These CSM exam questions formats are PDF dumps files, web-based practice test software, and desktop practice test software.

Scrum Alliance Certified ScrumMaster Exam Sample Questions (Q51-Q56):

NEW QUESTION # 51

The Sprint Backlog belongs solely to the

- A. Scrum Team.
- **B. Developers.**
- C. Product Owner.
- D. Scrum Master.

Answer: B

Explanation:

The Sprint Backlog is owned solely by the Developers, as they are responsible for planning, managing, and executing the work required to meet the Sprint Goal. The Sprint Backlog is a highly visible, real-time plan for delivering the Increment. It includes:

- * The Sprint Goal.
- * The set of Product Backlog items selected for the Sprint.
- * A plan for delivering the Increment.

According to the 2020 Scrum Guide, the Developers:

- * Have full ownership and accountability over the Sprint Backlog.
- * Decide how to adapt their work plan daily to achieve the Sprint Goal.

Why the other options are incorrect:

- * A. Scrum Master: The Scrum Master facilitates the Scrum process but does not own the Sprint Backlog.
- * C. Product Owner: The Product Owner manages the Product Backlog, not the Sprint Backlog.
- * D. Scrum Team: While the Sprint Goal is owned by the entire Scrum Team, the Sprint Backlog is specifically managed and executed by the Developers.

NEW QUESTION # 52

What is the purpose of the Sprint Retrospective?

- A. Explain what Backlog items have been done and what has not been done
- **B. Inspect how the last Sprint went with regards to individuals, interactions, processes, tools and Definition of Done**
- C. Plan the incomplete work for the next Sprint and submit reasons to the Product Owner
- D. Identify Developers who did not perform well in the Sprint

Answer: B

Explanation:

The Sprint Retrospective is a formal opportunity for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. This event focuses on continuous improvement by reviewing processes, collaboration, tools, and their adherence to the Definition of Done.

According to the 2020 Scrum Guide, the Sprint Retrospective serves the following purposes:

- * To inspect how the last Sprint went in terms of individuals, interactions, processes, tools, and the Definition of Done.
- * To identify and agree upon actionable improvements that will increase the team's effectiveness in future Sprints.

Why the other options are incorrect:

- * B. Plan the incomplete work for the next Sprint and submit reasons to the Product Owner: This is not the purpose of the Sprint Retrospective. Sprint Planning is the event where the team plans the upcoming Sprint.
- * C. Explain what Backlog items have been done and what has not been done: This describes the Sprint Review, where the team discusses completed and incomplete Product Backlog Items with stakeholders.
- * D. Identify Developers who did not perform well in the Sprint: Scrum encourages collaboration, respect, and continuous improvement, not blaming individuals for shortcomings.

NEW QUESTION # 53

How often are Sprint Reviews conducted or held?

- A. Daily
- **B. Once at the end of every Sprint**
- C. One in the middle and one at the end of every Sprint
- D. Once at the beginning of the Sprint

Answer: B

Explanation:

The Sprint Review is held once at the end of every Sprint. It is a time-boxed event where the Scrum Team and stakeholders collaborate to inspect the Increment, review progress toward the Product Goal, and adapt the Product Backlog as needed.

According to the 2020 Scrum Guide:

* The purpose of the Sprint Review is to discuss what was completed during the Sprint and what could be done next to optimize value delivery.

* It occurs once at the end of every Sprint, ensuring transparency and stakeholder involvement.

Why the other options are incorrect:

* B. One in the middle and one at the end of every Sprint: The Sprint Review is not conducted multiple times within a Sprint.

* C. Once at the beginning of the Sprint: The Sprint Review is held at the end of the Sprint, not the beginning.

* D. Daily: The Sprint Review is not a daily event. The Daily Scrum occurs daily.

NEW QUESTION # 54

Which Scrum artifacts provide transparency and opportunities for inspection and adaptation?

- **A. Sprint Backlog, Product Backlog and Increment**
- B. Definition of Done and Product Backlog
- C. Burndown Charts, release plan and Product Backlog
- D. Definition of Done, Sprint Backlog and Product Backlog

Answer: A

Explanation:

The three Scrum artifacts—Product Backlog, Sprint Backlog, and Increment—provide transparency into the work and enable opportunities for inspection and adaptation. These artifacts are essential to ensuring the Scrum Team and stakeholders can inspect progress and adapt plans to maximize value.

According to the 2020 Scrum Guide:

* Product Backlog: Represents all the work needed to achieve the Product Goal and allows inspection and prioritization of upcoming work.

* Sprint Backlog: A real-time plan for the Sprint that provides transparency into what the team is working on and allows inspection and adaptation during the Sprint.

* Increment: The outcome of the Sprint that is usable and meets the Definition of Done, enabling stakeholders to inspect progress and provide feedback.

Why the other options are incorrect:

* A. Burndown Charts, release plan and Product Backlog: Burndown charts and release plans are complementary tools, but they are not official Scrum artifacts.

* C. Definition of Done and Product Backlog: The Definition of Done is not an artifact but a shared understanding of when work is complete.

* D. Definition of Done, Sprint Backlog and Product Backlog: While the Sprint Backlog and Product Backlog are artifacts, the Definition of Done is not.

NEW QUESTION # 55

Which of the following is an activity of Product Backlog management?

- A. Creating Sprint tasks
- B. Facilitating the Daily Scrum
- C. Planning the Sprint Backlog
- **D. Clearly expressing Product Backlog items**

Answer: D

Explanation:

Product Backlog management is primarily the responsibility of the Product Owner. One of their key activities is to clearly express Product Backlog items, ensuring they are transparent and understandable for the Developers. This helps the Scrum Team deliver valuable Increments.

According to the 2020 Scrum Guide, Product Backlog management includes:

* Clearly expressing Product Backlog items.

* Ordering the items to maximize value.

* Ensuring the Product Backlog is transparent, visible, and understood.

Why the other options are incorrect:

* B. Creating Sprint tasks: Sprint tasks are part of the Developers' detailed planning during the Sprint and are not part of Product Backlog management.

* C. Facilitating the Daily Scrum: This is a responsibility of the Developers, and the Scrum Master may only facilitate if explicitly requested.

* D. Planning the Sprint Backlog: The Sprint Backlog is planned during Sprint Planning and is primarily the Developers' responsibility, not part of Product Backlog management.

NEW QUESTION # 56

.....
