam Questions are a great way to prepare for the C-ACDET-2506 exam dumps. The SAP C-ACDET-2506 mock exam setup can be configured to a particular style and arrive at unique questions.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q55-Q60):

NEW QUESTION # 55

During a Bluefield migration, you discover missing flex master data templates. What do you do?

- **A. Rebuild them manually in production**
- B. Defer to post-go-live
- C. Ignore them
- D. Use reporting workaround

Answer: A

Explanation:

In a Bluefield deployment scenario, SAP Ariba requires that all Flex Master Data (FMD) templates and their associated data be present in the Production environment before migrating related configuration elements. If you find missing FMD templates during migration, the recommended approach is to manually recreate the missing templates in Production and load the relevant data. This is essential to maintain integrity because many custom fields depend on these templates, and missing templates can cause migration failures or broken references. Deferring or ignoring the issue risks operational disruptions and data inconsistencies. Reporting workarounds do not address template dependencies and therefore are ineffective. This aligns with SAP's guidance on master data migration within Bluefield scenarios to ensure successful, error-free deployments.

NEW QUESTION # 56

How can you create a field label with Italics?

- A. By marking the text in the field and selecting Ctrl-I
- **B. By using standard HTML formatting like <i>label</i> can be added to the field label**
- C. Find the correct folder
- D. Formatting of a field label is not possible
- E. By selecting the option "Italic label"

Answer: B

Explanation:

In SAP Ariba, field labels themselves do not support rich text formatting directly in the UI, meaning you cannot use Ctrl-I or a specific "Italic label" toggle to style the label. However, SAP allows the use of basic HTML tags, including <i> for italics, in help tip text or validation/error message text associated with fields. By embedding HTML tags like <i>...</i>, administrators can add italicized text in these auxiliary field descriptions, enhancing clarity and user guidance.

This is because SAP Ariba's UI rendering engine processes simple HTML in certain field-related text areas but treats field labels as

plain text for consistency and localization reasons.

Therefore, the correct method for italicizing field-related text is using HTML tags in Help Tips or validation messages, not in the label itself.

This behavior is documented in SAP Ariba configuration best practices, emphasizing limited HTML support to maintain UI integrity and accessibility standards.

NEW QUESTION # 57

When preparing to load legacy contracts during a Bluefield deployment in SAP Ariba Contracts, which of the following actions are required to ensure a successful migration?

- A. Create a new customized contract upload process specifically for Bluefield deployments to accommodate differences in site structure.
- **B. Use the exact same process and tools as used in the Greenfield migration scenario to upload legacy contracts.**
- C. Manually enter legacy contract data into SAP Ariba Contracts using the application's UI instead of using import tools.
- D. Skip the legacy contract upload step if the Production site already contains migrated Flex Master Data Templates.

Answer: B

NEW QUESTION # 58

What is the recommended order of operations for creating a required Flex Master Data (FMD) type field in a project header?:

- A.
- B.
- C.
- **D.**

Answer: D

NEW QUESTION # 59

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies?

- A. The display order of the values is alphabetical
- B. The user can filter the values using the search box in the chooser
- **C. The display order in the drop down matches the order defined in the enumeration file**
- D. In the enumeration file, the Value column must only contain whole numbers

Answer: C

Explanation:

For single-select enumeration fields, the dropdown list order in SAP Ariba exactly follows the order in which values are defined in the enumeration file, not alphabetical. Alphabetical sorting applies only to multi-select chooser fields. The Value column can be text or integers depending on field type, and search/filter boxes are available only on chooser (multi-select) fields, not single-select dropdowns.

NEW QUESTION # 60

.....

You will earn the SAP C-ACDET-2506 certification on the first try if you use C-ACDET-2506 Questions. Our high-quality SAP C-ACDET-2506 practice questions preparation material in three formats will help you crack the SAP C-ACDET-2506 Exam in one go. For the SAP C-ACDET-2506 exam dumps, we offer SAP C-ACDET-2506 PDF questions, desktop C-ACDET-2506 practice test software, and web-based C-ACDET-2506 practice exam software.
